

Alternative Reporting Standard: Pink® Basic Disclosure Guidelines

Federal securities laws, such as Rules 10b-5 and 15c2-11 of the Securities Exchange Act of 1934 (“Exchange Act”) as well as Rule 144 of the Securities Act of 1933 (“Securities Act”), and state Blue Sky laws, require issuers to provide *current information* to the public markets. We use information provided by companies under these Guidelines to designate the appropriate tier in the Pink Market: Current Information or Limited Information.³

These Guidelines may be amended from time to time, in the sole and absolute discretion of OTC Markets Group, with or without notice. The information provided by companies under these Guidelines is subject to our [Privacy Policy](#).

United Resource Holdings Group Inc
Notes to the Financial Statements
For Quarter Ending September 30, 2022

No assurance is provided on the accompanying statements

1. General Information

United Resource Holdings Group Inc. (the "Company") is listed on the U.S. OTC Pink marketplace. The Company is incorporated and domiciled in Nevada, United States of America. The address of its registered office is 628 Middlegate Road, Suite 6, Henderson, Nevada, 89011.

The principal activity of the Company is the development of a portfolio of valuable assets.

2. Significant Accounting Policies

2.1 Basis of Preparation

Statements are prepared according to US GAAP.

2.2 Revenue Recognition

Interest income, including income arising from finance leases and other financial instruments, is recognized using the effective interest method. Dividend income is recognized when the right to receive payment is established.

2.3 Group Accounting

When a change in the Company's ownership interest in a subsidiary results in a loss of control over the subsidiary, the assets and liabilities of the subsidiary including any goodwill are derecognized. Amounts recognized in other comprehensive income in respect of that entity are also reclassified to profit or loss or transferred directly to retained earnings if required by a specific Standard. Any retained interest in the entity is remeasured at fair value. The difference between the carrying amount of the retained investment at the date when control is lost and its fair value is recognized in profit or loss.

The acquisition method of accounting is used to account for business combinations by the Group. The consideration transferred for the acquisition of a subsidiary comprises the fair value of the assets transferred, the liabilities incurred and the equity interests issued by the Group. The consideration transferred also includes the fair value of any contingent consideration arrangement and the fair value of any pre-existing equity interest in the subsidiary. Acquisition related costs are expensed as incurred. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are, with limited exceptions, measured initially at their fair values at the acquisition date. On an acquisition-by-acquisition basis, the Group recognizes any non-controlling interest in the acquiree at the date of acquisition either at fair value or at the noncontrolling interest's proportionate share of the acquiree's net identifiable assets. The excess of the consideration transferred, the amount of any non-controlling interest in the acquiree and the

acquisition-date fair value of any previous equity interest in the acquiree over the fair value of the net identifiable assets acquired is recorded as goodwill.

2.4 Property, Plant & Equipment

Land and buildings Land and buildings are initially recognized at cost. Freehold land is subsequently carried at the revalued amount less accumulated impairment losses. Buildings and leasehold land are subsequently carried at the revalued amounts less accumulated depreciation and accumulated impairment losses.

Other property, plant and equipment All other items of property, plant and equipment are initially recognized at cost and subsequently carried at cost less accumulated depreciation and accumulated impairment losses.

Freehold land is not depreciated. Depreciation on other items of property, plant and equipment is calculated using the straight-line method to allocate their depreciable amounts over their estimated useful lives as follows: Useful lives
Leasehold land 60 — 99 years Buildings 25 — 50 years Motor vehicles 4 years Plant and equipment 5 — 15 years. The residual values, estimated useful lives and depreciation method of property, plant and equipment are reviewed, and adjusted as appropriate, at each balance sheet date. The effects of any revision are recognized in profit or loss when the changes arise

Subsequent expenditure relating to property, plant and equipment that has already been recognized is added to the carrying amount of the asset only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. All other repair and maintenance expenses are recognized in profit or loss when incurred.

On disposal of an item of property, plant and equipment, the difference between the disposal proceeds and its carrying amount is recognized in profit or loss within 'Other (losses)/gains — net'. Any amount in revaluation reserve relating to that asset is transferred to retained profits directly.

Investments in subsidiaries, joint ventures and associated companies Investments in subsidiaries, joint ventures and associated companies are carried at cost less accumulated impairment losses in the Company's balance sheet. On disposal of investments in subsidiaries, joint ventures and associated companies, the difference between disposal proceeds and the carrying amounts of the investments are recognized in profit or loss.

2.5 Investments

Investments are initially measured at fair value plus transaction costs except for investments held for trading, which are recognized at fair value. Transaction costs for investments held for trading are recognized immediately as expenses. Investments are subsequently carried at fair value. For unquoted equity investments whose fair value cannot be reliably measured using alternative valuation methods, they are carried at cost less any impairment loss. For investments held for trading, gains and losses arising from changes in fair value are included in the profit and loss account. For available-for-sale investments, gains and losses arising from changes in fair value are recognized directly in other comprehensive income and accumulated in the fair value reserve, until the investment is disposed of or is determined to be impaired, at which time the cumulative gain or loss previously recognized in other comprehensive income is reclassified to the profit and loss account. The fair value of investments that are traded in active markets is based on quoted market prices at the balance sheet date. The quoted market prices are the current bid prices. The fair value of investments that are not traded in an active market is determined using valuation techniques. Such techniques include using recent arm's length transactions, reference to the underlying net asset value of the investee companies and discounted cash flow analysis.
