NET SAVINGS LINK, INC.
Notes to the Sept 30, 2020

1. Nature of Operations and Continuance of Business

The unaudited interim financial statements included herein have been prepared by Net Savings Link, Inc. (“NSL” or the “Company”) in accordance with accounting principles generally accepted in the United States of America and the rules of the Securities and Exchange Commission. We suggest that these interim financial statements be read in conjunction with the unaudited financial statements and notes for the year ended December 31, 2019. We believe that all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of financial position and the results of operations for the interim periods presented have been reflected herein and that the disclosures made are adequate to make the information not misleading. The results of operations for interim periods are not necessarily indicative of the results to be expected for the full year. Notes to the financial statements which would substantially duplicate the disclosure contained in the audited financial statements for the most recent fiscal year.

2. Going Concern

NSL’s financial statements are prepared using Generally Accepted Accounting Principles applicable to a going concern that contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, NSL has generated minimal revenue and accumulated significant losses since inception. As of September 30, 2020, company has accumulated a deficit of \$4,258,733 and a working capital deficit of \$2,244,513. All of these items raise substantial doubt about its ability to continue as a going concern. Management’s plans with respect to alleviating the adverse financial conditions that caused management to express substantial doubt about the NSL’s ability to continue as a going concern are as follows:

In order to fund the start-up of operations during the year ended December 31, 2019, management plans to enter into several financing transactions and try to raise funds. The continuation of the Company as a going concern is dependent upon its ability to generating profitable operations that produce positive cash flows. If the Company is not successful, it may be forced to raise additional debt or equity financing.

There can be no assurance that the Company will be able to achieve its business plans, raise any more required capital or secure the financing necessary to achieve its current operating plan. The ability of the Company to continue as a going concern is dependent upon its ability to successfully accomplish the plan described in the preceding paragraph and eventually attain profitable operations. The accompanying financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

3. Related Party Transactions

The Company accrued wages for its current President and CEO at a rate of \$120,000 per year. As of September 30, 2020 and December 31, 2019, the Company owed a total of \$717,564 and \$627,564, respectively, to the current and predecessor President and CEO of the Company for back due wages.

Upon his taking over of the Company in January 2016, the Company began accruing \$1,000 per month for office rental and supplies from its President and CEO.

During February 2016, the President and CEO of the Company purchased 25,000,000 shares of preferred stock series A for cash of \$250.

As of September 30, 2020 and December 31, 2019, the President and CEO of the Company were owed

\$51,622, respectively, for payment of expenses on behalf of the Company.

On 21 July 2017, the company received 1 billion shares at par from Hemp Beer Inc, a private corporation registered in Colorado, in exchange for the use of the company's IP for the Hemp Beer brand. This has been recognized as a wholly owned subsidiary in the fiscal statements.

4. Derivative Liabilities

NSL analyzed the conversion options embedded in the Convertible Promissory Notes for derivative accounting consideration under ASC 815, Derivatives and Hedging, and determined that the instruments embedded in the above referenced convertible promissory notes should be classified as liabilities and recorded at fair value due to their being no explicit limit to the number of shares to be delivered upon settlement of the conversion options. Additionally, the above referenced convertible promissory notes contain dilutive issuance clauses. Under these clauses, based on future issuances of NSL's common stock or other convertible instruments, the conversion price of the above referenced convertible promissory notes can be adjusted downward. Because the number of shares to be issued upon settlement of the above referenced convertible promissory notes cannot be determined under this instrument, NSL cannot determine whether it will have sufficient authorized shares at a given date to settle any other future share instruments.

During the twelve months ended December 31, 2018, the final derivative instruments were derecognized from the company. In the thirteen months ended December 31, 2017 a net gain of \$230,579 was recorded on mark-to-market of the conversion options and warrants

The following table summarizes the derivative liabilities included in the balance sheet at September 30, 2020 and December 31, 2019:

Derivative liabilities November 30, 2015	\$	274,336
Loss on change in fair value		36,807
Balance at November 30, 2016		311,143
Reclassification of derivative liability to paid-in capital		(18,908)
Gain on change in fair value		(2,414)
Derecognition of derivative on conversion of loan notes		(228,165)
Balance at December 31, 2017	\$	61,656
Derecognition of derivative instruments (warrants)		(61,656)
Balance at December 31, 2018 and June 30, 2019		-

The Company valued its derivatives liabilities using the Black-Scholes option-pricing model. Assumptions used during the thirteen months ended December 31, 2017 include: (1) risk-free interest rates between 0.86% to 1.28%, (2) lives of between 0.1 and 1.75 years, (3) expected volatility of between 436% to 562%, (4) zero expected dividends, (5) conversion prices as set forth in the related instruments, and (6) the common stock price of the underlying share on the valuation dates.

5. Financial Instruments

ASC 820, *Fair Value Measurements* (ASC 820) and ASC 825, *Financial Instruments* (ASC 825), requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. It establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. It prioritizes the inputs into three levels that may be used to measure fair value:

Level 1 - Level 1 applies to assets or liabilities for which there are quoted prices in active markets for

identical assets or liabilities.

Level 2 - Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 - Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

NSL's financial instruments consist principally of cash, accounts payable, and accrued liabilities. Pursuant to ASC 820 and 825, the fair value of cash is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. The recorded values of all other financial instruments approximate their current fair values because of their nature and respective maturity dates or durations.

The following table sets forth by level with the fair value hierarchy the Company's financial assets and liabilities measured at fair value on December 31, 2018:

	Level 1	Level 2	Level 3	Total
Assets				
None	\$ -	\$ -	\$ -	\$ -
Liabilities				
Derivative financial instruments	\$ -	\$ -	\$ -	\$ -

The following table sets forth by level with the fair value hierarchy the Company's financial assets and liabilities measured at fair value on December 31, 2017:

	Level 1	Level 2	Level 3	Total
Assets				
None	\$ -	\$ -	\$ -	\$ -
Liabilities				
Derivative financial instruments	\$ -	\$ -	\$ 61,656	\$ 61,656

6. Legal Provision

On March 25, 2020, Jake Noch, a former employee of the Company, filed a lawsuit against the Company in the Circuit Court for Collier County in Naples, Florida. Mr. Noch was seeking the sum of \$1,298,045 for lost wages and expenses accrued on behalf of the Company. On September 16, 2020, the same court entered into a final judgement in Mr Noch's favor for the amount of \$1,298,195.

7. Stockholders' Equity

During March 2017, a holder of a convertible note payable elected to convert \$8,980 in principal into 149,666,667 shares of common stock, or \$0.00006 per share.

During May 2017, the Company collected cash of \$56,500 for the sale of 113,000,000 shares of restricted common stock at \$0.0005 per share. However, the shares have not been issued and the cash is being held as a liability stock deposit.

During October 2017, a holder of 125,000,000 shares in series B convertible preferred stock elected to convert these to 125,000,000 shares of common stock.

During October 2017, stock dividends of 314,951,350 shares in common stock were issued to existing shareholders.

During October 2017 and December 2017, a holder of convertible notes payable elected to convert \$219,496 of principal and \$119,794 of accrued interest into 1,078,640,476 shares of common stock, an average of \$0.0003 per share

During December 2017, a holder of a convertible note payable elected to convert \$2,500 of principal into 13,157,895 shares of common stock, or \$0.00019 per share.

During March 2018, 250,000,000 ordinary shares were issued at \$0.0001 for \$25,000.

During April 2018, 113,000,000 ordinary shares were issued at \$0.0005 for cash that had previously been received (in 2017)

During October 2018, 100,000,000 ordinary shares were issued at \$0.0003 in settlement of debts for services received. 40,000,000 ordinary shares were issued at \$0.0001 in exchange for cash. This had not been received by the year end, and is recorded as an asset on the balance sheet.

During December 2018, 135,000,000 ordinary shares were issued at \$0.0003 in settlement of debts for services received. 5,000,000 ordinary shares were issued at \$0.0002 in exchange for cash for \$1,000.

During May 2019, 100,000,000 ordinary shares were issued at \$0.0002 in settlement of debts and for services received.
