

## Alternative Reporting Standard: Pink<sup>®</sup> Basic Disclosure Guidelines

Federal securities laws, such as Rules 10b-5 and 15c2-11 of the Securities Exchange Act of 1934 (“Exchange Act”) as well as Rule 144 of the Securities Act of 1933 (“Securities Act”), and state Blue Sky laws, require issuers to provide *current information* to the public markets. With a view to facilitating compliance with these laws, OTC Markets Group has created these Pink Basic Disclosure Guidelines (“Guidelines”).<sup>1</sup> These Guidelines set forth the disclosure obligations that make up the “Alternative Reporting Standard” for Pink companies. These Guidelines have been designed to encompass the “Catch All” information required in Rule 15c2-11,<sup>2</sup> however they have not been reviewed by the U.S. Securities and Exchange Commission or any state securities regulator. We use information provided by companies under these Guidelines to designate the appropriate tier in the Pink Market: Current Information or Limited Information.<sup>3</sup>

These Guidelines may be amended from time to time, in the sole and absolute discretion of OTC Markets Group, with or without notice. The information provided by companies under these Guidelines is subject to our [Privacy Policy](#).

ASC 718 requires companies to estimate the fair value of share-based awards on the date of grant using an option-pricing model. The Company uses the Black-Scholes option-pricing model as its method of determining fair value. This model is affected by the Company's stock price as well as assumptions regarding a number of subjective variables. These subjective variables include, but are not limited to the Company's expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors. The value of the portion of the award that is ultimately expected to vest is recognized as an expense in the statement of operations over the requisite service period.

All transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable.

### Notes to Consolidated Financial Statements June 30, 2021 and March 31, 2021

#### Intangibles with Finite Lives

The Company applies the provisions of Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) 360-10, *Property, Plant and Equipment*, where applicable to all long lived assets. FASB ASC 360-10 addresses accounting and reporting for impairment and disposal of long-lived assets. The Company periodically evaluates the carrying value of long-lived assets to be held and used in accordance with FASB ASC 360-10. FASB ASC 360-10 requires impairment losses to be recorded on long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets’ carrying amounts. In that event, a loss is recognized based on the amount by which the carrying amount exceeds the fair market value of the long-lived assets. Loss on long-lived assets to be disposed of is determined in a similar manner, except that fair market values are reduced for the cost of disposal.

The Company does not amortize any intangible assets with finite lives.

Goodwill and intangible assets are reviewed for potential impairment whenever events or circumstances indicate that their carrying amounts may not be recoverable.

#### Revenue Recognition

The Company applies ASC 606 — Revenue from Contracts with Customers. Under ASC 606, the Company recognizes revenue from the commercial sales of products, licensing agreements and contracts to perform pilot studies by applying the following steps: (1) identify the contract with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to each performance obligation in the contract; and (5) recognize revenue when each performance obligation is satisfied.

#### Advertising

Advertising costs are expensed as incurred. Advertising expenses for the three months ended June 30, 2021 and 2020 were \$0.

#### Research and Development Expenditure

Research expenditure is recognized as an expense when it is incurred. Development expenditure is recognized as an expense except that expenditure incurred on development projects are capitalized as long-term assets to the extent that such expenditure is expected to generate future economic benefits. Development expenditure is capitalized if, and only if an entity can demonstrate all of the following:

1. its ability to measure reliably the expenditure attributable to the asset under development;
2. the product or process is technically and commercially feasible;
3. its future economic benefits are probable;
4. its ability to use or sell the developed asset;
5. the availability of adequate technical, financial and other resources to complete the asset under development;  
and
6. its intention to complete the intangible asset and use or sell.

## **JZZ TECHNOLOGIES, INC. AND SUBSIDIARIES**

### **Notes to Consolidated Financial Statements June 30, 2021 and March 31, 2021**

Capitalized development expenditure is measured at cost less accumulated amortization and impairment losses, if any. Development expenditure initially recognized as an expense is not recognized as assets in the subsequent period. The development expenditure is amortized on a straight-line method over a period of not exceeding 15 years when the products are ready for sale or use. In the event that the expected future economic benefits are no longer probable of being recovered, the development expenditure is written down to its recoverable amount.

Research and development costs represent the costs of developing and perfecting JZZ's products as well as marketing and planning for those products. These costs are charged to expense as incurred.

The Company estimated these costs to be \$0 in its operations for the the three months ended June 30,, 2021 and 2020.

#### **Fair Value of Financial Instruments**

The Company adopted FASB ASC 820, Fair Value Measurements and Disclosures, which provides a framework for measuring fair value under GAAP. Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The standard also expands disclosures about instruments measured at fair value and establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1 — Quoted prices for identical assets and liabilities in active markets;

Level 2 — Quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Level 3 — Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

#### **Use of Estimates**

The preparation of financial statements in conformity with generally accepted accounting principles in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods. Management makes these estimates using the best information available at the time the estimates are made; however actual results could differ materially from those estimates.

#### **Emerging Growth Company Critical Accounting Policy Disclosure**

The Company qualifies as an “emerging growth company” under the 2012 JOBS Act. Section 107 of the JOBS Act provides that an emerging growth company can take advantage of the extended transition period provided in Section 7(a)(2)(B) of the Securities Act for complying with new or revised accounting standards. As an emerging grown company, the Company can delay the adoption of certain accounting standards until those standards would otherwise apply to private companies. The Company may elect to take advantage of the benefits of this extended transition period in the future.

#### **Income Taxes**

The Company accounts for income taxes under Section 740-10-30 of the FASB Accounting Standards Codification. Deferred income tax assets and liabilities are determined based upon differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the statements of operations in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB Accounting Standards Codification (“Section 740-10-25”). Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

Basic net loss per share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per share is computed by dividing net loss by the weighted average number of shares of common stock and potentially outstanding shares of common stock during each period, unless their effect is anti-dilutive due to continuing losses. There were no potentially dilutive shares outstanding as of June 30, 2021 and 2020.

## **JZZ TECHNOLOGIES, INC. AND SUBSIDIARIES**

### **Notes to Consolidated Financial Statements June 30, 2021 and March 31, 2021**

Management intends to raise additional operating funds through equity and/or debt offerings. However, there can be no assurance management will be successful in its endeavors. Ultimately, the Company will need to achieve profitable operations in order to continue as a going concern.

To the extent that funds generated from operations and any private placements, public offerings and/or bank financing are insufficient, the Company will have to raise additional working capital. No assurance can be given that additional financing will be available, or if available, will be on terms acceptable to the Company. If adequate working capital is not available to the Company it may be required to curtail its operations.

**NOTE 7 – Income Taxes**

The Company adopted the provisions of ASC 740-10. ASC 740-10 clarifies the accounting for uncertainty in income taxes recognized in a company’s financial statements. ASC 740-10 requires a company to determine whether it is more likely than not that a tax position will be sustained upon examination based upon the technical merits of the position. If the more-likely-than-not threshold is met, a company must measure the tax position to determine the amount to recognize in the financial statements. The application of income tax law is inherently complex. Laws and regulation in this area are voluminous and are often ambiguous. As such, we are required to make many subjective assumptions and judgments regarding the income tax exposures. Interpretations and guidance surrounding income tax laws and regulations change over time. As such, changes in the subjective assumptions and judgments can materially affect amounts recognized in the balance sheets and statements of income.

The Company has no unrecognized tax benefit, which would affect the effective tax rate if recognized. There has been no significant change in the unrecognized tax benefit during the three months ended June 30, 2021.

We classify interest and penalties arising from the underpayment of income taxes in the statement of income under general and administrative expenses. As of June 30, 2021, we had no accrued interest or penalties related to uncertain tax positions.

Deferred taxes are provided on a liability method whereby deferred tax assets are recognized for deductible temporary differences and operating loss and tax credit carry forwards and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

The components of deferred income tax assets (liabilities) at June 30, 2021 and March 31, 2021, were as follows:

As of March 31, 2021:

	Balance	Rate	Tax
Federal loss carryforward	\$4,953,013	21%	\$ 1,040,133
Valuation allowance			(1,040,133)
Deferred tax asset			<u>\$ -</u>

## JZZ TECHNOLOGIES, INC. AND SUBSIDIARIES

### Notes to Consolidated Financial Statements June 30, 2021 and March 31, 2021

As of March 31, 2021:

	Balance	Rate	Tax
Federal loss carryforward	\$4,478,770	21%	\$ 940,542
Valuation allowance			(940,542)
Deferred tax asset			<u>\$ -</u>

Due to the passage of the “Tax Cuts and Jobs Act” on December 20, 2017 the rate of the U.S. Federal Income Tax dropped from 34% to 21%, which is a flat percentage tax rate used for the calculation of the deferred income tax assets.

The new law also changes the rules on NOL carry forward. The 20-year limitation was eliminated, giving the taxpayer the ability to carry forward losses indefinitely. However, utilization of NOL carry forwards arising after January 1, 2018, will now be limited to 80 percent of taxable income

#### NOTE 8 – Derivative Liability

The Company has convertible notes payable outstanding at June 30, 2021 that are convertible into Company’s common stock to be issued upon conversion of notes payable based the current conversion formula into 29,405,000 shares of common stock.

Due to there being no explicit limit to the number of shares to be delivered upon settlement of the above conversion option embedded in the NP, the conversion feature is classified as derivative liabilities and recorded at fair value.

Pursuant to ASC 815, “Derivatives and Hedging,” the Company initially did not recognize the fair value of the embedded conversion feature of the NP on date of issuance due to limitations on the conversion feature of the security that have now expired and only the fair value of the securities were charged to operations. During the period of August 25, 2016 to June 30, 2021, the Company recorded a mark-to-market adjustment based on the fair value of the derivative liability on that date which has resulted in a charge of \$147,025 to operations during this period of time. The fair value of the derivative liability was determined using the Black Scholes option pricing model with a quoted market price of \$0.01, a conversion price of fifty percent of the closing bid price, high expected volatility, no expected dividends, an expected term of one year and a risk-free interest rate of 15%. As of June 30, 2021, the number of common shares that could be potentially issued to settle the conversion of the notes is 29,405,000 common shares.

The liability has been decreased for the conversion rate into common stock for the period ending June 30, 2021 and prior years and adjustments for the change in the derivative value based on the decrease in the conversion to common shares. The amount of the decrease for the three months ended June 30, 2021 was \$447,944 and for the three months ended June 30, 2020 it was decreased by \$159,425.
