GREEN LEAF INNOVATIONS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Three Months Ended March 31, 2022 and 2021

1. Organization and Basis of Presentation

Organization and Combination

Green Leaf Innovations, Inc. (the Company) was originally incorporated in the State of Delaware in August 1993 as T. J. Cinnamons, Inc. T.J. Cinnamons, Inc. changed its name to Paramark Enterprises, Inc. in August 1996. In November 2001, the Company changed its name to Raptor Investments, Inc. The Company was reincorporated in the State of Florida on December 1, 2001. In July 2005, the Company changed its name to Snap 'N' Sold Corp. In August 2006, the Company changed its name to Hot Web, Inc. In July 2009, the Company changed its name to Gold Coast Mining Corporation. In March 2015, the Company changed its name to Green Leaf Innovations, Inc.

Basis of Presentation

The Financial Statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and the rules and regulations of OTC Markets, Inc. ("OTC").

Business Operations

The Company is a development stage company targeting acquisition opportunities with recurring revenue streams to maximize shareholder value.

Going Concern

The Company's financial statements have been presented on the basis that the Company is a going concern, which contemplates the realization of assets and satisfaction of liabilities in the normal course of business. As reflected in the accompanying financial statements, the Company has no assets on hand, has had no operating revenues, and has had no operating cash flows. During the three months ended March 31, 2022 and 2021 the Company had no operations and had an accumulated deficit of \$18,210,210 as of March 31, 2022.

As a result, management has concluded that there is substantial doubt about the Company's ability to continue as a going concern within one year of the date that the accompanying financial statements are issued. The ability of the Company to continue as a going concern is dependent upon the Company's ability to raise additional funds and implement its business plan, and to ultimately achieve sustainable operating revenues and profitability. The accompanying financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

If cash resources are insufficient to satisfy the Company's ongoing cash requirements, the Company would be required to obtain funds, if available, although there can be no certainty, from its shareholders or officers.

2. Summary of Significant Accounting Policies

Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of expenses during the reporting period. Management bases its estimates on historical experience and on various assumptions that are believed to be reasonable in relation to the financial statements taken as a whole under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Management regularly evaluates the key factors and assumptions used to develop the estimates utilizing currently available information, changes in facts and circumstances, historical experience and reasonable assumptions. After such evaluations, if deemed appropriate, those estimates are adjusted accordingly. Actual results could differ from those estimates. Significant estimates are expected to include those related to assumptions used in calculating accruals for potential liabilities, valuing equity instruments issued for services, and the realization of deferred tax assets.

Concentration of Risk

The Company may periodically contract with consultants and vendors to provide services related to the Company's business development activities. Agreements for these services may be for a specific time period or for a specific project or task. The Company did not have any agreements at March 31, 2022 or December 31, 2021.

Income Taxes

The Company accounts for income taxes under an asset and liability approach for financial accounting and reporting for income taxes. Accordingly, the Company recognizes deferred tax assets and liabilities for the expected impact of differences between the financial statements and the tax basis of assets and liabilities.

The Company records a valuation allowance to reduce its deferred tax assets to the amount that is more likely than not to be realized. In the event the Company was to determine that it would be able to realize its deferred tax assets in the future in excess of its recorded amount, an adjustment to the deferred tax assets would be credited to operations in the period such determination was made. Alternatively, should the Company determine that it would not be able to realize all or part of its deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to operations in the period such determination was made.

The Company is subject to U.S. federal income taxes and income taxes of the State of Florida. The Company's operations during the years ended December 31, 2021 and 2020 were nominal.

As the Company's net operating losses in the respective jurisdictions in which it operates have yet to be utilized, all previous tax years remain open to examination by the taxing authorities in which the Company currently operates. The Company had no unrecognized tax benefits as of December 31, 2021 and 2020 and does not anticipate any material amount of unrecognized tax benefits within the next 3 months.

The Company accounts for uncertainties in income tax law under a comprehensive model for the financial statement recognition, measurement, presentation and disclosure of uncertain tax positions taken or expected to be taken in income tax returns as prescribed by GAAP. The tax effects of a position are recognized only if it is "more-likely-than-not" to be sustained by the taxing authority as of the reporting date. If the tax position is not considered "more-likely-than-not" to be sustained, then no benefits of the position are recognized. As of December 31, 2021 and 2020, the Company had not recorded any liability for uncertain tax positions. In subsequent periods, any interest and penalties related to uncertain tax positions will be recognized as a component of income tax expense.

Stock-Based Compensation

The Company issues common stock and intends to issue stock options to officers, directors and consultants for services rendered. Options will vest and expire according to terms established at the issuance date of each grant. Stock grants, which are generally time vested, will be measured at the grant date fair value and charged to operations ratably over the vesting period.

The fair value of stock options granted as stock-based compensation will be determined utilizing the Black-Scholes option-pricing model, and can be affected by several variables, the most significant of which are the life of the equity award, the exercise price of the

stock option as compared to the fair market value of the common stock on the grant date, and the estimated volatility of the common stock. Estimated volatility will be based on the historical volatility of the Company's common stock over an appropriate calculation period, or, if not available, by reference to the volatility of a representative sample of comparable public companies. The risk-free interest rate will be based on the U.S. Treasury yield curve in effect at the time of grant. The fair market value of the common stock will be determined by reference to the quoted market price of the Company's common stock on the grant date, or, if not available, by reference to an appropriate alternative valuation methodology.

The Company will recognize the fair value of stock-based compensation awards in general and administrative costs or in software development costs, as appropriate, in the Company's consolidated statements of operations. The Company will issue new shares of common stock to satisfy stock option exercises.

As of March 31, 2022, the Company did not have any outstanding stock options.

Earnings (Loss) Per Share

The Company's computation of earnings (loss) per share ("EPS") includes basic and diluted EPS. Basic EPS is measured as the income (loss) attributable to common stockholders divided by the weighted average common shares outstanding for the period. Diluted EPS is similar to basic EPS but presents the dilutive effect on a per share basis of potential common shares (e.g., convertible notes payable, convertible preferred stock, warrants and stock options) as if they had been converted at the beginning of the periods presented, or issuance date, if later. Potential common shares that have an anti-dilutive effect (i.e., those that increase income per share or decrease loss per share) are excluded from the calculation of diluted EPS.

Loss per common share is computed by dividing net loss by the weighted average number of shares of common stock outstanding during the respective periods. Basic and diluted loss per common share is the same for all periods presented because there is no convertible debt, convertible preferred stock, warrants or stock options outstanding.

Fair Value of Financial Instruments

The authoritative guidance with respect to fair value established a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three levels and requires that assets and liabilities carried at fair value be classified and disclosed in one of three categories, as presented below. Disclosure as to transfers in and out of Levels 1 and 2, and activity in Level 3 fair value measurements, is also required.

Level 1. Observable inputs such as quoted prices in active markets for an identical asset or liability that the Company has the ability to access as of the measurement date. Financial assets and liabilities utilizing Level 1 inputs include active-exchange traded securities and exchange-based derivatives.

Level 2. Inputs, other than quoted prices included within Level 1, which are directly observable for the asset or liability or indirectly observable through corroboration with observable market data. Financial assets and liabilities utilizing Level 2 inputs include fixed income securities, non-exchange-based derivatives, mutual funds, and fair-value hedges.

Level 3. Unobservable inputs in which there is little or no market data for the asset or liability which requires the reporting entity to develop its own assumptions. Financial assets and liabilities utilizing Level 3 inputs include infrequently-traded non-exchange-based derivatives and commingled investment funds and are measured using present value pricing models.

The Company will determine the level in the fair value hierarchy within which each fair value measurement falls in its entirety, based on the lowest level input that is significant to the fair value measurement in its entirety. In determining the appropriate levels, the Company will perform an analysis of the assets and liabilities at each reporting period end.

The carrying value of financial instruments (consisting of cash and accounts payable and accrued expenses) is considered to be representative of their respective fair values due to the short-term nature of those instruments.

Property and Equipment

Property and equipment is recorded at cost. Major improvements are capitalized, while maintenance and repairs that do not improve or extend the useful life of the respective assets are charged to expense as incurred. Gains and losses from disposition of property and

equipment are included in income and expense when realized. Depreciation of property and equipment is provided using the straight-line method over an estimated useful life of three years.

The Company recognizes depreciation of property and equipment in general and administrative costs in the Company's consolidated statement of operations.

Leases

Effective January 1, 2019, the Company adopted Accounting Standards Update 2016-02, Leases (Topic 842) ("ASU 2016-02"), which requires a lessee to record a right-of-use asset and a corresponding lease liability at the inception of the lease initially measured at the present value of the lease payments. ASU 2016-02 requires recognition in the statement of operations of a single lease cost that is calculated as a total cost of the lease allocated over the lease term, generally on a straight-line basis. The Company did not have any leases within the scope of ASU 2016-02 at December 31, 2020.

Recent Accounting Pronouncements

In June 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments ("ASU 2016-13"). ASU 2016-13 significantly changes how entities measure credit losses for most financial assets, including accounts and notes receivables. ASU 2016-13 will replace the current "incurred loss" approach with an "expected loss" model, under which companies will recognize allowances based on expected rather than incurred losses. Entities will apply the provisions of ASU 2016-13 as a cumulative-effect adjustment to retained earnings as of the beginning of the first reporting period in which ASU 2016-13 is effective. As small business filer, ASU 2016-13 will be effective for the Company for interim and annual reporting periods beginning after December 15, 2022. Management is currently in the process of assessing the impact of adopting ASU-2016-13 on the Company's financial statements and related disclosures.

Other recent accounting pronouncements issued by the FASB, including its Emerging Issues Task Force, and the American Institute of Certified Public Accountants, did not or are not believed by management to have a material impact on the Company's present or future financial statements and related disclosures.

3. Convertible notes payable

Notes payable consists of the following:

4. Derivative liability

The Company has issued convertible note agreements with a variable conversion feature that gives rise to an embedded derivative instrument (see Note 3). The derivative feature has been valued using a binomial lattice-based option valuation model using holding period assumptions developed from the Company's business plan and management assumptions and expected volatility from the Company's stock. Increases or decreases in the Company's share price, the volatility of the share price, changes in interest rates in general, and the passage of time will all impact the value of the derivative instrument. The Company re-values the derivative instrument at the end of each reporting period and any changes are reflected as changes in derivative liabilities in the consolidated statements of operations. The assumptions used during the three months ending March 31, 2022 are as follows:

	<u>March 31, 2022</u>
Market value of common stock on measurement date (1)	\$0.0008
Adjusted conversion price (2)	\$0.0003 – \$0.0008
Risk free interest rate (3)	3.5%
Life of the note in months	12 months
Expected volatility (4)	0.01% – 0.03%
Expected dividend yield (5)	—

- (1) The market value of common stock is based on closing market price as of initial valuation date and the period end re-measurement.
- (2) The adjusted conversion price is calculated based on conversion terms described in the note agreement.
- (3) The risk-free interest rate was determined by management using the 2-year Treasury Bill as of the respective Offering or measurement date.
- (4) The volatility factor was estimated by management using the historical volatilities of the Company's stock.
- (5) Management determined the dividend yield to be 0% based upon its expectation that it will not pay dividends for the foreseeable future.

The derivative liability related to these notes was \$552,726 and \$407,588 at March 31, 2022 and December 31, 2021, respectively. The Company recognized a (Loss) or Gain on the change in value of the derivative of \$(145,135) and \$109,504 during the three months ended March 31, 2022 and 2021, respectively.

5. Stockholders' Equity

Preferred Stock

The Company has authorized a total of 100,000,000 shares of preferred stock, \$0.01 value assigned. 41,000,000 shares of preferred shares are outstanding as of March 31, 2022 and December 31, 2021.

Common Stock

The Company is authorized to issue up to 6,500,000,000 shares of common stock, par value \$0.01 per share. As of March 31, 2022 and December 31, 2021, the Company had 3,598,867,086 shares of common stock issued and outstanding.

6. Commitments and Contingencies

Legal Contingencies

The Company has no known commitments and contingencies.

Impact of COVID-19 on the Company

The global outbreak of COVID-19 has led to severe disruptions in general economic activities, as businesses and governments have taken broad actions to mitigate this public health crisis. Although the Company has not experienced any significant disruption to its business to date, these conditions could significantly negatively impact the Company's business in the future.

The extent to which the COVID-19 outbreak ultimately impacts the Company's business, future revenues, results of operations and financial condition will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity and longevity, the actions to curtail the virus and treat its impact (including an effective vaccine), and how quickly and to what extent normal economic and operating conditions can resume. Even after the COVID-19 outbreak has subsided, the Company may be at risk of experiencing a significant impact to its business as a result of the global economic impact, including any economic downturn or recession that has occurred or may occur in the future.

Currently, capital markets have been disrupted by the crisis, as a result of which the availability, amount and type of financing available to the Company in the near future is uncertain and cannot be assured and is largely dependent upon evolving market conditions and other factors.

The Company intends to continue to monitor the situation and may adjust its current business plans as more information and guidance become available.

7. Subsequent Events

On May 23, 2022, the Company amended its articles of incorporation to reflect the following:

- Change in par value of its common stock from \$0.01 to \$0.00001
- Authorization of an increase in the number of common shares authorized to be issued from 6,500,000,000 to 20,000,000,000
- Authorization to issued up to 100,000,000 preferred stock series B with a par value of \$0.10
