Invent Ventures, Inc. Notes to Financial Statements

(Unaudited)

NOTE 1 - NATURE OF OPERATIONS AND REVERSE ACQUISITION TRANSACTION

(a) The Company.

Management intends on folding in select components of its existing financial technology ecosystem, including established and to be formed entities, along with their respective lines of business, into the Company. The intended result is for the Company to be the fully reporting survivor to the Aeon financial technology ecosystem, and its corresponding lines of business.

Further, Management intends on utilizing the Company as a vehicle for investing in and accelerating the growth of a select portfolio of groups of companies that are in synergistic sectors and industries.

NOTE 2 - BASIS OF PRESENTATION

(a) Statement of Compliance.

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") as issued by the Financial Accounting Standards Board ("FASB").

(b) Basis of Measurement

The Company's financial statements have been prepared on the historical cost basis.

(c) Use of Estimates.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from these estimates.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following summarize the more significant accounting and reporting policies and practices of the Company:

(a) Net income (loss) per share.

Basic loss per share is computed by dividing the net income (loss) by the weighted average number of common shares outstanding during the period.

(b) Property and equipment.

All property and equipment are recorded at cost and depreciated over their estimated useful lives, using the straight-line method. Upon sale or retirement, the cost and related accumulated depreciation are eliminated from their respective accounts, and the resulting gain or loss is included in the results of operations. Repairs and maintenance charges, which do not increase the useful lives of the assets, are charged to operations as incurred.

(c) Income Taxes.

Provisions for income taxes are based on taxes payable or refundable for the current year and deferred taxes on temporary differences between the amount of taxable income and pretax financial income, and between the tax bases of assets and liabilities and their reported amounts in the financial statements. Deferred tax assets and liabilities are included in the consolidated financial statements at currently enacted income tax rates applicable to the period in which the deferred tax assets and liabilities are expected to be realized or settled as prescribed in FASB ASC 740. As changes in tax laws or rates are enacted, deferred tax assets and liabilities are adjusted through the provision for income taxes.

Tax positions initially need to be recognized in the financial statements when it is more-likely-than-not the positions will be sustained upon examination by the tax authorities.

(d) Cash and equivalents.

For purposes of the statement of cash flows, the Company considers all highly liquid investments with maturity of three months or less when purchased to be cash equivalents.

(e) Financial Instruments.

Financial Accounting Standards Board's (FASB) Accounting Standards Codification (ASC) 825, Disclosures about Fair Value of Financial Instruments, requires disclosures of the fair value of financial instruments. The carrying value of the Company's current financial instruments, which include cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities and shareholder loan, approximates their fair values because of the short-term maturities of these instruments.

(f) Measurement.

The Company initially measures its financial instrument at fair value, except for certain non-arm's length transactions.

The Company subsequently measures all its financial assets and financial liabilities at amortized cost, except for investments in equity instruments that are quoted in an active market, which are measured at fair value. Changes in fair value are recognized in earnings for the period in which they occur.

Financial liabilities include accounts payable and accrued liabilities.

(g) Impairment.

Financial assets measured at cost are tested for impairment when there are indicators of impairment. The amount of the write-down is recognized in earnings for the period. The previously recognized impairment loss may be reversed to the extent of the improvement, directly or by adjusting the allowance account, provided it is no greater than the amount that would have been reported at the date of the reversal had the impairment not been recognized previously. The amount of the reversal is recognized in earnings for the period.

(h) Impairment of Long-Lived Assets.

A long-lived asset is tested for impairment whenever events or changes in circumstances indicate that its carrying value amount may not be recoverable. An impairment loss is recognized when the carrying amount of the asset exceeds the sum of the undiscounted cash flows resulting from its use and eventual disposition. The impairment loss is measured as the amount by which the carrying amount of the long-lived assets exceeds its fair value.

(i) Related Party Transactions.

All transactions with related parties are in the normal course of operations and are measured at the exchange amount.

(j) Intangible Assets.

The useful life of intangible assets is assessed as either finite or indefinite. Following the initial recognition, intangible assets are carried at cost less any accumulated amortization and accumulated impairment losses, if any.

Intangible assets with finite useful lives are carried at cost less accumulated amortization. Amortization is calculated using the straight-line method over the estimated useful lives.

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis. If impairment indicators are present, these assets are subject to an impairment review. Any loss resulting from impairment of intangible assets is expensed in the period the impairment is identified.

(k) Recent Accounting Pronouncements.

The Company has considered recent accounting pronouncements during the preparation of these financial statements.

NOTE 4 - GOING CONCERN

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. The Company's financial position and operating results raise substantial doubt about the Company's ability to continue as a going concern, as reflected by the net loss of \$33,500, accumulated deficit of approximately \$800k through June 30, 2022, and the minimal working capital position. The ability of the Company to continue as a going concern is dependent upon commencing operations, developing sales and obtaining additional capital and financing. The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern. The Company is currently seeking additional capital to allow it to grow its operations

NOTE 5 - RELATED PARTY TRANSACTIONS

From time to time the Company may enter into non-arm's length transactions with related parties. These transactions will be valued at historical cost with no value increase given.

NOTE 6 - NOTES PAYABLE

From time to time the Company may enter into non-arm's length notes payable with related or affiliated parties.

NOTE 7 – STOCKHOLDERS EQUITY (DEFICIT)

At June 30, 2022, the Company has 100,000,000 shares of par value \$0.001 common stock authorized and 50,509,501 issued and outstanding.

NOTE 8 - FINANCIAL INSTRUMENTS

(a) Liquidity Risk.

Liquidity risk is the risk that the Company will not be able to meet its obligations associated with financial liabilities. The Company relies on cash flows generated from operations, as well as injections of capital through the issuance of the Company's capital stock to settle its liabilities when they become due.

(b) Interest Rate Risk.

The Company is not exposed to significant interest rate risk due to the short-term maturity of its monetary current assets and current liabilities.
