NOTE 1 - ORGANIZATION AND OPERATIONS

Go Green Global Technologies Corp. (OTC Pink: GOGR) is a Nevada corporation originally incorporated in February 2006 under the name Photomatica, Inc.

Go Green Global Technologies Corp. is an innovative publicly traded U.S. company that provides proprietary disruptive technology for use in the water and fuel industries of both commercial and consumer segments of these markets. Solutions are provided worldwide utilizing the proprietary Sonical™ process for both non-chemical water treatment and fuel combustion applications which including industrial, automotive, transportation, maritime and railway industries. The company is a pioneer and leader in the emerging Pulsed Power technology sector. Since inception, the company has focused on technologies that lead to a cleaner and more efficient planet.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements are prepared in accordance with accounting principles generallyaccepted in the United States of America, and include Go Green Global Technologies Corp., and its wholly owned subsidiary Go Green Technologies Corp. Certain balances have been reclassified to conform with the current year's presentation.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

For purposes of the statements of cash flows, cash equivalents include all highly liquid investments with original maturities of three months or less which are not securing any corporate obligations. The Company maintains its cash in bank deposit accounts, which, at times, may exceed federally insured limits. The Company has not experienced any losses in such accounts.

Accounts Receivable

Accounts receivable are stated at the amount management expects to collect from outstanding balances. Accounts receivable as of March 31, 2022 and December 31, 2021 are $-0- and $-0- respectively.

Allowance for Doubtful Accounts

Management assesses the collectability of accounts receivable on a quarterly basis. At March 31, 2022 and December 31, 2021, there was no allowance for doubtful accounts.

Inventory

Inventory is stated at the lower of cost, determined using the first-in, first-out ("FIFO") method, or market. Inventory includes the cost of packaging materials. Obsolete or unsalable inventory is reflected at its estimated realizable value.

Shipping and Handling Costs

All amounts billed to customers relating to shipping and handling are classified as revenue. Shipping and handling costs incurred by the Company are classified as costs of goods sold.

Prepaid Expenses

Prepaid expenses consist primarily of short-term prepaid expenditures or deposits that will be amortized within one year.

Advertising Costs

Advertising and promotion costs are expensed as incurred.

Revenue Recognition

Revenue from the sale of by the Company is recognized upon shipment to the customer, when the transfer of legal title, which is defined and generally accepted in the standard terms, and conditions, arises between the Company and the customer. Costs and related expenses are recorded as cost of sales when the related revenue is recognized. Revenue is recorded net of any applicable sales tax.

Income Taxes

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. A valuation allowance is provided for deferred tax assets if it is more likely than not these items will either expire before the Company is able to realize their benefits, or that future deductibility is uncertain.

The Company also follows the guidance related to accounting for income tax uncertainties. In accounting for uncertainty in income taxes, the Company recognizes the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit. For tax positions meeting the more likely than not threshold, the amount recognized in the financial statements is the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement with the relevant tax authority. No liability for unrecognized tax benefits was recorded as of December 31, 2020 and 2019.

Stock-Based Compensation

The Company records stock-based compensation at fair value as of the date of grant and recognizes the corresponding expense over the requisite service period (usually the vesting period), utilizing the Black-Scholes option-pricing model. The volatility component of the calculation is based on the historic volatility of the Company's stock or the expected future volatility. The expected life assumption is primarily based on historical exercise patterns and employee post-vesting termination behavior. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

Net Profit per Common Share

Basic earnings per share are calculated by dividing income available to common stockholders by the weighted average number of common shares outstanding. Diluted earnings per share are based on the assumption that all dilutive convertible shares and stock options and warrants were converted or exercised. Dilution is computed by applying the treasury stock method. Under this method, warrants and options are assumed to be exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase common stock at the average market price during the period.

Related Party Transactions

Parties are considered to be related to the Company if the parties that, directly or indirectly, through one or more intermediaries, control, are controlled by, or are under common control with the Company. Related parties also include principal owners of the Company, its management, members of the immediate families of principal owners of the Company and its management and other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. The Company discloses all related party transactions. All transactions shall be recorded at fair value of the goods or services exchanged. Property purchased from a related party is recorded at the cost to the related party and any payment to or on behalf of the related party in excess of the cost is reflected as a distribution to the related party.

The Company considers all officers, directors, senior management personnel, and senior level consultants to be related parties to the Company.

Derivative Liabilities

The Company assessed the classification of its derivative financial instruments as of March 31, 2022, which consist of convertible instruments and rights to shares of the Company's common stock and determined that such derivatives meet the criteria for liability classification under ASC 815.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free-standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument subject to the requirements of ASC 815. ASC 815 also provides an exception to this rule when the host instrument is deemed to be conventional, as described.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with professional standards for "Accounting for Derivative Instruments and Hedging Activities".

Professional standards generally provide three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free-standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as "The Meaning of "Conventional Convertible Debt Instrument".

The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with professional standards when "Accounting for Convertible Securities with Beneficial Conversion Features," as those professional standards pertain to "Certain Convertible Instruments." Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event is not within the entity's control or could require net cash settlement, then the contract shall be classified as an asset or a liability.

Recently Adopted Accounting Pronouncements

The Company has implemented all new accounting pronouncements that are in effect and that may impact its financial statements and does not believe that there are any other new pronouncements that have been issued that might have a material impact on its financial position or results of operations.

NOTE 3 – PROPERTY AND EQUIPMENT

Property and equipment are recorded at cost and is depreciated using the straight-line method over the estimated useful lives of the assets as follows:

Asset	***Estimated Useful Lives***
Leasehold Improvements	2 Years
Machinery and Equipment	10 Years
Office Equipment	3 – 10 Years
Vehicles	5 Years

Note 3 – Property and Equipment (Cont.)

Expenditures for repairs, maintenance and renewals are charged to expense as incurred. Expenditures which improve an asset or extend its estimated useful life are capitalized and depreciated over the assets remaining useful life. When properties are retired or otherwise disposed of, the related cost and accumulated depreciation are removed from the accounts and any gain or loss is included income.

NOTE4 – EQUITY

    b. Exercise Price of the Warrant is twenty cents ($0.20) per share.
    c. No. of shares and Exercise Price are subject to adjustment as provided in Warrants and associated documentation

NOTE 7 – FAIR VALUE OF FINANCIAL INSTRUMENTS

ASC 825-10 defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required or permitted to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact and considers assumptions that market participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance. ASC 825-10 establishes a fair value hierarchy that requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 825-10 establishes three levels of inputs that may be used to measure fair value:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which all significant inputs are observable or can be derived principally from or corroborated by observable market data for substantially the full term of the assets or liabilities.

Level 3 - Unobservable inputs to the valuation methodology that are significant to the measurement of fair value of assets or liabilities.

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, for disclosure purposes, the level in the fair value hierarchy within which the fair value measurement is disclosed is determined based on the lowest level input that is significant to the fair value measurement.

Items recorded or measured at fair value on a recurring basis in the accompanying consolidated financial statements consisted of the following items as of March 31, 2022 and December 31, 2021:

	March 31, 2022	Fair Value Measurements at March 31, 2022 using: Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:				
Derivative Liabilities	$ 249,725	-	-	$ 249,725

	December 31, 2021	Fair Value Measurements at December 31, 2021 using: Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Liabilities:				
Derivative Liabilities	$ 35,862	-	-	$ 35,862

The debt and warrant derivative liabilities are measured at fair value using quoted market prices and estimated volatility factors based on historical prices for the Company's common stock and are classified within Level 3 of the valuation hierarchy.

The following table provides a summary of changes in fair value of the Company's Level 3 financial liabilities as of March 31, 2022:

	Derivative Liability
Balance, December 31, 2021	$ 35,862
Additions	433,998
Change in fair value of derivative liabilities	(220,135)
Balance, March 31, 2022	$ 249,725

The significant additions in Q1-2022 were due to recognition of Warrants past and present.

NOTE 8 – LOANS RECEIVABLE

From time to time, the Company has made short-term loans to several shareholders and former members of management. As of March 31, 2022 and December 31, 2021, the balances were $86,764 and $86,764, respectively.

NOTE 9 – CONCENTRATION OF CREDIT RISK

With no sales in the quarter and year ended March 31, 2022 and December 31, 2021, respectively, none of Go Green's customers accounted for more than 10% of sales. Go Green's customer concentration will subside as sales and the customer base grows going forward. There are currently no accounts receivable due.

NOTE 10 – ACCOUNTS PAYABLE

As of March 31, 2022, the Company has $748,241 in outstanding accounts payable.

A large portion of this balance is related to the outstanding balance due to Water Treatment Systems LLC ("WTS") for the initial acquisition of Intellectual Property associated with the Sonical™ product line. WTS is a United States based partnership that originally owned the intellectual property of Mario Pandolfo associated with the Sonical™ product line.

WTS is owned by multiple shareholders and a former board member. See "**Footnote 11 - *Related Party Transactions***" for more on the relationship with WTS.

Liquidity and Capital Resources

Liquidity is the ability of a company to generate funds to support its current and future operations, satisfy its obligations, and otherwise operate on an ongoing basis. Significant factors in the management of liquidity are funds generated by operations, levels of accounts receivable and accounts payable and capital expenditures.

To date we have financed our operations through sales of common stock and the issuance of debt.

The continuation of the Company as a going concern is dependent upon the continued financial support from its management, and its ability to identify future investment opportunities and obtain the necessary debt or equity financing and generating profitable operations from the Company's future operations. The Company does not have sufficient cash on hand and as such will continue to raise capital through the sale of stock and notes.

Working Capital

	March 31, 2022	**December 31, 2021**	**Percentage Increase (Decrease)**
Current Assets	$ 308,475	$ 176,104	75.2 %
