NOTE 2 – BASIS OF PRESENTATION

The accompanying financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (“GAAP”) and stated in U.S. dollars. Any reference in these notes to applicable guidance is meant to refer to the authoritative GAAP as found in the Accounting Standards Codification (“ASC”) and Accounting Standards Updates (“ASU”) of the Financial Accounting Standards Board (“FASB”).

The accompanying financial statements as of September 30, 2022 and June 30, 2022 have been prepared in accordance with accounting principles generally accepted in the United States (“US GAAP”).

The Company currently operates in one business segment. The Company is not organized by market and is managed and operated as one business. A single management team reports to the chief operating decision maker, the Chief Executive Officer, who comprehensively manages the entire business. The Company does not currently operate any separate lines of businesses or separate business entities.

Fiscal year end

The Company’s fiscal year end is June 30.

Going Concern

The Company's financial statements are prepared using US GAAP applicable to a going concern that contemplates the realization of assets and liquidation of liabilities in the normal course of business. The Company has not established any source of revenue to cover its operating costs and has an accumulated deficit of \$2,176,305 as of September 30, 2022. These conditions raise substantial doubt about the company's ability to continue as a going concern. The Company will engage in limited activities without incurring significant liabilities that must be satisfied in cash until a source of funding is secured. The Company will offer noncash consideration and seek equity lines as a means of financing its operations. If the Company is unable to obtain revenue producing contracts or financing or if the revenue or financing it does obtain is insufficient to cover any operating losses it may incur, it may substantially curtail or terminate its operations or seek other business opportunities through strategic alliances, acquisitions or other arrangements that may dilute the interests of existing stockholders.

The financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

NOTE 3 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies of the Company is presented to assist in understanding the Company's financial statements. The financial statements and notes are representations of the Company's management, which is responsible for their integrity and objectivity. These accounting policies conform to US GAAP and have been consistently applied in the preparation of the financial statements.

Use of Estimates

The preparation of these financial statements in accordance with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the dates of the financial statements and the reported amounts of net sales and expenses during the reported periods. Actual results may differ from those estimates and such differences may be material to the financial statements. The more significant estimates and assumptions by management include common stock valuation. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions.

Cash

The Company's cash is held in bank accounts in the United States and is insured by the Federal Deposit Insurance Corporation (FDIC) up to \$250,000. The Company has not experienced any cash losses.

Cash Flows Reporting

The Company follows ASC 230, "Statement of Cash Flows", for cash flows reporting, classifies cash receipts and payments according to whether they stem from operating, investing, or financing activities and provides definitions of each category. The Company uses the indirect or reconciliation method ("Indirect method") as defined by ASC 230 to report net cash flow from operating activities by adjusting net income to reconcile it to net cash flow from operating activities by removing the effects of (a) all deferrals of past operating cash receipts and payments and all accruals of expected future operating cash receipts and payments and (b) all items that are included in net income that do not affect operating cash receipts and payments.

Related Parties

The Company follows ASC 850, "Related Party Disclosures," for the identification of related parties and disclosure of related party transactions. Related parties are any entities or individuals that, through employment, ownership or other means, possess the ability to direct or influence the direction of the management and policies of the Company.

Income Taxes

Income taxes are accounted for under an asset and liability approach in accordance with ASC 740, “Income Taxes”. This process involves calculating the temporary and permanent differences between the carrying amounts of the assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The temporary differences result in deferred tax assets and liabilities, which would be recorded on the balance sheets in accordance with ASC 740, which established financial accounting and reporting standards for the effect of income taxes. The likelihood that its deferred tax assets will be recovered from future taxable income must be assessed and, to the extent that recovery is not likely, a valuation allowance is established. Changes in the valuation allowance in a period are recorded through the income tax provision in the unaudited statements of operations.

ASC 740-10 clarifies the accounting for uncertainty in income taxes recognized in an entity’s unaudited financial statements and prescribes a recognition threshold and measurement attributes for financial statement disclosure of tax positions taken or expected to be taken on a tax return. Under ASC 740-10, the impact of an uncertain income tax position on the income tax return must be recognized at the largest amount that is more-likely-than-not to be sustained upon audit by the relevant taxing authority. An uncertain income tax position will not be recognized if it has less than a 50% likelihood of being sustained. Additionally, ASC 740-10 provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. The Company does not have a liability for unrecognized income tax benefits.

Advertising and Marketing Costs

Advertising and marketing expenses are recorded as marketing expenses when they are incurred. The Company incurred no advertising and marketing expense for the three months ended September 30, 2022 and 2021, respectively.

Research and Development

All research and development costs are expensed as incurred. The Company incurred no research and development expense for the three months ended September 30, 2022 and 2021, respectively.

Leases

In accordance with ASC 842, “Leases”, the Company determines whether an arrangement contains a lease at inception. A lease is a contract that provides the right to control an identified asset for a period of time in exchange for consideration. For identified leases, the Company determines whether it should be classified as an operating or finance lease. Operating leases are recorded in the balance sheet as: right-of-use asset (“ROU asset”) and operating lease obligation. ROU assets represent the Company’s right to use an underlying asset for the lease term and lease liabilities represent the Company’s obligation to make lease payments arising from the lease. ROU assets and operating lease liabilities are recognized at the commencement date of the lease and measured based on the present value of lease payments over the lease term. The ROU asset also includes deferred rent liabilities. The Company’s lease arrangements generally do not provide an implicit interest rate. As a result, in such situations the Company uses its incremental borrowing rate based on the information available at commencement date in determining the present value of lease payments. The Company includes options to extend or terminate the lease when it is reasonably certain that it will exercise that option in the measurement of its ROU assets and liabilities. Lease expense for operating leases is recognized on a straight-line basis over the lease term. The Company has some lease agreements with lease and non-lease components, which are accounted for as a single lease component. The Company elected to exclude from its balance sheets recognition of leases having a term of 12 months or less (“short-term leases”). Lease expense is recognized on a straight-line basis over the lease term.

Fair Value of Financial Instruments

The provisions of accounting guidance, FASB Topic ASC 825, “Financial Instruments”, requires all entities to disclose the fair value of financial instruments, both assets and liabilities recognized and not recognized on the balance sheet, for which it is practicable to estimate fair value, and defines fair value of a financial instrument as the amount at which the instrument could be exchanged in a current transaction between willing parties. As of September 30, 2022 and June 30, 2022, there were no financial instruments requiring fair value.

Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability, in an orderly transaction between market participants on the measurement date. Valuation techniques used to measure fair value must maximize the use of observable inputs and minimize the use of unobservable inputs. The fair value hierarchy is based on three levels of inputs, of which the first two are considered observable and the last unobservable, as follows:

- Level 1 – Quoted prices in active markets for identical assets or liabilities.
- Level 2 – Inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 – Unobservable inputs that are supported by little or no market activity and that are significant to the measurement of the fair value of the assets or liabilities

The carrying value of financial assets and liabilities recorded at fair value are measured on a recurring or nonrecurring basis. Financial assets and liabilities measured on a non-recurring basis are those that are adjusted to fair value when a significant event occurs. There were no financial assets or liabilities carried and measured on a nonrecurring basis during the reporting periods. Financial assets and liabilities measured on a recurring basis are those that are adjusted to fair value each time a financial statement is prepared. There have been no transfers between levels.

Basic and diluted earnings per share

Diluted earnings (loss) per share are computed on the basis of the weighted average number of common shares (including common stock subject to redemption) plus dilutive potential common shares outstanding for the reporting period. In periods where losses are reported, the weighted-average number of common stock outstanding excludes common stock equivalents, because their inclusion would be anti-dilutive.

There were 100,000 preferred shares convertible into 100,000,000 common shares outstanding as of September 30, 2022 and June 30, 2022. There were no potential dilutive securities for the three months ended September 30, 2022 and 2021. These potential dilutive securities outstanding have not been considered as the inclusion would be anti-dilutive.

Non-Cash Equity Transactions

Shares of equity instruments issued for non-cash consideration are recorded at the fair value of the consideration received based on the market value of services to be rendered, or at the value of the stock given, considered in reference to contemporaneous cash sale of stock.

Concentrations, Risks, and Uncertainties

Business Risk

Substantial business risks and uncertainties are inherent to an entity, including the potential risk of business failure.

The Company is headquartered and operates in the United States. To date, the Company has generated no revenues from operations. There can be no assurance that the Company will be able to raise additional capital and failure to do so would have a material adverse effect on the Company's financial position, results of operations and cash flows. Also, the success of the Company's operations is subject to numerous contingencies, some of which are beyond management's control. Currently, these contingencies include general economic conditions, competition, and governmental and political conditions.

Interest rate risk

Financial assets and liabilities do not have material interest rate risk.

Credit risk

The Company is not exposed to credit risk.

Seasonality

The business is not subject to substantial seasonal fluctuations.

Major Suppliers

The Company has not entered into any contracts that obligate it to purchase a minimum quantity or exclusively from any supplier.

Recent Accounting Pronouncements

The Company has implemented all new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.
