NATURE OF OPERATIONS

HISTORY OF COMPANY

U.S. Energy Initiatives Corporation is a diverse (OTC Pink: USEI) energy firm started in 1996 and the firm has a long successful business history of developing its business strategies. Management's goal is to develop new technologies and to build a dynamic firm. From 2014-2015 U.S. Energy Initiatives centered its efforts on Energy (biodiesel), then Medical Marijuana and Hemp for developing products and services. At that same time period the Company had two dispensaries, located in the state of Washington, under the name UC or The Ultimate Cure along with an on-line website which also sold Hemp/CBD products. This business was under a joint venture and the project was dissolved in 2016 because the CBD venture was ahead of its time...folks did not understand the value of CBD products at that time. Since this time these products have had significant acceptance in the marketplace. Our goal here and always is to become an environmentally responsible firm, marketing our products to a worldwide audience to produce significant revenue and add value for our shareholders.

The Company now seeks to expand business through partnerships, strategic alliances, acquisitions, purchases where we have an opportunity produce significant revenue. In 2014 Anthony Miller brought to this firm patented oil and gas technologies that the company has on its books. This technology was significant and was field tested and market to customers in California and Oklahoma. At the time of this transaction, oil prices hit historical high prices and US Energy Initiatives management decided to not pursue this industry since it takes significant capital to enter and sustain a business in the oil industry... and also at that time the firm had no money.

Mr. Miller brought this patented technology with him when he came to USEI: Management believed that oil production is the key in this current environment and making more oil is the goal of every operator and producer. Management further believes that our patented technology offers a key solution for heavy, mid and light gravity oils that need heat, pressure and or a driving mechanism to bring more oil to the surface. Our proven and tested technology is significant. Our portable steam technology offers a cost-effective solution to enhancing oil recovery. Strategically marketing this technology will result in significant growth in both revenues and profits for our Company and our Partners. The Company's goal is to one day go back and utilize our technology and a team of professionals with experiences... to become an extremely profitable oil production firm.

Since 2014, Management decided that the cannabis sector was the key to the success and longevity of this firm. In November of 2016 California voters approved adult cannabis use; USEI Cannabis Corporation became a wholly owned subsidiary of US Energy Initiatives Corporation Inc; and was formed for the express purpose to take advantages of extensive relationships with legal growers, dispensaries, product developers, marketers, patent holders and other professionals in the cannabis industry. Management believes that these relationships and opportunities could and will create significant opportunities for the firm. Management further believes that this is just sound business for USEI. Our goal is strategically making our Cannabis subsidiary as a very lucrative division of USEI and develop our own proprietary products and services. Our hope is that this firm ultimately becomes a separate fully reporting public company to maximize its potential. In 2016 Management invested in a company called MRX (to build its first prototype) a super critical CO2 extraction business that is designed to extract oil from cannabis material, this oil is to be used in a wide variety of industry products. As a result of this this firm is now the leading technology in the cannabis industry utilizing supercritical CO2 as the methodology to extract oil from cannabis. MRX has expanded their technology and product lines to high production units... well beyond our initial involvement and raised capital to market their technology to the industry at large. Because of this initial investment management has an excellent relationship with MRX.

In 2017 Management of US Energy Initiatives Corp along with certain investors purchased an MRX 20L Super Critical CO2 extraction unit (for \$190K) to use in the California marketplace. A device that has the

capability of converting 18-28 pounds of cannabis trim to cannabis oil (making \$16,000 a day in revenue). The goal of this project is to obtain a legal California license to operate this device, and to produce revenue from the operations. Management further sought to raise a minimum of \$2 million dollars to procure support equipment that would produce \$16 million dollars annually according to the financial projections of the business plan. Management has commitments for this capital however, it has not received this money.

Management entered into an agreement and received some digital assets. The transaction was made when this currency (SUMCOIN) was valued at \$.05 per unit and at the time of the writing of this document the value is now over \$800 per coin; the price of the currency changes every 20 min. based upon the algorithm that tracks the top 100 coins worldwide. (. This currency evaluation is now well over \$5 million dollars (NOTE: the overall value of this currency is continually noted at this \$5 million evaluation value and will be continually be priced at this value until it is sold). Management will seek to understand how it can pledge, hypothecate, leverage, or sell this new asset to be able to execute its business plan. Currently, this asset is illiquid however it is managements understanding the developers are making great strides to become an extremely liquid currency just like bitcoin and Litecoin in the industry leaders of crypto currency.

Note 1 – BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles for interim financial of September 30, 2021, Accordingly, they do not include all of the information and footnotes required by U.S. generally accepted accounting principles for complete consolidated financial statements. In the opinion of management, all adjustments (consisting only of those of a normal recurring nature) considered necessary for a fair presentation have been included. Operating results for the period.

Note 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a. Principles of Consolidation

The consolidated financial statements include the accounts and operations of US Energy Corporation. All significant inter-company balances and transactions have been eliminated in preparing the consolidated financial statements.

b. Use of Accounting Estimates

Management is required to make estimates and assumptions during the preparation of the consolidated financial statements and accompanying notes in conformity with accounting principles generally accepted in the United States of America. These estimates and assumptions affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the dates of the consolidated financial statements. They also affect the reported amounts of net income. Actual results could differ materially from these estimates and assumptions.

c. Cash and Cash Equivalents

The Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents.

d. Accounts Receivable

Accounts receivables are stated at estimated net realizable value. Accounts receivables are comprised of balances due from customers.

e Inventories

Inventories are stated at the lower of cost or market first-in, first-out (FIFO) method.

f. Property, Plant and Equipment Net

Property, plant and equipment is capitalized at cost and depreciated using the straight-line depreciation method over the estimated useful lives of the respective assets. Leasehold Improvements are amortized using the straight-line depreciation method over the life of the respective lease or the service lives of the improvements, whichever is shorter.

g. Goodwill and other Intangible Assets

The Company accounts for goodwill and other intangible assets in accordance with Statement of Financial Accounting Standards "Goodwill and Other Intangibles" ... intangible assets with an indefinite life, namely goodwill, are not amortized. Intangible assets with a definite life are amortized on a straight-line basis over their estimated useful lives of ten years. Intangible assets with indefinite lives will be tested for impairment annually and when an event occurs that would indicate that the carrying amount may be impaired.

h. Impairment of Assets

In accordance with Statement of Financial Accounting Standards. Accounting for Impairment or Disposal of long-lived Assets" long-lived assets, such as property and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. When factors indicate that the assets should be evaluated for possible impairment, the Company uses an estimate of related cash flows. A deficiency in these cash flows relative to the carrying amounts is an indication of the need for a write-down due to impairment. Losses on impairment are recognized by a charge to earnings.

i. Income Taxes

The Company accounts for income taxes in accordance with the Statement of Financial Accounting Standards "Accounting for Income Taxes".

j. Earnings (Loss) Per Common Share

Earnings (loss) per share are computed using the basic and diluted calculations on the face of the statement of operations. Basic earnings (loss) per share are calculated by dividing net income (loss) by the weighted average number of shares of common stock outstanding for the period. Diluted earnings (loss) per share is calculated by dividing net income (loss) by the weighted average number of shares of common stock outstanding for the period, adjusted for the dilutive effect of common stock equivalents, using the treasury stock method.

n. Fair Value of Financial Instruments

The Company, in estimating its fair value disclosures for financial instruments, uses the following methods and assumptions:

Cash, Accounts Receivable, Accounts Payable and Accrued Expenses: The carrying amounts reported in the balance sheet for cash, accounts receivable, accounts payable and accrued expenses approximate their fair value due to their relatively short maturity.

o. Going concern:

The accompanying financial statements have been prepared assuming the company will continue as a going concern. As reflected in the financial statements, the Company has negative working capital for the period ended September 30, 2021 and a loss from operations. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The company is working on raising significant capital that is non-dilutive to be able to execute its current business plan.
