**Univec, Inc**  
**Notes to the Condensed Financial Statements**  
**March 31, 2022**  
**(Unaudited)**

**NOTE 1: NATURE OF ORGANIZATION**

The Company is a Delaware corporation, incorporated on October 7, 1996, and the successor by merger to Univec, Inc., a New York corporation, incorporated on August 18, 1992.

On March 1, 2014 the Company changed name to Univec Conglomerate, Inc.

On June 19, 2021 the Company changed name from Univec Conglomerate, Inc., to Univec, Inc., filed with the State of Delaware, Division of Corporations on June 21, 2021 file number 2670427

**NOTE 2: GOING CONCERN**

These consolidated financial statements have been prepared on a going concern basis which contemplates the realization of assets and the satisfaction of liabilities in the normal course of business for the foreseeable future. As of March 31, 2022 and December 31, 2021, the Company has an accumulated deficit of \$ 12,208,967 and \$ 11,547,762 since inception, respectively. This raises substantial doubt about the Company's ability to continue as a going concern.

The extent of the impact of the coronavirus ("COVID-19") outbreak on the financial performance of the Company will depend on future developments, including the duration and spread of the outbreak and related advisories and restrictions, and the impact of COVID-19 on the overall economy, all of which are highly uncertain and cannot be predicted. If the overall economy is impacted for an extended period, the Company's future operating results may be materially adversely affected.

Management's plans include raising capital through the equity markets to fund operations and eventually generate revenue through its business; however, there can be no assurance that the Company will be successful in such activities. These consolidated financial statements do not include any adjustments relating to the recovery of the recorded assets or the classifications of the liabilities that might be necessary should the Company be unable to continue as a going concern.

**NOTE 3: SUMMARY OF SIGNIFICANT ACCOUNT POLICIES**

**Principles of Consolidation**

The accompanying consolidated financial statements of Univec, Inc., include its own operation, the Company has no subsidiaries.

**Basis of Presentation**

The accompanying unaudited condensed financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for financial statements and with the instructions to Regulation S-X of the United States Securities and Exchange Commission ("SEC"). Accordingly, they do not contain all information and footnotes required by accounting principles generally accepted in the United States of America ("GAAP") for annual financial statements.

In the opinion of the Company's management, the accompanying unaudited condensed financial statements contain all the adjustments necessary (consisting only of normal recurring accruals) to present the financial position of the Company as of March 31, 2022, and December 31, 2021, and the results of operations and cash flows for the periods presented. The results of operations for the twelve months ended December 31, 2021, are not necessarily indicative of the operating results for the full fiscal year or any future period. These unaudited condensed financial statements should be read in conjunction with the consolidated financial statements and related notes thereto included in the Company's Annual Disclosure Statement Pursuant to the Pink Basic Disclosure Guidelines for the year ended December 31, 2021, filed hereto. The Company filed its Annual Disclosure Statement Pursuant to the Pink Basic Disclosure Guidelines and in compliance to the Amended SEC Rule 15c2-11.

## Use of Estimates

The preparation of consolidated financial statements in conformity with GAAP requires management to adopt accounting policies and make estimates and assumptions that affect amounts reported in the consolidated financial statements.

## Carrying Value, Recoverability and Impairment of Long-Lived Assets

The Company's long-lived assets, which include property and equipment and intangible assets, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

## Cash and Cash Equivalents

The Company considers all investments with an original maturity date of three months or less to be cash equivalents. The Company had cash in the amount of \$ 533 and \$ 341 as of March 31, 2022, and December 31, 2021, respectively.

## Accounts Receivable and Allowance for Doubtful Accounts

Account receivables are recorded at the invoiced amount, net of an allowance for doubtful accounts. The Company performs on-going credit evaluations of its customers and adjusts credit limits based upon payment history and the customer's current credit worthiness, as determined by the review of their current credit information; and determines the allowance for doubtful accounts based on historical write-off experience, customer specific facts and general economic conditions that may affect a client's ability to pay.

Account balances are charged off against the allowance after all means of collection have been exhausted and the potential for recovery is considered remote. The Company determines when receivables are past due, or delinquent based on how recently payments have been received.

The Company has net \$ 8,820 and \$ 11,340 in accounts receivable, and another receivable, on March 31, 2022, and December 31, 2021, respectively.

## Property and Equipment

Property and equipment will be recorded at cost when the case may be. Expenditures for major additions and betterments will be capitalized when it applies.

Maintenance and repairs will be charged to operations as incurred. Depreciation of property and equipment will be computed by the straight-line method (after considering their respective estimated residual values) over the estimated useful lives of the respective assets as follows:

Fixed Asset	Estimated Useful Life (Years)
Building	39
Improvements	5
Furniture and office equipment	7
Computer Equipment	7
Vehicles	5

Upon the sale or retirement of property and equipment, the related cost and accumulated depreciation will be removed from the accounts and any gain or loss will be reflected in statements of operations. During the three-months ended March 31, 2022, and the twelve months ended December 31, 2021 respectively, the Company purchase equipment, resulting in net (net of \$4,125 and \$2,662 depreciation as March 31, 2022 and December 31, 2021 respectively) fixed assets of \$ 33,007 and \$ 34,470.

### Beneficial Conversion Feature

If the conversion features of conventional convertible debt provide for a rate of conversion that is below market value at issuance, this feature will be characterized as a beneficial conversion feature (“BCF”). A BCF will be recorded by the Company as a debt discount pursuant to ASC 470-20 *Debt with Conversion and Other Options*. In those circumstances, the convertible debt will be recorded net of the discount related to the BCF, and the Company will amortize the discount to interest expense over the life of the debt using the effective interest method.

### Embedded Conversion Features

The Company evaluates embedded conversion features within convertible debt under ASC 815 Derivatives and Hedging to determine whether the embedded conversion feature(s) should be bifurcated from the host instrument and accounted for as a derivative at fair value with changes in fair value recorded in earnings. If the conversion feature does not require derivative treatment under ASC 815, the instrument will be evaluated under ASC 470-20 Debt with Conversion and Other Options for consideration of any beneficial conversion features.

### Derivative Financial Instruments

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value for accounting purposes. In determining the appropriate fair value, the Company will use the Black-Scholes option-pricing model, when applicable. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and, further, if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Once determined, derivative liabilities will be adjusted to reflect fair value at each reporting period end, with any increase or decrease in the fair value being recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, will be also valued using the Black Scholes option-pricing model.

## Fair Value of Financial Instruments

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, based on our principal or, in the absence of a principal, most advantageous market for the specific asset or liability.

GAAP provides for a three-level hierarchy of inputs to valuation techniques used to measure fair value, defined as follows:

Level 1: Inputs that are quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity can access.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the asset or liability, including:

- quoted prices for similar assets or liabilities in active markets.
- quoted prices for identical or similar assets or liabilities in markets that are not active.
- inputs other than quoted prices that are observable for the asset or liability; and
- inputs that are derived principally from or corroborated by observable market data by correlation or other means.

Level 3: Inputs that are unobservable and reflect management's own assumptions about the inputs market participants would use in pricing the asset or liability based on the best information available in the circumstances (e.g., internally derived assumptions surrounding the timing and amount of expected cash flows).

Items recorded or measured at fair value on a recurring basis in the accompanying consolidated financial statements consisted of the following items as of March 31, 2022, and December 31, 2021:

	<u>Level 1</u>	<u>Level 2</u>	<u>Level 3</u>	<u>Total</u>
Derivative Liability				
December 31, 2020	\$ -	\$ -	\$ -	\$ -
December 31, 2021			\$ -	\$ -

## Revenue Recognition

Effective January 1, 2018, the Company adopted the Financial Accounting Standards Board ("FASB") standard update ASU 2014-09, "Revenue from Contracts with Customers," ("Topic 606") which provides a principles-based, five-step approach to measure and recognize revenue from contracts with customers. Revenue is recognized when the following criteria are met:

- Identification of the contract, or contracts, with a customer;
- Identification of the performance obligations in the contract;
- Determination of the transaction price;
- Allocation of the transaction price to the performance obligations in the contract; and
- Recognition of revenue when, or as, we satisfy performance obligation.

The adoption of this guidance did not have a material impact on the Company's consolidated statements of operations, cash flows, shareholders' equity (deficit), or balance sheets as of the adoption date.

The Company does generate revenues during the three-months ended March 31, 2022. Revenues generated during the three-months ended March 31, 2022, and the twelve-months ended on December 31, 2021, totaled \$ 8,820 and \$ 53,680 respectively, and were included in net loss from continued operations in the accompanying statements of operations.

We periodically review for any expected period of substantial involvement under the agreements that provide for non-refundable up-front payments and fees. If applicable, we will adjust the amortization periods when appropriate to reflect changes in assumptions relating to the duration of our expected involvement.

## Income Taxes

Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Additionally, the recognition of future tax benefits, such as net operating loss carryforwards, is required to the extent that realization of such benefits is more likely than not. Deferred tax assets and liabilities are determined using enacted tax rates expected to apply to taxable income in the years in which the assets and liabilities are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income tax expense in the period that includes the enactment date.

In the event the future tax consequences of differences between the financial reporting bases and the tax bases of the Company's assets and liabilities result in deferred tax assets, an evaluation of the probability of being able to realize the future benefits indicated by such asset is required. A valuation allowance is provided for the portion of the deferred tax asset when it is more likely than not that some or all of the deferred tax asset will not be realized. In assessing the realizability of the deferred tax assets, management considers the scheduled reversals of deferred tax liabilities, projected future taxable income, and tax planning strategies.

The Company files income tax returns in Maryland, which are subject to examination by the tax authorities in these jurisdictions. Generally, the statute of limitations related to the Company's federal and state income tax return is three years. The state impact of any federal changes for prior years remains subject to examination for a period up to five years after formal notification to the states.

Management has evaluated tax positions in accordance with ASC 740, *Income Taxes*, and has not identified any significant tax positions, other than those disclosed. All the Company's tax years since inception remain subject to examination by Federal and State jurisdictions.

Management is committed to submit the tax returns for the periods ended on December 31, 2019, 2020 and 2021 within the next weeks after filing the Annual Disclosure Statement Pursuant to the Pink Basic Disclosure Guidelines

## Earnings Per Share

Basic net income per common share ("*Basic EPS*") excludes dilution and is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted net income per common share ("*Diluted EPS*") reflects the potential dilution that could occur if stock options or other contracts to issue shares of common stock were exercised or converted into common stock. The computation of Diluted EPS does not assume exercise or conversion of securities that would have an anti-dilutive effect on net income per common share.
