**Example:** A company with a fiscal year end of December 31<sup>st</sup>, in addressing this item for its Annual Report end December 31, 2021, would include any events that resulted in changes to any class of its outstanding shares from the period beginning on January 1, 2019 through December 31, 2021 pursuant to the tabular format above.

Use the space below to provide any additional details, including footnotes to the table above:

Settlement Agreement was reached on 9/13/2021 for the return of 3,850,000 Preferred B Shares and 3,491,672,614 common shares of IDGC and were finally returned 11/9/2021 Preferred B and 12/3/2021 Common. The delay in the return of both classes of shares caused adverse financing opportunities in Q42021 and delayed execution of revitalized business plan in Q4 2021 and Q1 and Q2 2022.

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, the Company bases its fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy. Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. The market value of certain notes payable that were created under a prior management team are likely to be less than their face value because the note holders cannot show consideration that is equal to the face amount of the note. In an orderly transaction between market participants, we believe the notes have little value. We are evaluating all observable and unobservable inputs to determine the fair value measurement of such notes.

## B. Debt Securities, Including Promissory and Convertible Notes

Use the chart and additional space below to list and describe all outstanding promissory notes, convertible notes, convertible debentures, or any other debt instruments that may be converted into a class of the issuer's equity securities.

To remain qualified for Current Information, a company must post its Annual Report within 90 days from its fiscal year-end date and Quarterly Reports within 45 days of each fiscal quarter-end date.

#### 5) Issuer's Business, Products and Services

The purpose of this section is to provide a clear description of the issuer's current operations. In answering this item, please include the following:

---

<sup>4</sup> The financial statements requested pursuant to this item must be prepared in accordance with US GAAP or IFRS by persons with sufficient financial skills.

- A. Summarize the issuer's business operations (If the issuer does not have current operations, state "no operations")

IDGlobal Corp. is a publicly traded (OTC:IDGC) diversified holdings company, which seeks to acquire and consolidate within the Smart City (IoT) 4.0 industry. Our acquisitions are structured as a partnership subsidiary, we assist with the growth and development of these businesses with the goal of maximizing their value prior to an exchanged listed spinoff. We look to consolidate and roll up the highly fragmented new Internet of Things (IoT) applications and 4.0 industries which enable Smart City Development. Our Products and services provide the ability to remotely monitor, manage and control devices, and to create new insights and actionable information from real-time data. With the use of sensors and data analysis we look to connect intelligence, efficiency, and a better way of life.

Noveda is in the final stages of fully-upgrade software development.

\*In July of 2022 the Company signed an MOU for the acquisition of UTXO Technologies Inc. and is currently in the DD phase.

#### **ABOUT UTXO TECHNOLOGIES, INC.**

UTXO is a multi-disciplinary hi-tech organization consisting of several teams experienced in advanced IT solutions, electronics, software and hardware development, as well as nano material science. The teams are dedicated disruptive innovators in the energy sector, highly focused within the world of distributed renewable energy solutions. The new team is working diligently on the integration of Noveda technology within UTXO.

\*In August of 2022

Noveda received a proposal to migrate you to AWS and provide operational support. Given your familiarity with the application and the overall smaller size of the environment we should be able to have all of this completed and tested by the end of the year. The biggest variables are 1) when we get started and 2) your ability and availability to do what is needed on your side. As we mentioned, Logicworks now has 10 years of experience migrating and managing business on AWS. We appreciate that you have been a client for over 10 years and look forward to another 10 years!

We also need to reach a settlement on the past due. I've included the statement. Please keep in mind that invoices that either went unpaid or short paid go back about 4 years. The total past due includes over \$260K in fees and \$96K in interest. If Noveda is able to execute the above project and settlement then Logicworks will waive the interest charges completely and split the \$260K so you would only owe \$130K on the past due amounts.

Before Logicworks can get started on the project we would need at least the \$40K set-up fee associated with the project and 50% of the settlement for a total of \$105K. We can then work out a payment plan for the remaining \$65K

The Company is working on this most recent proposal and will have updates in the near future about next steps.

- B. Please list any subsidiaries, parents, or affiliated companies.

PolyBrite Norge AS (Norway) – On the 6<sup>th</sup> day of December 2018, Liberty Capital Group (J. Adrian Dalsey)/IDGlobal Corp. (Harry J. IDGlobal Corp. and DOL NJ have preliminary agreement for all of Q4 2021 and will reengage for status Q1 2022.

On February 24, 2021 Noveda Technologies, Inc. reinstated its proprietary software Patent # 8103465 (System and method for monitoring and managing energy performance with the USPTO and has refocused the business model to be a pure play Software as a Service (SaaS).

The Software Upgrades are slated to launch Q3 2022 which include replacing outdated Flash software whose life ended December 31, 2020, and the interim Flash Workaround App that was limited to Windows users. The Upgrade also includes the latest PHP version 8, full-fledged source code documentation, and computability with AWS infrastructure for additional computational services. Once through a short beta-testing phase of the new upgrades, the company also has two international licensing agreements to execute.

On November 15, 2018 a Stock Purchase Agreement was entered into between Sebastien DuFort, Liberty Capital Group, Rosemont Shepherd Management, LLC and Harry J. Orfanos, CFO of Liberty Capital Group, Inc. wherein certain recitals were to be performed by each of the parties, which at this time have not been fulfilled and venue of the agreement is clearly the State of Illinois. In January 2021, Liberty Capital Group filed in San Diego, California against multiple parties including IDGlobal Corp., Rosemont Shepherd Management, LLC, Harry J. Orfanos, Sebastien DuFort, Watershed Enterprises and Watershed Staffing along with Chris Abbott. This case is currently in settlement negotiations. Liberty Capital Group and IDGlobal Corp. and Sebastien DuFort reached settlement agreement 9/9/2021, the case is still open for Status and the Liberty Capital Group Notes are in dispute.

In September 2021, the company entered into a settlement agreement with Liberty Capital Group. In conjunction with the agreement, the Company's former Chief Executive Officer (Adrian Dalsey) ("CEO") resigned effective September 13, 2021 from all officer and director positions that he held in the Company and any subsidiaries. The agreement calls for the former CEO to return 3,491,672,614 shares of the Company's common stock and 3,850,000 shares of the Company's Series B preferred stock; to work together with the Company in settling a claim with the New Jersey Department of Labor; and to pursue the cancellation of an additional 1,454,863,589 shares of the Company's common stock and 150,000,000 shares of the Company's Series A preferred stock. In conjunction with the settlement agreement, Liberty Capital Group will receive \$40,000 in cash and the former CEO will receive 300,000,000 shares of the Company's common stock. As of the date of this disclosure statement the Former CEO has received the 300,000,000 common shares of IDGC and \$26,000 in cash. The company is still working with the Department of Labor negotiating settlement and has made payment of \$11,250 Cash towards the dispute.

Under the Fair Value Measurements Topic of the FASB Accounting Standards Codification, the Company bases its fair value on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. It is the Company's policy to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements, in accordance with the fair value hierarchy. Fair value measurements for assets and liabilities where there exists limited or no observable market data and, therefore, are based primarily upon management's own estimates, are often calculated based on current pricing policy, the economic and competitive environment, the characteristics of the asset or liability and other such factors. The market value of certain notes payable that were created under a prior management team are likely to be less than their face value because the note holders cannot show consideration that is equal to the face amount of the note. In an orderly transaction between market participants, we believe the notes have little value. We are evaluating all observable and unobservable inputs to determine the fair value measurement of such notes.
