### **Use of Estimates**

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

# **Concentration of Credit Risk**

The Company places its cash in financial institutions which are insured by FDIC. At times, such cash may be in excess of the FDIC insurance limits.

#### **NOTE 2 – INCOME TAXES**

The Company Accounts for Income taxes under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases and operating losses, and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the results of the operations in the period that includes the enactment date. Deferred income tax expense (benefit) represents the change during the period in the deferred tax assets and deferred tax liabilities. #### **NOTE 11 – SUBSEQUENT EVENTS**

Management has evaluated subsequent events through November 12, 2021, the date on which the financial statements were issued.

The company will launch its Mining Technology Research and Development Division. The new division will actively engineer and design inaugural "thermal fracturing" prototype units for the mining industry and adjunct applications in the areas of construction and rescue where safe and efficient removal of material is required. Negotiations were completed for leasing a new office location for the Mining Technology Development Division. The team for the Mining and Technology division will move into the new office space located at 505 E Front Avenue, Suite 202 in Coeur D' Alene, Idaho.

The company completed an agreement with Merger Mines Corporation for all patent rights to what was previously known as the Merger Miner Technology. This agreement includes Merger Mines Corporation turning over all documents and information regarding this technology to Sidney Resources Corporation. Merger Mines will also release their patent attorney and allow this attorney to work with Sidney Resources Corporation. As part of the agreement, the company also acquired hundreds historical maps of mining claims in Idaho, Washington, Oregon and Montana as well as geological reports on hundreds of mining properties.

The company completed and submitted the application for new road construction to the Lucky Ben Project site. This will greatly improve access as the need for additional equipment increases. The new access road will also allow for Groundhog Mining and Milling to move a temporary portable ore mill and processing plant on location when we determine it is economically feasible. The permit was submitted to the McCall Ranger District on the Payette National Forest. The permit is requesting permanent deeded access via the new road.

The board continues to plan operations and determine budget needs for all operations for the Fiscal Year 2022. The company continues to work with Groundhog Mining & Milling to develop operational plans for continued exploration and eventual production of the Lucky Ben Project site.
