***Company Overview and History***

Entertainment Arts Research, Inc. (the “Company”) was incorporated under the laws of the state of Nevada on March 19, 1999 as a real estate rental corporation under the name Property Investors Ventures, Inc. On November 24, 2008, the company effectuated a reverse merger and changed its name to Entertainment Arts Research, Inc. From 2008 to 2020, the company developed software in the virtual reality industry.

On 4 January 2021, the company issued preferred stock which resulted in a change of control and management. (see the [disclosure of change of control](#)). During 2021, the company transitioned to become a diversified consumer beverage group. The company’s strategy is to drive growth by acquisition and distribution expansion, operating in multiple beverage market segments that enjoy high growth, above average margins and exceptional consumer acceptance. The portfolio of brands is diverse, spanning across the alcohol and non-alcohol market segments, with a portfolio of craft spirits, craft beer craft soda and functional beverages. In July 2021, the company acquired Betta4u Brands Inc., with its wholly owned subsidiaries, Fury Beverages LLC, Rhino Spirits LLC, Zegen Distribution, and the brand Neo Alkaline Water. EARI then filed a [FORM 1-A Regulation A Offering Statement](#) for purpose of raising capital which was [approved by the SEC](#) on the 29<sup>th</sup> of October 2021 and an [Amendment to the Offering Statement](#) on the 2<sup>nd</sup> of May 2022.

In July 2022, the Company successfully completed three significant acquisitions. The acquisitions of Blossom Botanical Water, LA Bottleworks Inc., and Original New York Seltzer LLC. These acquisitions have since provided critical resources to manufacture the company’s own brands and to also offer copacking for various other brands, generating additional revenue. The legendary Original New York Seltzer brand held under Original New York Seltzer LLC., was relaunched in May of 2015 after a 25-year hiatus. Through this acquisition, the company has acquired a well-supported and growing distribution network of 168 wholesale distributors in the US and Canada. The brand is now available in over 10,000 accounts across an omnichannel network of chain, mass, foodservice, online retail and on premise. Original New York Seltzer has substantial brand recognition in the craft soda category, this all-natural craft soda has four simple ingredients and is packed in a 10 oz premium glass bottle.

LA Bottle Works Inc., is the production arm for Original New York Seltzer and Cock 'n Bull cocktail mixers, located in Los Angeles. The Cock 'n Bull mixer range is produced and sold under license, consisting of tonic water, ginger beer, club soda, bitter lemon, and bitter orange. The bottling plant has sufficient capacity to double the current production output and offers turnkey consulting for formulation, packaging, labelling, branding, and marketing from concept to consumer. Some of the brands produced are Q-Tonics, Dr Browns, Dads Root Beer.

Our mailing address is EARI Beverage Group, 19701 Bethel Church Road, Suite #103, PMB 312, Cornelius, NC 28031 and our telephone number is (980) 999-0270. The company website address is [www.earigroup.com](http://www.earigroup.com)

***Use of Estimates***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

### ***Revenue Recognition***

The Company follows paragraph 605-10-S99-1 of the FASB Accounting Standards Codification for revenue recognition. The Company will recognize revenue when it is realized or realizable and earned. The Company considers revenue realized or realizable and earned when all of the following criteria are met: (i) persuasive evidence of an arrangement exists, (ii) the product has been shipped or the services have been rendered to the customer, (iii) the sales price is fixed or determinable, and (iv) collectability is reasonably assured. The Company specifically derives income from the following:

1. Revenue from wholly owned subsidiaries.
2. Business Consulting Services.
3. Streaming Media Channels and Advertising

For the period 1 July 2022 to September 30, 2022, there was **\$3,731,173 in total revenue.**

### ***Fair Value of Financial Instruments***

The Company applies the accounting guidance under Financial Accounting Standards Board (“FASB”) ASC 820-10, “*Fair Value Measurements*”, as well as certain related FASB staff positions. This guidance defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities required to be recorded at fair value, the Company considers the principal or most advantageous market in which it would transact business and considers assumptions that marketplace participants would use when pricing the asset or liability, such as inherent risk, transfer restrictions, and risk of nonperformance.

The guidance also establishes a fair value hierarchy for measurements of fair value as follows:

- Level 1 - quoted market prices in active markets for identical assets or liabilities.
- Level 2 - inputs other than Level 1 that are observable, either directly or indirectly, such as quoted

prices in active markets for similar assets or liabilities, quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.

- Level 3 - unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

The Company's financial instruments consist of accounts payable, accrued expenses, notes payable, notes payable - related party, loan payable - related party, convertible notes payable, convertible notes payable - related party and deferred rent payable. The carrying amount of the Company's financial instruments approximates their fair value as of December 31, 2020 and December 31, 2021, due to the short-term nature of these instruments.

The Company accounts for its derivative liabilities, at fair value, on a recurring basis under level 3.

### **Embedded Conversion Features**

The Company evaluates embedded conversion features within convertible debt under ASC 815 “Derivatives and Hedging” to determine whether the embedded conversion feature(s) should be bifurcated from the host instrument and accounted for as a derivative at fair value with changes in fair value recorded in earnings. If the conversion feature does not require derivative treatment under ASC 815, the instrument is evaluated under ASC 470-20 “Debt with Conversion and Other Options” for consideration of any beneficial conversion features.

### **Derivative Financial Instruments**

Fair value accounting requires bifurcation of embedded derivative instruments such as conversion features in convertible debt or equity instruments, and measurement of their fair value for accounting purposes. In determining the appropriate fair value, the Company uses the Black-Scholes option-pricing model. In assessing the convertible debt instruments, management determines if the convertible debt host instrument is conventional convertible debt and further if there is a beneficial conversion feature requiring measurement. If the instrument is not considered conventional convertible debt, the Company will continue its evaluation process of these instruments as derivative financial instruments.

Once determined, derivative liabilities are adjusted to reflect fair value at each reporting period end, with any increase or decrease in the fair value being recorded in results of operations as an adjustment to fair value of derivatives. In addition, the fair value of freestanding derivative instruments such as warrants, are also valued using the Black-Scholes option-pricing model.

### **Beneficial Conversion Feature**

For conventional convertible debt where the rate of conversion is below market value, the Company records a "beneficial conversion feature" ("BCF") and related debt discount.

When the Company records a BCF, the relative fair value of the BCF is recorded as a debt discount against the face amount of the respective debt instrument (offset to additional paid in capital) and amortized to interest expense over the life of the debt.

### **Debt Issue Costs and Debt Discount**

The Company may record debt issue costs and/or debt discounts in connection with raising funds through the issuance of debt. These costs may be paid in the form of cash, or equity (such as warrants). These costs are amortized to interest expense over the life of the debt. If a conversion of the underlying debt occurs, a proportionate share of the unamortized amounts is immediately expensed.

### **Stock-Based Compensation - Non Employees**

#### **Equity Instruments Issued to Parties Other Than Employees for Acquiring Goods or Services**

The Company accounts for equity instruments issued to parties other than employees for acquiring goods or services under guidance of Sub-topic 505-50 of the FASB Accounting Standards Codification ("Sub- topic 505-50").

Pursuant to ASC Section 505-50-30, all transactions in which goods or services are the consideration received for the issuance of equity instruments are accounted for based on the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable. The measurement date used to determine the fair value of the equity instrument issued is the earlier of the date on which the performance is complete or the date on which it is probable that performance will occur. If the Company is a newly formed corporation or shares of the Company are thinly traded the use of share prices established in the Company's most recent private placement memorandum ("PPM"), or weekly or monthly price observations would generally be more appropriate than the use of daily price observations as such shares could be artificially inflated due to a larger spread between the bid and asked quotes and lack of consistent trading in the market.

The fair value of share options and similar instruments is estimated on the date of grant using a Black-Scholes option-pricing valuation model. The ranges of assumptions for inputs are as follows:

- Expected term of share options and similar instruments: Pursuant to Paragraph 718-10-50-2(f)(2)(i) of the FASB Accounting Standards Codification the expected term of share options and similar instruments represents the period of time the options and similar

instruments are expected to be outstanding taking into consideration of the contractual term of the instruments and holder's expected exercise behavior into the fair value (or calculated value) of the instruments. The Company uses historical data to estimate holder's expected exercise behavior. If the Company is a newly formed corporation or shares of the Company are thinly traded the contractual term of the share options and similar instruments is used as the expected term of share options and similar instruments as the Company does not have sufficient historical exercise data to provide a reasonable basis upon which to estimate expected term.

- Expected volatility of the entity's shares and the method used to estimate it. Pursuant to ASC Paragraph 718-10-50-2(f)(2)(ii) a thinly-traded or nonpublic entity that uses the calculated value method shall disclose the reasons why it is not practicable for the Company to estimate the expected volatility of its share price, the appropriate industry sector index that it has selected, the reasons for selecting that particular index, and how it has calculated historical volatility using that index. The Company uses the average historical volatility of the comparable companies over the expected contractual life of the share options or similar instruments as its expected volatility. If shares of a company are thinly traded the use of weekly or monthly price observations would generally be more appropriate than the use of daily price observations as the volatility calculation using daily observations for such shares could be artificially inflated due to a larger spread between the bid and asked quotes and lack of consistent trading in the market.
- Expected annual rate of quarterly dividends. An entity that uses a method that employs different dividend rates during the contractual term shall disclose the range of expected dividends used and the weighted-average expected dividends. The expected dividend yield is based on the Company's current dividend yield as the best estimate of projected dividend yield for periods within the expected term of the share options and similar instruments.
- Risk-free rate(s). An entity that uses a method that employs different risk-free rates shall disclose the range of risk-free rates used. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant for periods within the expected term of the share options and similar instruments.

Pursuant to ASC paragraph 505-50-25-7, if fully vested, non-forfeitable equity instruments are issued at the date the grantor and grantee enter into an agreement for goods or services (no specific performance is required by the grantee to retain those equity instruments), then, because of the elimination of any obligation on the part of the counterparty to earn the equity instruments, a measurement date has been reached. A grantor shall recognize the equity instruments when they are issued (in most cases, when the agreement is entered into). Whether the corresponding cost is an immediate expense or a prepaid asset (or whether the debit should be characterized as contra-equity under the requirements of paragraph 505-50-45-1) depends on the specific facts and circumstances. Pursuant to ASC paragraph 505-50-45-1, a grantor may conclude that an asset (other than a note or a receivable) has been received in return for fully vested, non-forfeitable equity instruments that are issued at the date the grantor and grantee enter into an agreement for goods or services (and no specific performance is required by the grantee in order to retain those equity instruments). Such an asset shall not be displayed as contra-equity by the grantor of the equity instruments. The transferability (or lack thereof) of the equity instruments shall not affect the balance sheet display of the asset. This guidance is limited to transactions in which equity instruments are transferred to other than employees in exchange for goods or services. Section 505-50-30 provides guidance on the determination of the measurement date for transactions that are within the scope of this Subtopic.

Pursuant to Paragraphs 505-50-25-8 and 505-50-25-9, an entity may grant fully vested, non-forfeitable equity instruments that are exercisable by the grantee only after a specified period of time if the terms of the agreement provide for earlier exercisability if the grantee achieves specified performance conditions. Any measured cost of the transaction shall be recognized in the same period(s) and in the same manner as if the entity had paid cash for the goods or services or used cash rebates as a sales discount instead of paying with, or using, the equity instruments. A recognized asset, expense, or sales discount shall not be reversed if a share option and similar instrument that the counterparty has the right to exercise expires unexercised.

Pursuant to ASC paragraph 505-50-30-S99-1, if the Company receives a right to receive future services in exchange for unvested, forfeitable equity instruments, those equity instruments are treated as unissued for accounting purposes until the future services are received (that is, the instruments are not considered issued until they vest). Consequently, there would be no recognition at the measurement date and no entry should be recorded.

#### ***Cash and Cash Equivalents***

***\$367,634 at September 30th, 2022.***

The Company considers all highly liquid temporary cash investments with an original maturity of three months or less to be cash equivalents.

#### ***Accounts Receivable and Allowance for Doubtful Accounts***

***\$2,344,628 at September 30th, 2022.***

The Company bases its allowance for doubtful accounts on estimates of the creditworthiness of customers, analysis of delinquent accounts, payment histories of its customers and judgment with respect to the current economic conditions. The Company generally does not require collateral. The Company believes the allowances are sufficient to cover uncollectible accounts. The Company reviews its accounts receivable aging on a regular basis for past due accounts and writes off any uncollectible amounts against the allowance.

#### ***Inventory***

***\$44,154 at September 30th, 2022.***

Inventory is stated at the lower of cost or market. Cost is principally determined by using the average cost method that approximates the First-In, First-Out (FIFO) method of accounting for inventory. Inventory consists of raw materials as well as finished goods held for sale. The Company's management monitors the inventory for excess and obsolete items and makes necessary valuation adjustments when required. The Company is in the process of pricing and ordering Inventory.

#### ***Property and Equipment***

***\$300,065 at September 30th, 2022.***

Property and equipment is recorded at cost less accumulated depreciation. Replacements, maintenance, and repairs which do not improve or extend the lives of the respective assets are charged to expense as incurred. Depreciation is computed using the straight-line method over the estimated useful lives of the assets as follows: All plant and equipment has been fully depreciated.

#### ***Impairment of Long-Lived Assets***

***None at June 30th, 2022.***

Long-lived assets are reviewed for impairment when events or changes in circumstances indicate the book value of the assets may not be recoverable. In accordance with Accounting Standards Codification ("ASC") 360-10-35-15 Impairment or Disposal of Long-Lived Assets, recoverability is measured by comparing the book value of the asset to the future net undiscounted cash flows expected to be generated by the asset.

#### ***Going Concern***

The ability of the Company to continue as a going concern is dependent on management's plans, which includes implementation of its business plan and continuing to raise funds through debt or equity raises. The Company will likely continue to rely upon related-party debt or equity financing to ensure the continuing

existence of the business. The Company is in the process of concluding acquisitions that generate revenue in the global consumer goods market. The company and its wholly owned subsidiaries, produces and sells various beverage products that generate revenue in multiple geographical markets with a range of products that include Nature's Fury Drinks, Rhino Spirits, Bell City Craft Beer, NEO alkaline water, Original New York Seltzer, Cock 'n Bull Mixers and Blossom Botanical Water. The EARI Beverage Group had revenue of \$1,282,223 in the fiscal year of 2021 and revenue of \$4,779,697 for the fiscal year 2022 to date (Q1/Q2 and Q3) as a going concern.

The company currently operates in the following geographical markets; Canada, Philippines and the United States of America.

### ***Prepaid Expenses and Other Assets***

***None as at September 30th, 2022.***

### ***Loans payable***

At *September 30th, 2022.*, the total notes payable shown on the balance sheet are \$8,549,728. The Company calculated a derivative liability using the black shoes module using a volatility rate of 198% and a risk-free interest rate of .017% which resulted in a liability of \$8,117. The company has secured funding commitments and is currently negotiating with several investment groups to restructure all outstanding loan notes and finance required for working capital.
