MC Endeavors, Inc.

Notes to Consolidated Financial Statements (Prepared by Management)

NOTE 1 – ORGANIZATION AND BUSINESS

Organization and Operations

MC Endeavors, Inc. (the "Company") was incorporated in the State of Nevada on May 22, 2001, Eclipse Liquids, LLC ("Eclipse"), its formally wholly owned subsidiary, was incorporated in California on January 1, 2017, CBD Liquid Labs was formed January 1, 2018 as a division of Eclipse.

On August 27, 2019, the Company entered into the share exchange agreement by and between the Company and Eclipse Liquids, LLC, a California corporation ("Eclipse"), which agreement provides for the purchase of 51% of the equity by the Company. The purchase price for 51% of Eclipse shares is 10 million Series A preferred shares with conversion rights to 100 million common shares of the Company.

On February 5, 2020, the Company entered into the share exchange agreement by and between the Company and Eclipse Liquids, LLC, a California corporation ("Eclipse"), which agreement provides for the purchase of the remaining 49% of the equity by the Company. The purchase price for 49% of Eclipse shares is 10 million Series A preferred shares with conversion rights to 100 million common shares of the Company.

On March 8, 2022, MC Endeavors, Inc., the Nevada Corporation was sold to YG Yoyo, LLC. as an entity without any of its subsidiaries or assets. Following the sale, Eclipse Liquids, LLC ("Eclipse"), the formerly wholly owned subsidiary of the Company and CBD Liquid Labs were stripped from the Company.

Going Concern Matters

The accompanying unaudited consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"), which contemplates the Company's continuation as a going concern. The Company has incurred zero operating income (loss) as of March 31, 2022.

Management intends to raise additional operating funds through equity and/or debt offerings. However, there can be no assurance management will be successful in its endeavors.

There are no assurances that the Company will be able to either (1) achieve a level of revenues adequate to generate sufficient cash flow from operations; or (2) obtain additional financing through either private placement, public offerings and/or bank financing necessary to support its working capital requirements. To the extent that funds generated from operations and any private placements, public offerings and/or bank financing are insufficient, the Company will have to raise additional working capital. No assurance can be given that additional financing will be available, or if available, will

be on terms acceptable to the Company. If adequate working capital is not available to the Company, it may be required to curtail or cease its operations. Due to uncertainties related to these matters, there exists a substantial doubt about the ability of the Company to continue as a going concern. The accompanying unaudited consolidated financial statements do not include any adjustments related to the recoverability or classification of asset-carrying amounts or the amounts and classification of liabilities that may result should the Company be unable to continue as a going concern.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The consolidated financial statements and related disclosures have been prepared by management and are unaudited. The unaudited consolidated financial statements have been prepared using the accrual basis of accounting in accordance with Generally Accepted Accounting Principles ("GAAP") of the United States..

Consolidation Policy

For March 31, 2022, the unaudited consolidated financial statements of the Company include the accounts of the Company without the formally fully owned subsidiary, Eclipse Liquids, LLC and its CBD Liquid Labs division. All significant intercompany balances and transactions have been eliminated in consolidation.

Use of Estimates

The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates include assumptions about collection of accounts and notes receivable, the valuation and recognition of stock-based compensation expense, the valuation and recognition of derivative liability, valuation allowance for deferred tax assets and useful life of fixed assets.

Cash and cash equivalents

Cash equivalents are short-term highly liquid investments that are readily convertible to cash with original maturities of three months or less, at the date acquired. As of March 31, 2022, and March 31, 2021, the Company had \$0.00 and \$79,478 in cash and cash equivalents, respectively.

Inventory

Inventories are valued at the lower of cost (determined on a weighted average basis) or market. Management compares the cost of inventories with the market value and allowance is made to write down inventories to market value, if lower.

Goodwill

We allocate goodwill to reporting units based on the reporting unit expected to benefit from the business combination. We evaluate our reporting units on an annual basis and, if necessary, reassign goodwill using a

relative fair value allocation approach. Goodwill is tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. These events or circumstances could include a significant change in the business climate, legal factors, operating performance indicators, competition, or sale or disposition of a significant portion of a reporting unit.

Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit. The fair value of each reporting unit is estimated primarily through the use of a discounted cash flow methodology. This analysis requires significant judgments, including estimation of future cash flows, which is dependent on internal forecasts, estimation of the long-term rate of growth for our business, estimation of the useful life over which cash flows will occur, and determination of our weighted average cost of capital.

The estimates used to calculate the fair value of a reporting unit change from year to year based on operating results, market conditions, and other factors. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill impairment for each reporting unit.

Revenue recognition

Revenues are recognized when control of the promised goods or services are transferred to a customer, in an amount that reflects the consideration that the Company expects to receive in exchange for those goods or services. The Company derives its revenues from the rendering of business brand services, such as formulation development, graphic design and sourcing services in addition to the development and manufacturing of retail ready products. The Company applies the following five steps in order to determine the appropriate amount of revenue to be recognized as it fulfills its obligations under each of its agreements:

- identify the contract with a customer;
- identify the performance obligations in the contract;
- determine the transaction price;
- allocate the transaction price to performance obligations in the contract; and
- recognize revenue as the performance obligation is satisfied.

Share-Based Expense

ASC 718, "Compensation – Stock Compensation," prescribes accounting and reporting standards for all share based payment transactions in which employee services are acquired. Transactions include incurring liabilities, or issuing or offering to issue shares, options, and other equity instruments such as employee stock ownership plans and stock appreciation rights. Share-based payments to employees, including grants of employee stock options, are recognized as compensation expenses in the financial statements based on their fair values. That expense is recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period).

The Company accounts for stock-based compensation issued to non-employees and consultants in accordance with the provisions of ASC 505-50, "Equity – Based Payments to Non-Employees." Measurement of share-based payment transactions with non-employees is based on the fair value of whichever is more reliably measurable: the goods or services received; or (b) the equity instruments issued. The fair value of the share-based payment transaction is determined at the earlier of performance commitment date or performance completion date. Share-based expenses totaled \$0, for the years ending March 31, 2022 and 2021, respectively.

Loss per Share Calculations

Basic earnings (loss) per share is computed by dividing income available to common shareholders by the weighted-average number of common shares available. Diluted earnings per share is computed similar to basic earnings (loss) per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Diluted EPS excludes all dilutive potential common shares if their effect is antidilutive. During the three months ended March 31, 2022, there were conversion privileges attached to convertible promissory notes payable. The common share equivalents of these securities have not been included in the calculations of loss per share because such inclusions would have an anti-dilutive effect as the Company has incurred zero income (losses) during the three months ended March 31, 2022.

Fair Value of Financial Instruments

As defined in ASC 820" Fair Value Measurements," fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The Company utilizes market data or assumptions that market participants would use in pricing the asset or liability, including assumptions about risk and the risks inherent in the inputs to the valuation technique. These inputs can be readily observable, market corroborated, or generally unobservable. The Company classifies fair value balances based on the observability of those inputs. ASC 820 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurement) and the lowest priority to unobservable inputs (level 3 measurement).

Lease

Effective January 1, 2019, we adopted ASC 842, Leases ("ASC 842"). Operating lease right-of-use ("ROU") assets represent our right to use an underlying asset for the lease term and lease liabilities represent our obligation to make lease payments arising from the lease, both of which are recognized based on the present value of the future minimum lease payments over the lease term at the commencement date. Leases with a lease term of 12 months or less at inception are not recorded on our consolidated balance sheet and are expensed on a straight-line basis over the lease term in our consolidated statement of income.

Recently Issued Accounting

Standards Management has considered all recent accounting pronouncements issued since the last audit of our financial statements. The Company's management believes that these recent pronouncements will not have a material effect on the Company's financial statements.

Fixed asset expenditures are recorded at cost. Costs which extend the useful lives or increase the productivity of the assets are capitalized, while normal repairs and maintenance that do not extend the useful life or increase the productivity of the asset are expensed as incurred. Equipment is depreciated on the straight-line method over the estimated useful lives of the assets. Machinery, equipment and vehicles are depreciated on a straight-line basis over 10 years and furnishings are depreciated on a straight-line basis over 5 years.

NOTE 4. STOCKHOLDERS' DEFICIT
