NOTE 1 NATURE OF OPERATIONS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Novation Holdings, Inc., formerly Allezoe Medical Holdings, Inc., and formerly Stanford Management, Ltd., was incorporated under the laws of the State of Delaware on September 24, 2008. Effective October 25, 2012, the Company amended its Articles of Incorporation to change its name to Novation Holdings, Inc and changed its place of incorporation from Delaware to Florida. The Company was originally organized for the purpose of acquiring and developing mineral properties. On February 18, 2011, all of the mineral properties and related development and exploration activities were disposed of as part of a series of transactions resulting in the Company moving into the medical technology industry.

On February 18, 2011, the Company acquired all the outstanding shares of Organ Transport Systems, Inc. (“OTS”), a Nevada corporation, and simultaneously disposed of the assets relating to its former activities in mining exploration, along with all related liabilities. Consequently, OTS was considered to be the surviving entity with the Company intending to include only the financial results of OTS in its financial statements. Effective March 19, 2012 the Company agreed to rescind the acquisition of Organ Transport Systems, Inc. The net effect of the rescission transaction was to remove OTS as a subsidiary of the Company. Since this time, the Company was a public shell company seeking to create value for its shareholders by merging with another entity with experienced management and opportunities for growth. On January 25, 2022, the Company acquired CraftClouds, a next-gen non-fungible token (“NFT”) platform and ecosystem, whereby it acquired 100% of the outstanding membership interests in CraftClouds in exchange for 500,000,000 shares of the Company’s common stock.

Risks and Uncertainties

The Company operates in an industry that is subject to rapid technological change. The Company's operations will be subject to significant risk and uncertainties including financial, operational, technological, regulatory and other risks associated with a development stage company, including the potential risk of business failure.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. A significant estimate as of November 30, 2021 included a 100% valuation allowance for deferred tax assets arising from net operating losses incurred since inception and also calculations of derivative liability.

Making estimates requires management to exercise significant judgment. It is at least reasonably possible that the estimate of the effect of a condition, situation or set of circumstances that existed at the date of the financial statements, which management considered in formulating its estimate could change in the near term due to one or more future confirming events. Accordingly, the actual results could differ materially from estimates.

Cash and Cash Equivalents - The Company considers all highly liquid instruments with original maturities of three months or less when acquired, to be cash equivalents. The Company had no cash equivalents at August 31, 2021 and February 28, 2022.

Income Taxes – The Company complies with the accounting and reporting requirements of US GAAP in accounting for income taxes. The Company uses the asset and liability approach to financial reporting for income taxes. Deferred income tax assets and liabilities are computed for differences between the financial statement and tax basis of assets and liabilities that will result in future taxable or deductible amounts and are based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred income tax assets to the amount expected to be realized.

The Company also complies with US GAAP in accounting for uncertain tax positions. A tax benefit from an uncertain position may be recognized only if it is “more likely than not” that the position is sustainable based on its technical merits. Based on its analysis, the Company has determined that it has not incurred any liability for unrecognized tax benefits as of November 30, 2021. However, the

Company's conclusions may be subject to review and adjustment at a later date based on factors including, but not limited to, on-going analyses of and changes to tax laws, regulations and interpretations thereof. The Company recognizes interest and penalties related to unrecognized tax benefits in interest expense and other expenses, respectively. No interest expense or penalties have been recognized as of and for the six months ended February 28, 2022 and 2021.

Net Loss Per Share – The Company complies with the accounting and reporting requirements of US GAAP in reporting its earnings per share. Net loss per share is computed based on the weighted average number of common shares outstanding.

Basic (loss) per share excludes dilution and is computed by dividing (loss) available to common stockholders by the weighted average common shares outstanding for the year. Diluted loss per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the entity. For the six months ended February 28, 2022 and 2021 there were no options, warrants or derivative securities outstanding. Therefore, basic and diluted loss per share were the same for the six months ended February 28, 2022.

Fair Value of Financial Instruments - The fair value of the Company's assets and liabilities, which qualify as financial instruments under US GAAP, approximate the carrying amounts presented in the consolidated balance sheets.

Use of Estimates and Assumptions - The preparation of financial statements in accordance with US GAAP requires the Company's management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of expenses during the reporting period. Actual results can, and in many cases will, differ from those estimates.

Fair value of financial instruments - The Company measures its financial and non-financial assets and liabilities, as well as makes related disclosures, in accordance with FASB Accounting Standards Codification No. 820, Fair Value Measurement ("ASC 820"), which provides guidance with respect to valuation techniques to be utilized in the determination of fair value of assets and liabilities. Approaches include, (i) the market approach (comparable market prices), (ii) the income approach (present value of future income or cash flow), and (iii) the cost approach (cost to replace the service capacity of an asset or replacement cost). ASC 820 utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices that are observable, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions, such as valuations derived from valuation techniques in which one more significant inputs or significant value drivers are unobservable.

Our financial instruments include cash, inventories, prepayment and deposits, accounts payable, accrued liabilities, accrued interest payable, accrued compensation, convertible note payable, loans payable, derivative liabilities and billing in excess of costs and estimated earnings.

The carrying values of the Company's accounts payable, accrued liabilities, accrued interest payable, accrued compensation, convertible note payable, short-term loans payable, derivative liabilities and billing in excess of costs and estimated earnings approximate their fair value due to their short-term nature.

Convertible notes payable - The Company accounts for convertible notes payable in accordance with the FASB Accounting Standards Codification No. 815, Derivatives and Hedging, since the conversion feature is not indexed to the Company's stock and can't be classified in equity. The Company allocates the proceeds received from convertible notes payable between the liability component and conversion feature component. The conversion feature that is considered embedded derivative liabilities has been recorded at their fair value as its fair value can be separated from the convertible note and its conversion is independent of the underlying note value. The Company has also recorded the resulting discount on debt related to the conversion feature and is amortizing the discount using the effective interest rate method over the life of the debt instruments.

Going Concern – These financial statements have been prepared assuming that the Company will continue as a going concern, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future. As

reflected in the accompanying financials, the Company had a Net Income of \$3,567,153 and an accumulated deficit of \$21,926,186 for the six months ended February 28, 2022. Although management believes that it will be able to successfully execute a Business Combination, which includes third party financing and the raising of capital to meet the Company's future liquidity needs, there can be no assurances in this regard. These matters raise substantial doubt about the Company's ability to continue as a going concern.

Recently Issued Accounting Pronouncements - From time to time, new accounting pronouncements are issued by the Financial Accounting Standard Board ("FASB") or other standard setting bodies that are adopted by the Company as of the specified effective date. Unless otherwise discussed, the Company believes that the effect of recently issued standards that are not yet effective will not have a material effect on its consolidated financial position or results of operations upon adoption.

In August 2018, the FASB issued ASU No. 2018-13, "Fair Value Measurement (Topic 820)." This standard modifies disclosure requirements related to fair value measurement and is effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after August 15, 2019. Early adoption is permitted. Implementation on a prospective or retrospective basis varies by specific disclosure requirement. The standard also allows for early adoption of any removed or modified disclosures upon issuance while delaying adoption of the additional disclosures until their effective date. The Company adopted ASU No. 2018-13 effective on January 1, 2020 and it did not have a material impact on the Company's consolidated financial statements.

In August 2019, the FASB issued ASU No. 2019-12, "Simplifying the Accounting for Income Taxes (Topic 740)". This standard simplifies the accounting for income taxes. This standard is effective for fiscal years beginning after August 15, 2020, including interim periods within those fiscal years. Early adoption is permitted for all entities. The Company is currently assessing the impact of adopting this standard on its consolidated financial statements.

In August 2020, the FASB issued ASU 2020-06, "Debt – Debt with Conversion and Other Options (Subtopic 470-20) and Derivatives and Hedging – Contracts in Entity's Own Equity (Subtopic 815 – 40)" ("ASU 2020-06"). ASU 2020-06 simplifies the accounting for certain financial instruments with characteristics of liabilities and equity, including convertible instruments and contracts on an entity's own equity. The ASU is part of the FASB's simplification initiative, which aims to reduce unnecessary complexity in U.S. GAAP. The ASU's amendments are effective for fiscal years beginning after August 15, 2023, and interim periods within those fiscal years. The Company is currently evaluating the impact of ASU 2020-06 on its financial statements.
