EXPLANATORY NOTE

Solar Integrated Roofing Corp. (the “Company”) filed its annual disclosure statement for the year ended December 31, 2022 with the OTC Markets on April 28, 2023 and its 10-Q statement for the three and nine months ended September 30, 2022 on November 21, 2022. The unaudited consolidated financial statements included in this September 30, 2023 quarterly disclosure statement reflect the restatement of work-in-progress accounts receivable (net), goodwill, and revenue, and the resulting effects on net income, and earnings (loss) per share, as of December 31, 2022 and for the three and nine months ended September 30, 2023 and 2022.

Following the recent departure of certain prior members of management, the Company performed an evaluation of its accounting for revenues and business acquisitions. New management concluded its evaluation and determined that the identified errors require the restatement of its consolidated financial statements and filing of amended quarterly and annual disclosure reports for each of the periods within the year ended December 31, 2022 and three months ended March 31, 2023. The Company is in the process of preparing its restated quarterly and annual consolidated financial statements and will file amended disclosure statements thereto with the OTC Markets as soon as is practicable. Additional discussion of the restatement is included in Note 8 to the unaudited consolidated financial statements within this September 30, 2023 quarterly disclosure statement

SOLAR INTEGRATED ROOFING CORP.
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS
SEPTEMBER 30, 2023 AND 2022

NOTE 1 – BACKGROUND AND ORGANIZATION

Business Operations

Solar Integrated Roofing Corp. (“SIRC” or the “Company”) is a fully integrated roofing, residential solar, commercial solar/microgrid, electric vehicle (EV) charging and financing business focused on selling and installing systems, specializing in commercial and residential properties, targeting the North American solar market with specific strength in the Southern California market. Under the SIRC brand, the Company has acquired 14 companies that provide specific services to solar customers. The acquired businesses have a high degree of complimentary services and as such, SIRC is setting up divisions to specifically address the strengths of each product offering and provide significant cross selling opportunities across roofing, residential solar, commercial solar/microgrids, EV charging/battery back-up and project financing. To date, the major areas of operations include delivery of installation services, battery storage solutions, electric vehicle charging solutions, and roofing services.

The Company was incorporated under the laws of the state of Nevada on May 1, 2007 as Sterling Oil & Gas Company. The name was changed on February 14, 2014 to Landstar Development Group. On November 9, 2015, the Board of Directors of SIRC approved a name change to Solar Integrated Roofing Corp.

On February 11, 2016, the Company acquired the issued and outstanding shares of Secure Roofing and Solar Inc. (“SRS”) whereby the shareholders of SIRC became the controlling shareholders of the combined entity. David Massey, the Company’s former CEO and CFO, held 100% share ownership in SRS and was issued 10,000,000 common shares of SIRC for 100% of the issued and outstanding shares of SRS.

On May 15, 2023, David Massey resigned from CEO and CFO positions with the Company. Effective May 15, 2023, Brad Rinehart was appointed as CEO, Troy Clymer was appointed as President and COO and Wanda Witoslawski was appointed as CFO. Brad Rinehart, Troy Clymer, and Wanda Witoslawski were appointed to the Board of Directors on May 15, 2023 and on May 24, 2023 David Massey resigned from the Board of Directors of Solar Integrated Roofing Corp.

Global supply chain disruptions are prevalent in the renewable energy industry and are most acute in the residential and commercial PV markets. While domestic and international manufacturers in this space are starting to make strides in rectifying some of the major issues, several factors are having overall detrimental impacts to US renewable installers and developers. The three main factors contributing to adverse market conditions are equipment pricing, manufacturing delays and shortages, labor disruptions and logistics. At times, these factors overlap, but each factor has a unique impact on business operations and metrics.

NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements (unaudited) are condensed and have been prepared in accordance with generally accepted accounting principles in the United States of America (“US GAAP”) and the rules and regulations of the Securities and Exchange Commission (the “SEC”) and Regulation S-X. Certain information and note disclosures normally included in financial statements prepared in accordance with US GAAP, have been condensed or omitted from these statements pursuant to such rules and regulations and, accordingly, they do not include all the information and notes necessary for comprehensive financial statements and should be read in conjunction with our audited consolidated financial statements included in our annual disclosure statement for the year ended December 31, 2022. The results of operations for the nine months ended September 30, 2023 are not necessarily indicative of the operating results for the full year ended December 31, 2023.

In the opinion of management, all adjustments (consisting of normal recurring items) necessary to present fairly the Company's financial position, results of operations, and cash flows as of and for the nine months ended September 30, 2023, and 2022, have been made.

Principles of Consolidation

The accompanying consolidated financial statements include the accounts of Solar Integrated Roofing Corp. and its wholly-owned subsidiaries: Secure Roofing and Solar Inc., Narrate LLC, McKay Roofing Company, Inc., Milholland Electric, Inc., Montross Companies, Inc., Enerev LLC, Balance Authority, LLC, Kinetic Investments Inc. dba Future Home power, USA Solar Network LLC, SunUp Solar LLC and Renovation Roofing, Inc., which are included in the financial statements of the Company as of their respective acquisition dates. Pacific Lighting Management, Inc. and SunUp Solar were the only subsidiaries acquired at 60% so the Company includes non-controlling interest in its consolidated financial statements.

During the nine months ended September 30, 2023 and 2022, the Company did not acquire any entities. During the year ended December

31, 2022, the Company eliminated and rescinded the agreement regarding Cornerstone Construction Team, LLC as of May 31, 2022. The Company has consolidated the operations for the entity up until the rescission date of May 31, 2022. The Company recovered the previously issued 45,000,000 shares of common stock issued in connection with the merger to the entity’s previous ownership group. The Company also issued 8,000,000 shares of common stock valued at \$1,748,000, which was valued using the stock price on the day of legal settlement and recorded as compensation expense in the consolidated statement of operations for the year ended December 31, 2022. All Cornerstone assets and liabilities were eliminated from the Company’s consolidated financial statements on May 31, 2022. On November 4, 2022, the Company sold Approved Home Pros back to its original owner for the price of \$96,950. All Approved Home Pros assets and liabilities were eliminated from the Company’s consolidated financial statements on November 4, 2022. On March 13, 2023, the Company acquired an additional 40% of Pacific Lighting Management, Inc. for \$600,000 to be paid in 3 monthly installments. As of September 30, 2023, \$400,000 was paid and \$200,000 accrued.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Significant estimates include the estimated useful lives of property and equipment, allowance for doubtful accounts, impairment of long-lived assets, and the valuation of debt and equity transactions. Actual results could differ from those estimates.

Concentrations of Credit Risk

The Company maintains its cash in bank deposit accounts, the balances of which at times may exceed federally insured limits. The Company continually monitors its banking relationships and consequently has not experienced any losses in its accounts. As of September 30, 2023 and December 31, 2022, management believes the Company is not exposed to any significant credit risk on cash.

Cash Equivalents

The Company considers all highly liquid investments with a maturity of three months or less when purchased to be cash equivalents. Cash and cash equivalents were \$202,023 as of September 30, 2023 and \$422,528 as of December 31, 2022.

Accounts Receivable

Management reviews accounts receivable periodically to determine if any receivables will potentially be uncollectible. Management’s evaluation includes several factors including the aging of the account balances, a review of significant past due accounts, economic conditions, and our historical write- off experience, net of recoveries. The Company includes any accounts receivable balances that are determined to be uncollectible, along with a general reserve, in its allowance for doubtful accounts. After all attempts to collect a receivable have failed, the receivable is written off against the allowance. The Company’s allowance for doubtful accounts was \$164,874 and \$40,874 as of September 30, 2023 and December 31, 2022, respectively, and no individual customer owed in excess of 10% of the trade accounts receivable balances of \$2,292,749 or \$5,382,032, respectively.

Inventory

The Company’s inventory is valued at the lower of cost (the purchase price) or market. Inventory costs are determined based on the average cost basis. A reserve for slow-moving and potentially obsolete inventories is recorded as of each balance sheet date and total inventories are presented net of that reserve. Inventory consists primarily of solar panels. As of September 30, 2023, management evaluated all held inventory for obsolete or slow-moving parts and did not identify any.

Property and Equipment

Property and equipment are carried at cost less amortization and depreciation. Major betterments that extend the useful lives of assets are also capitalized. Normal maintenance and repairs are charged to expense as incurred. When assets are sold or otherwise disposed of, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is recognized in operations. Property and equipment consist of Vehicles, Computer Equipment, Machinery and Equipment, Furniture and Equipment which are depreciated on a straight-line basis over their expected useful lives as follows.

Vehicles	5 years
Computer Equipment	5 years
Machinery and Equipment	5 years
Furniture & Equipment	5 years

Leases

The Company follows the ASC 842, *Leases*, which requires an entity to recognize a right-of-use asset and a lease liability for virtually all leases. The Company elected to exclude from its balance sheets recognition of leases having a term of 12 months or less (short-term leases”). Lease expense is recognized on a straight-line basis over the lease term. See Note 13 for further information regarding the Company’s leases.

Advertising

The Company conducts advertising for the promotion of its services. In accordance with ASC 720-35, advertising costs are charged to

operations when incurred. The Company incurred \$291,413 and \$259,735 in marketing and advertising expenses during the nine months ended September 30, 2023 and 2022, respectively.

Fair Value of Financial Instruments

ASC 825-10, *Financial Instruments*, requires disclosure of the fair value of certain financial instruments. The carrying value of cash and cash equivalents, accounts payable and accrued liabilities, and short-term borrowings, as reflected in the balance sheets, are of approximately fair value because of the short-term maturity of these instruments. All other significant financial assets, financial liabilities and equity instruments of the Company are either recognized or disclosed in the financial statements together with other information relevant for making a reasonable assessment of future cash flows, interest rate risk and credit risk. Where practicable the fair values of financial assets and financial liabilities have been determined and disclosed; otherwise only available information pertinent to fair value has been disclosed.

The Company follows ASC 820-10, Fair Value Measurements and Disclosures, and ASC 825-10, Financial Instruments, which permit entities to choose to measure many financial instruments and certain other items at fair value. ASC 820 establishes a fair value hierarchy which prioritizes the inputs to valuation techniques used to measure fair value into three (3) broad levels. The fair value hierarchy gives the highest priority to quoted prices (unadjusted) in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The three (3) levels of fair value hierarchy defined by ASC 820 are described below:

Level 1: Quoted market prices available in active markets for identical assets or liabilities as of the reporting date.

Level 2: Pricing inputs other than quoted prices in active markets included in Level 1, which are either directly or indirectly observable as of the reporting date.

Level 3: Pricing inputs that are generally unobservable inputs and not corroborated by market data.

The carrying value of the Company’s current assets and liabilities is deemed to be fair market value due to the short-term nature of these instruments. The Company did not have any Level 2 financial instruments as of September 30, 2023 and December 31, 2022, while the Company’s Level 3 derivative liabilities are detailed in Note 11.

Revenue Recognition

The Company recognizes revenue in accordance with ASC 606, Revenue from Contracts with Customers, when satisfying the performance obligation of the associated contract that reflects the consideration expected to be received based on the terms of the contract.

Solar Integrated Roofing Corp. has chosen to utilize the “Output Method” of ASC 606 as a means of recognizing revenue in accordance with performance obligation milestones within their executed contracts. The Output Method as defined in ASC 606 are incremental goods or services that are instrumental and necessary to fulfill the complete project that have been verified to be completed. These outputs are the result of processes applied to inputs in a business. In other words, the Output Method measures the results achieved and value that is passed on to the customer in relation to the contract as a whole. In implementation, the Company has determined the incremental milestones of a project ranging from contract inception to project completion, with each progressing milestone providing additional services to the end client. Per the guidelines of ASC 606, the Company then tracks the progress toward completion of the contract by measuring outputs to date relative to total estimated outputs needed to satisfy the performance obligation.

As the different subsidiaries of the Company encompass many different business models, there exist different metrics for each of the subsidiaries in regard to intervals/milestones qualifying a specific level of revenue recognition. The business types are as follows:

- ☐ Roofing Companies
- ☐ Sales Organizations
- ☐ Claims Management Companies
- ☐ Solar Installation Companies
- ☐ Alternative Energy Companies
- ☐ Service Organizations

ASC 606 has five general components which formulate the basis of the revenue process. In observation of the Output Method, the five components and brief explanations as to how each applies to the revenue recognition model the Company has adopted are as follows:

(i) Identify the contract, or contracts, with a customer.

A contract is an agreement or purchase order between two or more parties that creates enforceable rights and obligations. In evaluating the

contract, the Company analyzes the customer’s intent and ability to pay the amount of promised consideration (credit risk) and considers the probability of collecting substantially all of the consideration.

(ii) Identify the performance obligations in the contract.

At a contract’s inception, the Company assesses the goods or services promised in a contract with a customer and identifies the performance obligations. The main performance obligations are the provisions of the following:

- ☐ Project Specifics
 - ☐ Site Visit
 - ☐ Engineering Design
 - ☐ Permitting
 - ☐ Utility Interconnection, if applicable
 - ☐ Project Installation
 - ☐ Project Completion

(iii) Determine the transaction price

The transaction price is the amount of consideration to which the Company is entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties. When a contract provides a customer with payment terms of more than a year, the Company considers whether those terms create variability in the transaction price and whether a significant financing component exists. As of September 30, 2023, the Company has not provided payment terms of more than a year.

(iv) Allocate the transaction price to the performance obligations in the contract.

The Company performs an allocation of the transaction price to each separate performance obligation, known as milestones. The allocated milestone payments are based upon multiple factors:

- ☐ Hard costs for materials needed to fulfill the current milestone.
- ☐ Soft costs upon the milestone being achieved (sales commissions, labor costs)
- ☐ Overhead and incidentals to be allocated at the specific milestones of a project.

(v) Recognize revenue when, or as, the Company satisfies a performance obligation.

The Company recognizes revenue incrementally upon its fulfillment of each specific performance obligation milestone as outlined in the underlying contract utilizing the Output Method.

During the three months ended September 30, 2023 and 2022, the Company derived its revenues from the following:

- residential solar sales and installation: approximately \$2.3 million and \$28.0 million, respectively
- commercial solar: approximately \$0 million and \$12.3 million, respectively
- roofing construction: approximately \$0.7 million and \$3.7 million, respectively
- EV charging stations: approximately \$0.7 million and \$0.3 million, respectively
- supplemental/shared services: approximately \$1.1 million and \$1.0 million, respectively

During the nine months ended September 30, 2023 and 2022, the Company derived its revenues from the following:

- residential solar sales and installation: approximately \$11.7 million and \$71.4 million, respectively
- commercial solar: approximately \$14.2 million and \$27.6 million, respectively
- roofing construction: approximately \$3.9 million and \$11.3 million, respectively
- EV charging stations: approximately \$1.5 million and \$2.1 million, respectively
- supplemental/shared services: approximately \$2.7 million and \$2.3 million, respectively

The Company analyses whether gross sales as the principal, or net sales as the agent, should be recorded. Since the Company assumes all risk of loss, has control over establishing price, and has control over the related costs associated with earning revenues, the Company is

the principal, and as such has recorded all revenues at the gross price.

Concentration of Revenue by Customer

During the nine months ended September 30, 2023 and 2022, no individual customers comprised above 10% of total revenue recognized.

Concentration of Revenue by Segment during the three months ended September 30, 2023 and 2022:

- residential solar sales and installation: approximately 48% and 42%, respectively
- commercial solar: approximately 0% and 49%, respectively
- roofing construction: approximately 15% and 6%, respectively
- EV charging stations: approximately 14% and 2%, respectively
- supplemental/shared services: approximately 23% and 1%, respectively

Concentration of Revenue by Segment during the nine months ended September 30, 2023 and 2022:

- residential solar sales and installation: approximately 34% and 62%, respectively
- commercial solar: approximately 41% and 24%, respectively
- roofing construction: approximately 12% and 10%, respectively
- EV charging stations: approximately 5% and 2%, respectively
- supplemental/shared services: approximately 8% and 2%, respectively

Segments and Disaggregated Revenue

The Company is a single source solar power and roofing system installation company operating and specializing in commercial and residential properties across the United States. The Company's operations are conducted in specific reportable segments: roofing construction, residential solar, commercial solar & microgrids, battery back-up & EV charging and project financing. The Company defines its segments because the operations are distinctly different from other areas within the Company as the Company has roofing contracts, solar installations (residential / commercial / microgrids), battery back-up and EV charging installations as well as finance and maintenance. All these areas are supported by our sales, marketing, and general and administrative teams. The Company's Chief Operating Officer regularly reviews these segments to align resources and analyze performance.

All of the Company's segments operate within the United States as the Company does not have any foreign sales or operations at this time. The Company's roofing segment is dedicated to services and products serving roofing construction, design, and maintenance. Construction of roofing projects and the design of roofing installations as well as the construction of the roofing projects all fall under this segment. The Company's residential solar segment serves the installation of solar systems within residential properties selling directly to consumers. The Company's commercial solar segments sell to larger renewal energy companies and to corporations seeking solar installations to offset utility expenses (i.e. urban housing, commercial properties, apartment buildings, etc.). The Company's EV charging services are centered around providing solutions for EV charging platforms through the planning, sourcing, and installation of these platforms for businesses and other agencies. Our financing efforts are done in support of these operating activities.

The Company measures the results of the segments by the following among other attributes: gross margin, operating income (which includes overhead corporate expense allocations), costs of sales and revenue. The Company revises the measurement of the reporting segments operating income, gross margin, and corporate overhead allocations from time to time as these metrics are regularly reviewed by the Chief Operating Officer.

As of September 30, 2023, approximately \$88 million worth of commercial projects is expected to be completed within the next 12 months. The Company expects to recognize revenue on these remaining performance obligations over the next year. The Company has elected to accrue installation and construction activities until the customer obtains control of the solar commercial project. Accordingly, the Company will accrue all related construction and installation costs (*Work in progress accounts payable*) and recognize Work in progress accounts receivable as revenue and Work in progress accounts payable as cost of sales once the performance obligations have been completed. The Company generally has payment terms with its customers of one year or less and has elected the practical expedient applicable to such contracts not to consider the time value of money over a longer period of time.

The Company measures the results of the segments by the following among other attributes: gross margin, operating income (which includes overhead corporate expense allocations), costs of sales and revenue. The Company revises the measurement of the reporting segments operating income, gross margin, and corporate overhead allocations from time to time as these metrics are regularly reviewed by the Chief Operating Officer. Information on the Company's operating segments, including the reconciliation to income is provided in the following table:

Segment data has been reported for revenues, profit margin and total assets per reportable segment. Segments that do not have data presented are not reported as they do not meet the threshold for reporting requirements. As noted in our segment data, total assets represent total assets that are reported and attributable to that segment, goodwill has been removed. Total assets consist of contract receivables, WIP receivable, fixed assets, and other assets.

Cost of Revenue

Cost of revenue consists primarily of costs related to raw materials, freight and delivery, product warranty, and personnel costs (salaries, bonuses, benefits, and stock-based compensation). Personnel costs in cost of revenue includes both direct labor costs as well as costs attributable to any individuals whose activities relate to the procurement, installment and delivery of the finished product and services. Deferred cost of revenue results from the timing differences between the costs incurred in advance of the satisfaction of all revenue recognition criteria consistent with our revenue recognition policy.

During the nine months ended September 30, 2023 and 2022, the Company incurred cost of revenue of \$23,618,752 and \$94,954,566, respectively.

Work in progress receivable is recorded when the Company has transferred services to the customers prior to receiving consideration and when the payment of consideration is contingent upon milestones performance obligation. The Company recognizes also the cost associated with reaching a specific milestone in the form of work in progress payable. As of September 30, 2023, the work in progress receivable was \$14,293,348 and work in progress payable was \$4,795,933, which were netted together as a contract asset work in progress receivable on the consolidated balance sheets in the amount of \$9,497,415. As of December 31, 2022, the work in progress receivable was \$9,881,585 and work in progress payable was \$4,882,215, which were netted together as a contract asset work in progress receivable on the consolidated balance sheets in the amount of \$4,999,370.

Income Taxes

The Company follows ASC 740, *Income Taxes*, which requires recognition of deferred tax assets and liabilities for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax assets and liabilities are based on the differences between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the fiscal year in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management concludes it is more likely than not that the assets will not be realized. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the fiscal years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in the Statements of Operations in the period that includes the enactment date.

The Company follows section 740-10-25 of the FASB Accounting Standards Codification with regards to uncertainty in income taxes. Section 740-10-25 addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. Under Section 740-10-25, the Company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent (50%) likelihood of being realized upon ultimate settlement. Section 740-10-25 also provides guidance on de-recognition, classification, interest and penalties on income taxes, accounting in interim periods and requires increased disclosures.

Stock-based Compensation

The Company accounts for employee and non-employee stock-based compensation in accordance with ASC 718, *Compensation—Stock Compensation*, which requires all share-based payments to employees and non-employees, including grants of stock options, to be recognized in the financial statements based on the grant date fair values of the equity instruments issued, which is charged directly to compensation expense over the requisite service or vesting period.

Net Income (Loss) per Common Share

Net income (loss) per common share is computed pursuant to ASC 260, *Earnings Per Share*. Basic net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock outstanding during the period. Diluted net income (loss) per common share is computed by dividing net income (loss) by the weighted average number of shares of common stock and potentially outstanding shares of common stock during the period.

During the three months ended September 30, 2023 and 2022, the Company's basic loss per share was \$0.00 and \$0.01, respectively, and diluted loss per share was \$0.00 and \$0.01, respectively.

During the nine months ended September 30, 2023 and 2022, the Company's basic income (loss) per share was \$0.02 and \$(0.01), respectively, and diluted income (loss) per share was \$0.01 and \$(0.01), respectively.

For the nine months ended September 30, 2023 and 2022, the Company's potentially dilutive instruments include convertible notes and associated accrued interest, stock payable, warrants, options, and convertible preferred stock. The total amount of "if-converted" shares of 599,112,229 and 77,014,464, respectively, are comprised of the following:

- convertible notes with interest— 144,612,229 and 5,504,464, respectively
- common shares to be issued – 133,000,000 and 7,000,000, respectively
- warrants and options – 84,500,000 and 7,500,000, respectively
- common shares issuable upon conversion of shares of Series B Preferred Stock – 237,000,000 and 57,010,000, respectively

Business Combinations

In accordance with ASC 805, *Business Combinations*, the Company accounts for all business combinations using the acquisition method of accounting. Under this method, assets, and liabilities, including any remaining non-controlling interests, are recognized at fair value at the date of acquisition. The excess of the purchase price over the fair value of assets acquired, net of liabilities assumed, and non-controlling interests is recognized as goodwill. Certain adjustments to the assessed fair values of the assets, liabilities, or non-controlling interests made subsequent to the acquisition date, but within the measurement period, which is up to one year, are recorded as adjustments to goodwill. Any adjustments subsequent to the measurement period are recorded in income. Any cost or equity method interest that the Company holds in the acquired company prior to the acquisition is re-measured to fair value at acquisition with a resulting gain or loss recognized in income for the difference between fair value and the existing book value. Results of operations of the acquired entity are included in the Company's results from the date of the acquisition onward and include amortization expense arising from acquired tangible and intangible assets.

Goodwill

The Company allocates goodwill to reporting units based on the reporting unit expected to benefit from the business combination. We evaluate our reporting units on an annual basis and, if necessary, reassign goodwill using a relative fair value allocation approach. Goodwill is tested for impairment at the reporting unit level (operating segment or one level below an operating segment) on an annual basis and between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value. These events or circumstances could include a significant change in the business climate, legal factors, operating performance indicators, competition, or sale or disposition of a significant portion of a reporting unit.

Application of the goodwill impairment test requires judgment, including the identification of reporting units, assignment of assets and liabilities to reporting units, assignment of goodwill to reporting units, and determination of the fair value of each reporting unit. The fair value of each reporting unit is estimated primarily using a discounted cash flow methodology. This analysis requires significant judgments, including estimation of future cash flows, which is dependent on internal forecasts, estimation of the long-term rate of growth for our business, estimation of the useful life over which cash flows will occur, and determination of our weighted average cost of capital.

The estimates are used to calculate the fair value of a reporting unit change from year to year based on operating results, market conditions, and other factors. Changes in these estimates and assumptions could materially affect the determination of fair value and goodwill impairment for each reporting unit.

During the nine months ended September 30, 2023 and 2022, there was no goodwill impairment recorded.

Impairment of Long-Lived Assets

Tangible and intangible assets (excluding goodwill) are assessed at each reporting date for indications that an asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Company makes an estimate of the asset's recoverable amount. The asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs of disposal and its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or a group of assets exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or the group of assets.

Derivative Financial Instruments

The Company does not use derivative instruments to hedge exposures to cash flow, market, or foreign currency risks. The Company evaluates all of its financial instruments to determine if such instruments are derivatives or contain features that qualify as embedded derivatives. For derivative financial instruments that are accounted for as liabilities, the derivative instrument is initially recorded at its fair value and is then re-valued at each reporting date, with changes in the fair value reported in the statements of operations. For stock-based derivative financial instruments, the Company uses the Black Scholes valuation model to value the derivative instruments at

inception and on subsequent valuation dates. The classification of derivative instruments, including whether such instruments should be recorded as liabilities or as equity, is evaluated at the end of each reporting period. Derivative liabilities are classified in the balance sheet as current or non-current based on whether or not net-cash settlement or conversion of the instrument could be required within 12 months of the balance sheet date.

Recent Accounting Pronouncements

In August 2020, the FASB issued ASU 2020-06, ASC Subtopic 470-20, *“Debt—Debt with ‘Conversion and Other Options, and ASC subtopic 815-40, Hedging—Contracts in Entity’s Own Equity*. The standard reduced the number of accounting models for convertible debt instruments and convertible preferred stock. Convertible instruments that continue to be subject to separation models are (1) those with embedded conversion features that are not clearly and closely related to the host contract, that meet the definition of a derivative, and that do not qualify for a scope exception from derivative accounting; and (2) convertible debt instruments issued with substantial premiums for which the premiums are recorded as paid-in capital. The amendments in this update are effective for fiscal years beginning after December 15, 2021, including interim periods within those fiscal years. Early adoption is permitted, but no earlier than fiscal years beginning after December 15, 2020, including interim periods within those fiscal years. The Company adopted this standard on January 1, 2021, but there was no resulting material impact on the financial statements.

The Company has implemented all the new accounting pronouncements that are in effect. These pronouncements did not have any material impact on the financial statements unless otherwise disclosed, and the Company does not believe that there are any other new accounting pronouncements that have been issued that might have a material impact on its financial position or results of operations.

Warrants and options.

The Company has issued Common Stock warrants in connection with the execution of certain equity and debt financings. The warrants carry fixed exercise prices, and their values are determined using the Black Scholes option pricing model. During the nine months ended September 30, 2023 and 2022, the Company issued 25,000,000 options at \$0.0138 price valued \$345,000 and canceled 57,500,000 options valued \$220,800 and 0 shares, respectively.

NOTE 3 – GOING CONCERN

The accompanying consolidated financial statements have been prepared in accordance with U.S. GAAP, which contemplates the continuation of the Company as a going concern and realization of assets and the satisfaction of liabilities in the normal course of business. At September 30, 2023 and December 31, 2022, the Company had cash of \$202,023 and \$422,528, respectively and a negative working capital of \$17,286,964 and \$35,558,081, respectively. The Company has accumulated deficit of \$79,030,759 at September 30, 2023, and \$91,051,980 at December 31, 2022. The Company had a net income attributable to the Company of \$12,021,221 and a loss of \$5,025,153 for the nine months ended September 30, 2023 and 2022, respectively. However, net cash used in operating activities for the nine months ended September 30, 2023 was \$2,684,322 and \$5,635,152 for the nine months ended September 30, 2022. In addition, the Company continues to rely on financing activities, which generated positive cash flows of \$2,970,557 and \$5,724,400 during the nine months ended September 30, 2023 and 2022, respectively.

These factors among others present substantial doubt about the Company’s ability to continue as going concern. The Company’s ability to continue as a going concern is dependent upon its ability to repay or settle its current indebtedness, generate positive cash flow from operations, and/or raise capital through equity and debt financing or other means on desirable terms. If the Company is unable to obtain additional funds when they are required or if the funds cannot be obtained on favorable terms, management may be required to restructure the Company or cease operations. The consolidated financial statements do not include any adjustments that might result from the outcome of these uncertainties.

The Company intends to raise additional capital through private placements of debt and equity securities, but there can be no assurance that these funds will be available on terms acceptable to the Company, or will be sufficient to enable the Company to fully complete its development activities or sustain operations. If the Company is unable to raise sufficient additional funds, it will have to develop and implement a plan to further extend payables, reduce overhead, or scale back its current business plan until sufficient additional capital is raised to support further operations. There can be no assurance that such a plan will be successful.

NOTE 8 – RESTATEMENT OF PREVIOUSLY ISSUED FINANCIAL STATEMENTS

Following the departure of certain prior members of management, the Company performed an evaluation of its accounting for revenues and business acquisitions. New management concluded its evaluation and determined that the identified errors require the restatement of its consolidated financial statements and filing of amended quarterly and annual disclosure reports for each of the periods within the year ended December 31, 2022 and three months ended March 31, 2023. Specifically, management determined that it had overvalued a recently acquired entity and that the associated goodwill had been overstated. Concurrent with this transaction and various other recent business acquisitions, the Company had devised a vertically-integrated revenue recognition policy that over time has proven to not align with the provisions of ASC 606, *Revenue from Contracts with Customers*, as closely as had originally been anticipated, resulting in inflated revenue and associated work-in-progress components.

To more appropriately reflect the value of the acquired business and recognition of revenue in accordance with ASC 606, the following adjustments have been retroactively applied to the December 31, 2022, September 30, 2022, June 30, 2022, and March 31, 2022 balances reported in the accompanying consolidated financial statements:

The March 31, 2023 consolidated statement of operations was not affected by the restatement, so there are no adjustments to present for this period presented within the consolidated statement of stockholders' equity (deficit).

NOTE 9 – DEBENTURE PAYABLE

In January 2020, the Company received \$2,400,000 for the issuance of a senior secured redeemable debenture. The debenture bears interest at 16% and matures 24 months after issuance. As of September 30, 2023 and December 31, 2022, no principal has been repaid, and accrued interest totals \$999,125 and \$726,637, respectively. The Company has not been able to make any payments on this debenture as the investor's bank account has been closed and there is no contact information available. As such there has been no provision for default terms upon the January 2022 maturity.

During the nine months ended September 30, 2023, the Company received \$2,104,010 in convertible debt, repaid \$156,265 and \$380,000 of accrued interest was converted into 38,000,000 shares.

During the year ended December 31, 2022, \$2,680,924 in principal and interest was converted to 71,876,078 shares of common stock. On June 23, 2022, the Company entered into Buyout Agreement with Granite Global Value Investments LTD, where the Company agreed to pay \$14,000,000 for all outstanding convertible notes between the parties (the “New Note”) upon the Company receiving funding from third parties or investors or until they have the funds available to pay the New Note. The aggregate principal of the convertible notes was \$12,668,535, plus accrued interest of \$62,532, for a total of \$12,731,067 (collectively the “Old Note”). The terms and cash flows of the New Note are significantly different than the terms and cash flows of the Old Note, as the New Note is non-interest bearing, and has no maturity date or conversion feature. As such, note modification has been accounted for as an extinguishment of the Old Note and issuance of the “New note,” and the difference between the Old Note and New Note of \$1,268,933 has been recorded as loss on modification of debt.

Currently most of the above convertible notes are in default. During the nine months ended September 30, 2023, the Company issued 12,000,000 shares to AJB Capital Investments LLC for loan modification valued \$529,300.

During the nine months ended September 30, 2022, the Company received proceeds of \$2,440,000.

NOTE 11 – DERIVATIVE LIABILITIES

The Company analyzed the conversion option for derivative accounting consideration under ASC 815, “*Derivatives and Hedging*,” and determined that the variable conversion option within one of the Company’s convertible notes should be classified as a liability since the conversion option becomes effective at issuance resulting in there being no explicit limit to the number of shares to be delivered upon settlement of the above conversion options. During the nine months ended September 30, 2023, the Company received 5 convertible notes of \$604,010 with derivative liabilities and one note was reclassified from note payable to convertible debt with a balance of \$127,500. The new derivative liabilities were calculated using the Black-Scholes option-pricing model.

The Company determined our derivative liabilities to be a Level 3 fair value measurement and used the Black-Scholes pricing model to calculate the fair value. The Black-Scholes model requires six basic data inputs: the exercise or strike price, expected term, the risk-free interest rate, the current stock price, the estimated volatility of the stock price in the future, and the dividend rate. Changes to these inputs could produce a significantly higher or lower fair value measurement.

The following table summarizes the derivative liabilities included in the balance sheet at September 30, 2023 and September 30, 2022:

Fair Value Measurements Using Significant Observable Inputs (Level 3)	
Balance – December 31, 2021	\$ 10,049
Gain on change in fair value of the derivative liability	(10,049)
Addition of new derivative liabilities	53,295
Balance – September 30, 2022	\$ 53,295
Balance – December 31, 2022	\$ 15,699
Reduction of derivative liability from payoff of convertible note	(604,010)
Addition of new derivative liabilities	604,010
Gain on change in fair value of the derivative liabilities	256,615
Balance – September 30, 2023	\$ 272,314

The table below shows the Black-Scholes option-pricing model inputs used by the Company to value the derivative liability at each measurement date:

	Nine Months ended September 30, 2023	Nine Months ended September 30, 2022
Expected term	0.01 – 0.63 years	n/a
Expected average volatility	139 %	n/a

The Company used the Black-Scholes pricing model to calculate the fair value of warrants on the grant date. The Black-Scholes model requires basic data inputs: the exercise or strike price, time to expiration, the current stock price, and the estimated volatility of the stock price in the future. Changes to these inputs could produce a significantly higher or lower fair value measurement. The fair values of the warrants and options are estimated using the Black Scholes valuation model as follows:

Litigation

In the normal course of business, the Company may be involved in legal proceedings, claims and assessments arising in the ordinary course of business. Such matters are subject to many uncertainties, and outcomes are not predictable with assurance. Legal fees for such matters are expensed as incurred and we accrue adverse outcomes as they become probable and estimable.

Below is the summary of current legal proceedings:

Pending Litigation

American Builders and Contractors Supply Co. v. SIRC, et al. – ABC Supply filed summons against SIRC on October 16, 2023 in the amount of \$643,269.07 for funds owed for materials used for solar and roofing projects. The case was filed in Superior Court of the State of California, county of San Diego. The Company agreed to owed amount and is negotiating payment plan to repay owed funds.

SIRC v. ContractorCoachPro, LLC, et al. – SIRC initiated this arbitration proceeding with the American Arbitration Association in late 2021. SIRC brought action for money damages against ContractorCoachPro and American Contractor, LLC for, among other things, their breach of a joint venture agreement and misappropriation of trade secrets. On May 6, 2022, SIRC filed a petition in the United States District Court of Nevada to compel arbitration under the principal parties' agreement. SIRC's petition to compel arbitration was granted on November 21, 2022. SIRC is owed about \$20,000 and has been offered \$12,000 to settle.

1536 Blue Jay Way, LLC v. Craig R. Williams Construction, Inc., et al. – This is a pending lawsuit in the Superior Court of California, County of Los Angeles (Case No. 20STCV12854. The plaintiff-initiated suit on April 1, 2020 alleging various construction defect claims concerning a residential development in Los Angeles County. Secure Roofing & Solar ("SRS") was subsequently named as a defendant under a mistaken belief that SRS performed services to the jobsite, which it did not. SRS is contesting the claims and filed a cross-complaint for indemnity.

Kenneth Martinez v. SIRC, et al. – This is a pending lawsuit in the Superior Court of California, County of San Diego. Kenneth Martinez was an hourly employee for Milholland Electric, Inc. His employment was terminated due to questions regarding hours worked versus hours claimed worked on job sites, and for possible discrepancies in materials used on job sites versus materials needed on job sites. Mr. Martinez has filed a lawsuit claiming he was not paid for hours worked. At this point it is undetermined what, if any, the potential exposure for SIRC is.

Nick Walpert v. SIRC, et al. – This is a pending lawsuit in the Superior Court of California, County of San Diego. Nick Walpert was employed as a Director of Human Resources for SIRC in early 2022 for approximately 30 days. His employment contract specifically states he was an At-Will employee. Mr. Walpert was terminated and has filed a wrongful termination lawsuit alleging he was fired for having Covid and refusing to return to work in the office. At this point, it is undetermined what, if any, the potential exposure for SIRC is.
