MARKETING WORLDWIDE CORP
Condensed Consolidated Unaudited Financial Statements
Notes For the Year Ending December 31, 2022

NOTE 1. NATURE AND BACKGROUND OF BUSINESS

The accompanying consolidated financial statements include Marketing Worldwide Corp (the 'Company', 'we' or 'us'), a Wyoming corporation, its wholly-owned subsidiaries and any majority controlled interests.

The Company originally operated in North America through its wholly-owned subsidiaries, Marketing Worldwide LLC ('MWW'), and Colortek, Inc. ('CT') in the design, manufacturing, painting and distribution of automotive accessories for motor vehicles in the automotive aftermarket and industrial components for the commercial machinery industries. Recently, the Company has been re-invented as an acquisition incubator, purchasing companies and patents built by passionate visionaries.

The Company was originally incorporated in Delaware in July 2003. It has undergone no name changes and redomiciled to Wyoming in July 2021.

Since acquiring the Minosis crypto mining platform in September 2021, the Company has focused development efforts on this platform, announcing a variety of initiatives over the past six months, including adding new crypto mining equipment and adding cyber security capability through the acquisition of Advanced Risk Control, Inc. In March 2022, the Company announced the global launch of Minosis as its simple 'Click to Mine' crypto mining platform, as well as announcing the development of 'Auction Crypt', a Minosis crypto-mining auction website.

In April 2022, the Company announced the release of Minosis V5 Update, adding BTG to mineable coins and that the Minosis \$MNS token would be launched with a pre-sale date of May 27, 2022 and a full launch date of June 10, 2022, which was successful and resulted in a market value of approximately \$586,400 as at June 30, 2022.

The Company and the Company's Transfer Agent received in July by email a Notice of Demand by Southridge and Stephen Hicks regarding an alleged outstanding debt and preferred stock that the Company does not recognize as outstanding. At this time no stock has been issued and the Company will endeavor to establish the facts and if there is any liability for which shares are due as quickly as possible.

On September 8, 2022, the Company announced it had acquired Doxed, the developer of two crypto-currency tokens, to add to its portfolio. The price of the acquisition was the \$115,000 loaned to Doxed earlier in the year, which was forgiven as part of the transaction.

In September 2022, the Company was notified by TC Special Investments, the provider of loan capital to the Company, that it could no longer provide additional capital to support the Company and its ongoing operations. The Company immediately took action to divest Minosis, Doxed and Application Security and Global Digital Forensics. Each business will continue to operate independently of the Company, with no monies owed between the entities.

The Company completed the divestment of Minosis, GDF and Doxed in October 2022.

On December 1, 2022, the Company issued 300,000,000 shares of common stock to Southridge, valued at \$30,000, in settlement of a complaint about outstanding debt and preferred stock owed to the complainant. A second and final issuance of a further 300,000,000 shares of common stock, for a total payment of 600,000,000 shares valued at \$60,000, were issued subsequent to the year end on January 19, 2023.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements have been prepared for Marketing Worldwide Corp in accordance with accounting principles generally accepted in the United States of America (US GAAP), with all numbers shown in US Dollars.

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for fair presentation of the financial statements have been included. The financial statements include acquired subsidiaries, as discussed below, and include all consolidation entries required to include those subsidiaries.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents

For the Balance Sheet and Statement of Cash Flows, all highly liquid investments with maturity of three months or less are considered to be cash equivalents. The Company had no cash equivalents as at December 31, 2022 or 2021.

Income Taxes

Income taxes are provided in accordance with the FASB Accounting Standards (ASC 740), Accounting for Income Tax. A deferred tax asset or liability is recorded for all temporary differences between financial and tax reporting and net operating loss carry forwards. Any deferred tax expense (benefit) resulting from the net change during the year is shown as deferred tax assets and liabilities. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it was more likely than not that some portion or all of the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment.

Basic and Diluted Net Income (Loss) Per Share

Net income (loss) per unit is calculated in accordance with Codification topic 260, “Earnings per Share” for the periods presented. Basic net loss per share is computed using the weighted average number of common shares outstanding. Diluted loss per share has not been presented because the shares of common stock equivalents have not been included in the per share calculations as such inclusion would be anti-dilutive. Diluted earnings per share is based on the assumption that all dilutive stock options, warrants and convertible debt are converted or exercised applying the treasury stock method. Under this method, options, warrants and convertible debt are assumed exercised at the beginning of the period (or at the time of issuance, if later), and as if funds obtained thereby were used to purchase shares of common stock at the average market price during the period. Options, warrants and/or convertible debt will have a dilutive effect during periods of net profit only when the average market price of the units during the period exceeds the exercise or conversion price of the

Stock Based Compensation

Codification topic 718 “Stock Compensation” requires that the cost resulting from all share-based transactions be recorded in the financial statements and establishes fair value as the measurement objective for share-based payment transactions with employees and acquired goods or services from non-employees. The codification also provides guidance on valuing and expensing these awards, as well as disclosure requirements of these equity arrangements. The Company adopted the codification upon creation of the Company and will expense share-based costs in the period incurred. The Company has not yet adopted a stock option plan and all share-based transactions and share based compensation has been expensed in accordance with the codification guidance.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with professional standards for “Accounting for Derivative Instruments and Hedging Activities”. Professional standards generally provide three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instruments are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur, and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as “The Meaning of Conventional Convertible Debt Instrument”.

The Company accounts for convertible instruments when it has determined that the embedded conversion options should not be bifurcated from their host instruments in accordance with professional standards when “Accounting for Convertible Securities with Beneficial Conversion Features,” as those professional standards pertain to “Certain Convertible Instruments.” Accordingly, the Company records, when necessary, discounts to convertible notes for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying shares of common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares of common stock based upon the differences between the fair value of the underlying shares at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event not within the entity’s control could require net cash settlement, then the contract shall be classified as an asset or a liability.

Fair Value of Financial Instruments

We adopted the guidance of ASC-820 for fair value instruments, which clarifies the definition of fair value, prescribes methods for determining fair value, and establishes a fair value hierarchy to classify the inputs used in measuring fair value, as follows:

Level 1	Inputs are unadjusted quoted prices in active markets for identical assets or liabilities available at the measurement date.
Level 2	Inputs are quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets and liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs derived from or corroborated by observable market data.
Level 3	Inputs are unobservable inputs which reflect the reporting entity’s own assumptions on what assumptions the market participants would use in pricing the asset or liability based on the best available information.

The carrying amounts for cash, accounts receivable, accounts payable and accrued expenses, and loans payable approximate their fair value based on the short-term maturity of these instruments. We identified assets or liabilities that are required to be presented on the balance sheet at fair value in accordance with the accounting guidance as at December 31, 2022 and 2021, as detailed in Note 11, Derivative Liabilities.

ASC 825-10 “Financial Instruments” allows entities to voluntarily choose to measure certain financial assets and liabilities at fair value (fair value option). The fair value option may be elected on an instrument-by-instrument basis and is irrevocable, unless a new election date occurs. If the fair value option is elected for an instrument, unrealized gains and losses for that instrument should be reported in earnings at each subsequent reporting date. We elected to apply the fair value option to outstanding instruments.

Derivative Liabilities

Derivative financial instruments consist of convertible instruments and rights to shares of the Company's common stock. The Company assessed that it had derivative liabilities as at December 31, 2022 and 2021, as detailed in Note 11, Derivative Liabilities.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument subject to the requirement of ASC 815. ASC 815 also provides an exception to this rule when the host instrument is deemed to be conventional, as described.

Impact of New Accounting Standards

The Company does not expect the adoption of recently issued accounting pronouncements to have a significant impact on the Company's results of operations, financial position, or cash flow.

NOTE 3. GOING CONCERN

The Company's financial statements are prepared in accordance with generally accepted accounting principles applicable to a going concern. This contemplates the realization of assets and the liquidation of liabilities in the normal course of business. Realization values may be substantially different from carrying values as shown and these financial statements do not give effect to adjustments that would be necessary to the carrying values and classification of assets and liabilities should the Company be unable to continue as a going concern. Currently, the Company does not have significant cash or other material assets, nor does it have operations or a source of revenue sufficient to cover its operation costs and allow it to continue as a going concern.

The Company has a limited operating history and had a cumulative net loss from inception to December 31, 2022 of \$16,293,147. The Company has a working capital deficit of \$633,009 as at December 31, 2022.

These financial statements for the year ending December 31, 2022 have been prepared assuming the Company will continue as a going concern, which is dependent upon the Company's ability to generate future profits and/or obtain necessary financing to meet its obligations as they come due.

The management has committed to an aggressive growth plan for the Company. The Company's future operations are dependent upon external funding and its ability to execute its business plan, realize sales and control expenses. Management believes that sufficient funding will be available from additional borrowings and private placements to meet its business objectives including anticipated cash needs for working capital, for a reasonable period of time. However, there can be no assurance that the Company will be able to obtain sufficient funds to continue the development of its business operation, or if obtained, upon terms favorable to the Company.

NOTE 4. ACQUISITIONS AND DISPOSALS

The Company has made certain acquisitions recently.

Minosis

In September 2021, the Company acquired a crypto-mining platform ('Minosis') that became a full subsidiary of the business.

	Allocation
Cash on hand	\$ -
Current assets	-
Fixed assets	-
Current liabilities	-
Goodwill	40,000
Total	\$ 40,000

There were no tangible assets or liabilities acquired, with the entire purchase price of \$40,000 allocated to Goodwill.

During the period ending September 30, 2022, the Company determined that no further debt financing would be available from TC Special Investments and, due to the short notice of this situation, decided that it could not continue to finance and support the Minosis operation. Therefore, on September 30, 2022, the Company disposed of Minosis to its own management for no recompense. The goodwill associated with the original acquisition was immediately written-off.

Application Security and Global Digital Forensics, Inc. ('GDF')

On March 6, 2022, the Company acquired Application Security and Global Digital Forensics, Inc. ('GDF') in exchange for the issuance of 5,000,000 shares of Preferred Stock Series E. The transaction was valued at \$125,000, all of which was allocated to Goodwill. The 5,000,000 shares of Preferred Stock Series E may be exchanged by the holder for 100,000,000 shares of common stock or return the 5,000,000 shares of Preferred Stock Series E between November 1 and December 31, 2022. Otherwise, on January 1, 2023, the 5,000,000 shares of Preferred Stock Series E will be converted into 100,000,000 shares of common stock, with the preferred shares retired to the Company's treasury.

	Allocation
Cash on hand	\$ -
Current assets	-
Fixed assets	-
Current liabilities	-
Goodwill	125,000
Total	\$ 125,000

There were no tangible assets or liabilities acquired, with the entire purchase price of \$125,000 allocated to Goodwill.

During the period ending September 30, 2022, the Company determined that no further debt financing would be available from TC Special Investments and, due to the short notice of this situation, decided that it could not continue to finance and support the GDF operation. Therefore, on September 30, 2022, the Company disposed of GDF to its own management for no recompense. The original transaction was reversed, resulting in the goodwill being eliminated and the Series E Preferred Stock being returned to the Company and canceled.

Doxed

Towards the end of September 2022, Doxed defaulted on a loan made to it by the Company through TC Special Investments, its lender, and the Company contemplated custodianship of Doxed. However, TC Special Investments informed the Company that it would no longer provide additional cash support for Doxed, Minosis or Advanced Risk Control, the operating units connected with the Company; the Company, therefore, immediately divested Doxed to its management as at September 30, 2022.

NOTE 5. OTHER CURRENT ASSETS

The Company had the following current assets as at December 31, 2022 and 2021.

	December 31, 2022	December 31, 2021
Minosis tokens - current market value	\$ 590,530	\$ -
Other debtors	-	-
Totals	\$ 590,530	\$ -

On February 16, 2022, the Company entered into a partnership agreement with Doxed LLC whereby the Company, via TC Special Investments, paid \$115,000 in exchange for 60% of the liquidity pool of 300 Billion Doxed Tokens, represented by the DOX name and BEP20 Token, and issued as collateral under this agreement, which will last for no less than 6 months.

NOTE 6. INTANGIBLE ASSETS

Based on the acquisition and disposal activity detailed in Note 4, the Company retained the following intangible assets as at December 31, 2022 and 2021:

Asset	Description	December 31, 2022	December 31, 2021
Goodwill	Goodwill on acquisition of Minosis	\$ -	\$ 40,000
Goodwill	Goodwill on acquisition of GDF	-	-
Total		\$ -	\$ 40,000

The Company had previously acquired goodwill relating to Minosis for a total of \$40,000 and relating to GDF for a total of \$125,000. On September 30, 2022, the Company disposed of both Minosis and GDF for no recompense, causing the goodwill on both operations to be written off in full with immediate effect.

NOTE 7. LOANS AND NOTES PAYABLE

The Company had loans and notes payable as at December 31, 2022 and 2021 totaling \$1,137,294 and \$416,125 respectively, as follows:

Notes

7.1. This note originated with Rainer Poertner in August 2016 and was sold to TC Special Investments during the period ending December 31, 2021.

7.2. On November 1, 2021, the Company entered into an agreement with TC Special Investments LLC ("TCSI") to provide a line of credit for the Company of \$1,500,000. This facility has a term of 24 months, an interest rate of 5% on all drawn-down balances, and requires a 30-day notice period for any draw-down to be made. The funds may be used only for equipment purchase or expansion of the acquired Minosis Platform. In the event of default on this line of credit, any draw-down balance will be collateralized by issuance of shares of the Company's common stock at a discount of 50% to the market value of the common stock at the time of initial default. During the nine months ended September 30, 2022, the Company issued 600,000,000 shares of common stock in repayment of \$150,000 of this line of credit. Also during the nine months ended September 30, 2022, the Company drew down a further \$115,000, used to enter into the token partnership with Doxed, Inc., and \$45,000 to be used for working capital. The line of credit facility closed to any further advances before the end of September 2022.

7.3. The Company entered into an additional loan note with TC Special Investments LLC ("TCSI") for \$355,000 on July 12, 2022. The term was 90 days, with an annual interest rate of 25%, and conversion at 25% of the lowest price of the stock within the prior 90 days. This debt represents additional working capital advanced by TCSI to support the Doxed, Minosis and GDF operations during the period ending September 30, 2022.

7.4 The Company entered into a further loan note with TC Special Investments LLC ("TCSI") for \$366,458 on October 4, 2022. The term was 90 days, with an annual interest rate of 35%, and conversion at 25% of the lowest price of the stock within the prior 90 days.

NOTE 8. CAPITAL STOCK

As at December 31, 2022 and 2021, the Company was authorized to issue Preferred Stock and Common Stock as detailed below.

Preferred Stock

At December 31, 2022 the Company had authorized Preferred Stock in two designation totaling 11,000,000 shares:

Preferred Stock Series D	The Company is authorized to issue 1,000,000 shares of Series D, with a par value of \$0.001 per share. As at January 1, 2020, the Company had 90,002 shares of Series D Preferred Stock issued and outstanding. No shares of Series D Preferred Stock have been issued or canceled since.
--------------------------	--

Preferred Stock Series E	The Company is authorized to issue 10,000,000 shares of Series E, with a par value of \$0.025 per share. As at January 1, 2020, the Company had no shares of Series E Preferred Stock issued and outstanding.
--------------------------	---

On March 6, 2022, the Company issued 5,000,000 shares of Series E preferred stock to acquire Advanced Risk Control, Inc. These shares of Series E preferred stock will be converted into 100,000,000 shares of common stock on January 1, 2023.

On September 30, 2022, the Company reversed the acquisition of GDF, canceling the 5,000,000 shares of Series E preferred stock previously issued, with immediate effect.

As at December 31, 2022, the Company had a total of 90,002 shares of Preferred Stock issued and outstanding.

Common Stock

As at December 31, 2022, the Company is authorized to issue up to 6,500,000,000 shares of Common Stock (reduced from 10,900,000,000 on October 8, 2021 and increased again from 4,500,000,000 to 6,500,000,000 on October 26, 2022) with par value \$0.00001.

As at January 1, 2021, the Company had 2,778,905,549 shares of Common Stock issued and outstanding.

On August 30, 2021 the Company issued 2,000,000,000 shares of Common Stock to a consultant for services of \$4,000,000, or \$.002 per share.

On October 8, 2021 the Company bought back and canceled 1,750,000,000 shares of Common Stock from various shareholders.

On February 17, 2022 the Company issued 300,000,000 shares of Common Stock to a debt holder for debt conversion of \$75,000, or \$.00025 per share.

On May 11, 2022 the Company issued 300,000,000 shares of Common Stock to a debt holder for debt conversion of \$75,000, or \$.00025 per share.

On October 20, 2022 the Company issued 300,000,000 shares of Common Stock to a debt holder for debt conversion of \$75,000, or \$.00025 per share.

On December 1, 2022 the Company issued 300,000,000 shares of Common Stock to a consultant for services of \$30,000, or \$.0001 per share.

As at December 31, 2022, there were 4,228,905,549 shares of Common Stock issued and outstanding.

In addition, there were 300,000,000 shares subscribed for, which were subsequently issued on January 19, 2023, as part of a settlement with Southridge.

NOTE 9. DERIVATIVE LIABILITIES

The Company applies the provisions of ASC Topic 815-40, Contracts in Entity's Own Equity ("ASC Topic 815-40"), under which convertible instruments, which contain terms that protect holders from declines in the stock price (reset provisions), may not be exempt from derivative accounting treatment. As a result, embedded conversion options in convertible debt are recorded as a liability and are revalued at fair value at each reporting date. If the fair value of the note exceeds the face value of the related debt, the excess is recorded as change in fair value in operations on the issuance date.

The Company originally identified embedded derivatives related to the Convertible Loan Note issued in August 2016 totaling \$260,000. These embedded derivatives included certain conversion features. The accounting treatment of derivative financial instruments requires that the Company record the fair value of the derivatives as of the inception date of the Convertible Promissory Notes and to adjust the fair value as of each subsequent balance sheet date.

Dividend yield	0.00%
Volatility	133.00%
Risk-free rate	1.18%

The initial fair value of the embedded debt derivative was \$283,469. The proceeds of the note of \$260,000 was allocated as a debt discount. The amount in excess of the proceeds of the loan note of \$23,469 was charged as interest to the Statement of Operations for the period.

The fair value of the embedded debt derivative was reviewed at December 31, 2022, using the following inputs:

Dividend yield	0.00%
Volatility	219.68%
Risk-free rate	3.75%

The fair value of the embedded debt derivative at December 31, 2022 was \$41,853, an increase in the valuation of the embedded debt derivative of \$617 for the period.

The following table provides a summary of changes in fair value of the Company's Level 3 derivative liabilities as at December 31, 2022:

	December 31, 2022,	December 31, 2021,
Balance, beginning of period	\$ 41,236	\$ 38,919
Additions	-	-
Mark-to-market at modification date	617	2,317
Reclassified to additional paid-in capital upon modification of term	-	-
Balance, December 31, 2022	\$ 41,853	\$ 41,236
Net loss due to change in fair value for the year included in statement of operations	\$ (617)	\$ (2,317)

This mark-to-market increase of \$617 for the year ending December 31, 2022 was charged to the statement of operations as a loss on change in value of derivative liabilities.

NOTE 10. INCOME TAXES

The Company uses the assets and liability method of accounting for income taxes pursuant to SFAS No. 109 "Accounting for Income Taxes". Under the assets and liability method of SFAS No. 109, deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statements carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

In June 2006, the FASB issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes." Specifically, the pronouncement prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken from year ended December 31, 2015 tax return onwards. The interpretation also provides guidance on the related derecognition, classification, interest and penalties, accounting for interim periods, disclosure and transition of uncertain tax positions. The Company adopted this interpretation effective on inception.

For the year ended December 31, 2022, the Company had available for US federal income tax purposes net operating loss carryovers of \$15,171,786, all of which will expire by 2042.

The Company has provided a full valuation allowance against the full amount of the net operating loss benefit, since, in the opinion of management, based upon the earnings history of the Company, it is more likely than not that the benefits will not be realized.

	December 31, 2022	December 31, 2021
Statutory federal income tax rate	21.00%	21.00%
Statutory state income tax rate	0.00%	0.00%
Valuation allowance	(21.00%)	(21.00%)
Effective tax rate	0.00%	0.00%

Deferred income taxes result from temporary differences in the recognition of income and expenses for financial reporting purposes and for tax purposes. The tax effect of these temporary differences representing deferred tax assets result principally from the following:

Deferred Tax Assets (Gross Values)	December 31, 2022	December 31, 2021
Net operating loss carry forward	\$ (16,251,294)	\$ (15,299,499)
Less valuation allowance	16,251,294	15,299,499
Net deferred tax asset	\$ -	\$ -

NOTE 11. RELATED PARTY TRANSACTIONS

There were related party transactions during the year ending December 31, 2022 and the 2021.

During the year ending December 31, 2021, the Company's CEO, Jason Schlenk, advanced the Company \$2,200, followed by an advance of \$30,592 during the nine months ended September 30, 2022, for a total outstanding of \$32,792. There is no interest on this amount and no deadline for repayment.

NOTE 12. SUBSEQUENT EVENTS

Subsequent to December 31, 2022, the Company reported the following events:

On January 19, 2023, the Company issued a final amount of 300,000,000 shares of common stock to Southridge valued at \$30,000, to add to a similar issuance made in December 2022, to complete the settlement for loans and preferred stock that were claimed to be outstanding by the complainant.
