There are many uncertainties regarding the current coronavirus ("COVID-19") pandemic, and the Company is closely monitoring the impact of the pandemic on all aspects of its business, including how it will impact its customers, employees, suppliers, vendors, business partners and distribution channels. While the pandemic did not materially adversely affect the Company's financial results and business operations during the period, we are unable to predict the impact that COVID-19 will have on its future financial position and operating results due to numerous uncertainties. The Company expects to continue to assess the evolving impact of the COVID-19 pandemic and intends to make adjustments to its responses accordingly.

The Coronavirus Aid, Relief, and Economic Security Act ("CARES Act") was enacted on March 27, 2020 in the United States. In May 2020, the Company received approval and funding from the U.S. Small Business Administration ("SBA") to fund the loan under the SBA's Paycheck Protection Program ("PPP Loan") created as part of the recently enacted CARES Act administered by the SBA. Per the terms of the PPP Loan and EIDL loan and advance, the Company received total proceeds of \$37,500 from their bank and an EIDL loan and advance of \$86,100 and \$8,000, respectively. The EIDL advance is completely forgivable in addition to the PPP funds and has been recorded as other income in the statement of income. In accordance with the requirements of the CARES Act, the Company intends to use the proceeds from the PPP Loan primarily for payroll costs. The repayable portion of the loan is scheduled to mature in May 2022, has a 1.00% interest rate, and is subject to the terms and conditions applicable to all loans made pursuant to the Paycheck Protection Program as administered by the SBA under the CARES Act. ### **NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

### Basis of presentation

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP").

The accompanying unaudited quarterly financial statements have been prepared on a basis consistent with generally accepted accounting principles in the United States ("GAAP") for interim financial information. In the opinion of management, the accompanying unaudited financial statements reflect all adjustments, consisting of only normal and recurring adjustments, necessary for a fair presentation of the results of operations, financial position and cash flows for the periods presented. The results of operations for the periods are not necessarily indicative of the results expected for the full year or any future period. These statements should be read in conjunction with the Company's annual financial statements as posted on the Over the Counter Markets Website.

### Use of estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Accordingly, actual results could differ from those estimates. Such estimates include management's assessments of the carrying value of certain assets, useful lives of assets, and related depreciation and amortization methods applied.

### Cash equivalents

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents. At December 31, 2021 and 2020, respectively, the Company had no cash equivalents besides what was in the cash balances as of those dates.

### Marketable securities

Marketable securities consist of level 1 investments. The Company classifies these investments as available-for-sale securities at the time of purchase and evaluates such classification as of each balance sheet date. All investments are recorded at estimated fair value, with unrealized gains and losses included as a separate component of the consolidated statements of stockholders' equity. Realized gains and losses from the sale of available-for-sale securities or the amounts, net of tax, reclassified out of accumulated other comprehensive income, if any, are determined on a specific identification basis.

### Accounts Receivable

Accounts receivable includes trade accounts receivables from the Company's customers, net of an allowance for doubtful accounts. Accounts receivable are recorded at the invoiced amount and do not bear interest. Allowance for doubtful accounts is established based on various factors including credit profiles of the Company's customers, historical payments and current economic trends. The allowance for doubtful accounts balance represents management's estimate of uncollectible accounts based upon specific identification and historical information. Once a receivable is deemed to be uncollectible, such balance is charged against the allowance. Recoveries of trade receivables previously written-off are recorded when payment is received and are charged to income as a reduction to general and administrative expense in the consolidated statements of income. As of December 31, 2021 and 2020, respectively, there was no allowance for doubtful accounts.

### Inventory

Inventory is stated at the lower of cost and net realizable value, on a first-in, first-out basis. Inventory includes raw materials, work-in-process and finished goods. Costs for work-in-process and finished goods include raw materials, direct and indirect labor and manufacturing overhead. Reserves for slow-moving, excess, and obsolete inventory are estimated based on product expiration dates, historical experience and usage forecasts. As of March 31, 2022 and December 31, 2021, respectively, there was no reserve for inventory.

### Fair value of financial instruments

The Company records its financial assets and liabilities at fair value, which is defined under the applicable accounting standards as the exchange price that would be received for an asset or paid for a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company uses valuation techniques to measure fair value, maximizing the use of observable outputs and minimizing the use of unobservable inputs. The standard describes a fair value hierarchy based on three levels of inputs, of which the first two are considered observable and the last unobservable, that may be used to measure fair value which are the following:

- Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: Other inputs that are directly or indirectly observable in the marketplace; and
- Level 3: Unobservable inputs which are supported by little or no market activity.

The carrying amounts of the Company's cash and cash equivalents, trade and other receivables, and trade and other payables are considered to be representative of their respective fair values because of the short-term nature of those instruments. See Note 4 for additional disclosure related to financial assets and liabilities measured at fair value on a recurring basis.

#### Fixed assets

Property and equipment are recorded at cost. Expenditures for major additions and betterments are capitalized. Maintenance and repairs are charged to operations as incurred. Depreciation is computed by the straight-line method over the assets estimated useful life of three (3) years for equipment, five (5) years for automobile, and seven (7) years for furniture and fixtures. Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is reflected in statements of operations. At March 31, 2022 and December 31, 2021, the Company had property and equipment totaling \$152,203. Respectively, with accumulated depreciation of \$63,091 and \$57,220, respectively. Depreciation expense for the three months ended March 31, 2022 and 2021 was \$5,871 and \$5,747, respectively.

### Commitments and contingencies

The Company follows subtopic 450-20 of the FASB ASC to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated.

### Revenue recognition

The Company will recognize revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable and (iv) collectability is reasonably assured. In addition, the Company record will record allowances for accounts receivable that are estimated to not be collected.

#### Income taxes

The Company follows Section 740-10-30 of the FASB ASC, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the temporary differences are expected to be recovered or settled. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

The Company adopted section 740-10-25 of the FASB ASC ("Section 740-10-25") with regards to uncertainty in income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures. The Company had no material adjustments to its assets and/or liabilities for unrecognized income tax benefits according to the provisions of Section 740-10-25.

### Net income per share

The Company computes basic and diluted earnings per share amounts pursuant to section 260-10-45 of the FASB ASC. Basic earnings per share is computed by dividing net loss available to common shareholders, by the weighted average number of shares of common stock outstanding during the period, excluding the effects of any potentially dilutive securities. Diluted earnings per share is computed by dividing net loss available to common shareholders by the diluted weighted average number of shares of common stock during the period. The diluted weighted average number of common shares outstanding is the basic weighted number of shares adjusted as of the first day of the year for any potentially dilutive debt or equity. There were no potentially dilutive shares outstanding as of March 31, 2022 and December 31, 2021, respectively.

### **NOTE 3 – REVERSE MERGER AND ACQUISITIONS**

In April 2021, the Company acquired a new health and wellness brand: Champ Life in consideration for 120,000 common stock shares which were valued at \$0.103 on the date of issuance, or \$12,360. The brand has been wholly-acquired without any net change to the issued and outstanding share structure of OMID as the officers of the Company returned their own common shares to treasury and issued the 120,000 shares as consideration out of treasury. As part of the transaction, the Seller is expected to support various activities related to the launch and future growth of Champ Life, receiving 5% of net revenues from sales. Under certain circumstances, this royalty may be eliminated at the option of OMID management as part of a sale of the brand or following any calendar year wherein Champ Life achieves over \$1,000,000 in net revenue. At the time these financials statements were available to be issued, the Company has determined the transaction will be treated as an asset acquisition.

### NOTE 4 – FAIR VALUE MEASURESMENTS AND INVESTMENTS

Marketable securities	105,806	-	(11,526)	94,370
Total Assets	\$ 105,896	\$ -	\$ (11,526)	\$ 94,370

In October 2021, the Company discovered its beneficial ownership in an unrelated third-party company, Global Developments, Inc. (OTC Pink: GDVM) ("GDVI"). With knowledge of the investment, the Company and its officers began further due diligence into this ownership of GDVM to determine if the securities held in this public entity rightfully belong to the Company. They will continue their diligence on this matter before recognizing an equity method investment on the balance sheet. As of the date the financial statements were available to be issued, the Company was still determining the treatment of the shares owned by OMID with its legal counsel and will properly account for the investment in its financial statements upon confirmation. Further it should be noted that the officers and management of OMID, have zero involvement with GDVM and exercise no control over corporate matters at this time. As of March 31, 2022 and December 31, 2021, the Company is taking a conservative approach to exclude the market value of this potential asset considering the shell company GDVM is thinly traded on the OTC Pink.

On June 1, 2021, the Company issued 164,000 Series B Preferred shares to its officers as part of its plan to return common shares to treasury. The value of the shares on the date of transfer totaled approximately \$200,000 and is due to the related parties noted as they satisfied this liability in full on behalf of the Company. During the year ended December 31, 2021, the Company has paid back approximately \$120,000 of this related party liability and \$200,000 has been paid back from inception to date. As such, the additional liability included within Due to Related Party on the accompanying balance sheet is zero as of March 31, 2022 and December 31, 2021.

The above liabilities were zero interest bearing advances to the Company by the officers. During the time these advances were being repaid to the officers, they elected to forgo their salaries during that period to conserve cash within the Company.

### **NOTE 7 – COMMITMENTS AND CONTINGENCIES**

### Commitments

The one-year exclusivity agreement modifies and extends the Manufacturing Agreement executed in April, earlier this year, until October 31, 2021. Litigation Costs and Contingencies

In the normal course of business, we may be named from time to time as a defendant in various legal actions, including arbitrations, class actions and other litigation. We accrue for matters when we believe that losses are probable and can be reasonably estimated; as of the date of this filing, there have been no such accruals.

In many matters, it is inherently difficult to determine whether loss is probable or reasonably possible or to estimate the size or range of the possible loss. Accordingly, adverse outcomes from such proceedings could exceed the amounts accrued, if any, by an amount that could be material to our results of operations or cash flows in any particular reporting period.

### **NOTE 8 - SUBSEQUENT EVENTS**
