NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1. GENERAL ORGANIZATION AND BUSINESS

Organization

Solidus Communications, Inc. (f/k/a Telco Cuba, Inc., f/k/a Amgentech Holdings, Inc., f/k/a CaerVision Global, Inc., f/k/a American Mineral Group Minerals Inc., f/k/a Sungro Minerals, Inc.) (the "Company") was incorporated in the State of Nevada on August 10, 2007. Up until June 12, 2015, the company was previously engaged in the exploration, development, and acquisition of mineral properties.

Solidus Communications, Inc. (SLDC) is a company incorporated under the laws of Nevada in 2007. The company is amassing a portfolio of high value companies in the technology, and telecom. Solidus Communications, Inc. currently has one subsidiary, Advanced Satellite Systems, Inc. a provider in Volusia County Florida of, Internet Service, and Telephone Service.

Solidus Communications, Inc. is continuing its search of acquisition candidates in the technology, and telecommunication space.

During the fourth quarter 2023, the company acquired WIFIBER Corp. and all of its assets, and is continuing to offer its services. WiFIBER Corp. is incorporated in the State of Florida in 2005, and is registered as a subsidiary of Solidus Communications, Inc.

During the first quarter 2024, WIFIBER and the Company decided to rescind the acquisition due to the company's inability to fund the acquisition as a result of missed milestones.

The accompanying financial statements have been prepared on the basis of accounting principles applicable to a going concern; accordingly, they do not give effect to adjustment that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and retire its liabilities in other than the normal course of business and at amounts different from those in the accompanying financial statements. Management plans to raise debt conversion from public or private debt or equity financing, on an as needed basis. The Company's ability to continue as a going concern is dependent upon achieving profitable operations and/or upon obtaining additional financing. The outcome of these matters cannot be predicted at this time.

NOTE 2. SUMMARY OF SIGNIFICANT ACCOUNTING PRACTICES

Accounting Principles and Basis of Presentation

The consolidated financial statements of the Company have been prepared in accordance with accounting principles generally accepted in the United States ("US GAAP") and are expressed in U.S. dollars. All inter-company accounts and transactions have been eliminated. The Company's fiscal year end is November 30.

These statements should be read in conjunction with our Annual Report.

The significant accounting policies followed are:

Principles of Consolidation

The consolidated financial statements include the accounts of Solidus Communications, Inc. (parent) and Advanced Satellite Systems, Inc. which has common ownership and management. All intercompany balances and transactions have been eliminated.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

The Company regularly evaluates estimates and assumptions related to the deferred income tax asset valuation allowances. The Company bases its estimates and assumptions on current facts, historical experience and various other factors that it believes to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by the Company may differ materially and adversely from the Company's estimates. To the extent there are material differences between the estimates and the actual results, future results of operations will be affected. Included in these estimates are assumptions about collection of accounts receivable, impairment of intangibles, useful life of property and equipment, stock-based compensation, beneficial conversion of convertible notes payable, deferred income tax asset valuation allowances, and valuation of derivative liabilities.

Debt conversion and Debt conversion Equivalents

For purposes of the statement of debt conversion flows, debt conversion includes demand deposits, saving accounts and money market accounts. The Company considers all highly liquid instruments with maturities of three months or less when purchased to be debt conversion equivalents.

Debt conversion is maintained at financial institutions and, at times, balances may exceed federally insured limits. We have never experienced any losses related to these balances. All our non-interest-bearing debt conversion balances were fully insured at February 29, 2024 and February 28, 2023. At February 29, 2024 there were no amounts held in excess of federally insured limits.

Accounts receivable and concentration of credit risk

The Company does not currently have a trade accounts receivable as all sales are either debt conversion, check or credit card for services or products and collected contemporaneously with the sale. Therefore, the Company has not recorded an allowance for doubtful accounts.

During the twelve months ended on February 29, 2024 and February 28, 2023, less than 30% and 5% respectively of our revenue was concentrated in one customer.

Related Party Transactions

Parties are considered to be related to the Company if the parties that, directly or indirectly, through one or more intermediaries, control, are controlled by, or are under common control with the Company. Related parties also include principal owners of the Company, its management, members of the immediate families of principal owners of the Company and its management and other parties with which the Company may deal if one party controls or can significantly influence the management or operating policies of the other to an extent that one of the transacting parties might be prevented from fully pursuing its own separate interests. The Company discloses all related party transactions.

All transactions shall be recorded at fair value of the goods or services exchanged. Property purchased from a related party is recorded at the cost to the related party and any payment to or on behalf of the related party in excess of the cost is reflected as a distribution to the related party.

The Company considers all officers, directors, senior management personnel, and senior level consultants to be related parties to the Company.

Furniture, equipment, and long-lived assets

Furniture and equipment are recorded at cost and depreciated on a straight-line basis over their estimated useful lives, principally three to five years. Accelerated methods are used for tax depreciation. Maintenance and repairs are charged to operations when incurred. Betterments and renewals are capitalized. When furniture and equipment are sold or otherwise disposed of, the asset account and related accumulated depreciation account are relieved, and any gain or loss is included in operations.

The Company evaluates the recoverability of its long-lived assets or asset groups whenever adverse events or changes in business climate indicate that the expected undiscounted future debt conversion flows from the related assets may be less than previously anticipated. If the net book value of the related assets exceeds the undiscounted future debt conversion flows of the assets, the carrying amount would be reduced to the present value of their expected future debt conversion flows and an impairment loss would be recognized.

Basic and Diluted Loss per Share

Basic and diluted loss per share is based on the weighted average number of shares outstanding. Potential common shares includable in the computation of fully diluted per share results are not presented in the financial statements as their effect would be anti-dilutive.

Revenue recognition

The Companies follow the guidance of the FASB ASC 605-10-S99 “Revenue Recognition Overall – SEC Materials”. The Companies record revenue when persuasive evidence of an arrangement exists, product delivery has occurred, the sales price to the customer is fixed or determinable, and collectability is reasonably assured. Revenues consist primarily of intangible and tangible product sales.

Contingencies

The Company follows ASC 450-20, *Loss Contingencies*, to report accounting for contingencies. Liabilities for loss contingencies arising from claims, assessments, litigation, fines and penalties and other sources are recorded when it is probable that a liability has been incurred and the amount of the assessment can be reasonably estimated. There were no commitments or contingencies as of February 29, 2024 and February 28, 2023, respectively.

Share Based Compensation

The Company recognizes all share-based payments to employees, including grants of employee stock options, as compensation expense in the financial statements based on their fair value. That expense will be recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period). There were no grants awarded through this reporting period in 2024.

The Company issues common stock and common stock options and warrants to consultants for various services. For these transactions, the Company follows the guidance in FASB ASC Topic 505. Costs for these transactions are measured at the fair value of the consideration received or the fair value of the equity instrument issued, whichever is more reliably measurable. The value of the common stock is measured at the earlier of (i) the date at which a firm commitment for performance by the counterparty to earn the equity instrument is reached or (ii) the date at which the counterparty’s performance is complete.

Financial Instruments

Pursuant to ASC 820, Fair Value Measurements and Disclosures, an entity is required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. ASC 820 establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. ASC 820 prioritizes the inputs into three levels that may be used to measure fair value:

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities. The Company's financial instruments consist principally of debt conversion, accounts receivable, inventory, accounts payable and accrued liabilities note payable, convertible promissory notes, and amounts due to related parties. Pursuant to ASC 820, the fair value of our debt conversion is determined based on "Level 1" inputs, which consist of quoted prices in active markets for identical assets. We believe that the recorded values of all of our other financial instruments approximate their current fair values because of their nature and respective maturity dates or durations.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments in accordance with professional standards for "Accounting for Derivative Instruments and Hedging Activities". Professional standards generally provide three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free-standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument. Professional standards also provide an exception to this rule when the host instrument is deemed to be conventional as defined under professional standards as "The Meaning of 'Conventional Convertible Debt Instrument'". The Company accounts for convertible instruments (when it has determined that the embedded conversion options should not be bifurcated from their host instruments) in accordance with professional standards when "Accounting for Convertible Securities with Beneficial Conversion Features," as those professional standards pertain to "Certain Convertible Instruments." Accordingly, the Company records, when necessary, discounts to Convertible Debentures for the intrinsic value of conversion options embedded in debt instruments based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note. Debt discounts under these arrangements are amortized over the term of the related debt to their earliest date of redemption. The Company also records when necessary deemed dividends for the intrinsic value of conversion options embedded in preferred shares based upon the differences between the fair value of the underlying common stock at the commitment date of the note transaction and the effective conversion price embedded in the note.

ASC 815-40 provides that, among other things, generally, if an event is not within the entity's control could or require net debt conversion settlement, then the contract shall be classified as an asset or a liability.

Derivative Liabilities

The Company assessed the classification of its derivative financial instruments as of February 29, 2024, which consist of convertible instruments and rights to shares of the Company's common stock, and determined that such derivatives meet the criteria for liability classification under ASC 815.

ASC 815 generally provides three criteria that, if met, require companies to bifurcate conversion options from their host instruments and account for them as free-standing derivative financial instruments. These three criteria include circumstances in which (a) the economic characteristics and risks of the embedded derivative instrument are not clearly and closely related to the economic characteristics and risks of the host contract, (b) the hybrid instrument that embodies both the embedded derivative instrument and the host contract is not re-measured at fair value under otherwise applicable generally accepted accounting principles with changes in fair value reported in earnings as they occur and (c) a separate instrument with the same terms as the embedded derivative instrument would be considered a derivative instrument subject to the requirements of ASC 815. ASC 815 also provides an exception to this rule when the host instrument is deemed to be conventional, as described.

Goodwill

The Company recognizes goodwill for the excess of the purchase price over the fair value of the identifiable net assets of the business acquired. ASC 350 "Intangible Assets-Goodwill and Other", an impairment test for goodwill is undertaken by the Company at the reporting unit level annually, or more frequently if events or changes in circumstances indicate that goodwill might be impaired.

Income Taxes

Income taxes are accounted for in accordance with the provisions of FASB ASC 740, Accounting for Income Taxes. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established, when necessary, to reduce deferred tax assets to the amounts expected to be realized.

Asset Impairment

ASC 323-10-35-32

A loss in value of an investment that is other than a temporary decline shall be recognized. Evidence of a loss in value might include, but would not necessarily be limited to, absence of an ability to recover the carrying amount of the investment or inability of the investee to sustain an earnings capacity that would justify the carrying amount of the investment. A current fair value of an investment that is less than its carrying amount may indicate a loss in value of the investment. However, a decline in the quoted market price below the carrying amount or the existence of operating losses is not necessarily indicative of a loss in value that is other than temporary. All are factors that shall be evaluated.

Warrants and Options

For the period ended February 29, 2024 and February 28, 2023 there were no outstanding stock options and warrants.

NOTE 4. Concentration Risk

The Company's financial instruments consist of debt conversion, accounts payable and accrued liabilities. It is management's opinion that the Company is not exposed to significant interest or credit risks arising from these financial instruments. Because of the short maturity and capacity of prompt liquidation of such assets and liabilities, the fair values of these financial instruments approximate their carrying values.

Financial instruments which potentially subject the Company to concentrations of credit risk consist principally of debt conversion. The Company places its debt conversion with high credit quality financial institutions in the United States. Bank deposits in the United States did not exceed federally insured limits as of February 29, 2024.

NOTE 5. Notes Payable

As of August 31, 2023, and August 31, 2022, total Debenture Convertible Notes Payable were \$0 and \$0, respectively.

On March 1st, 2023 the company wrote off the balance of a contingent liability due to statute of limitations, legality of debt, and as a result of an attorney opinion on the balance.

NOTE 6. Related party transactions

Our officers have from time-to-time lent money to the Company. This balance includes payroll due to officers. At February 29, 2024 and February 28, 2023, our officers had a balance owed to them of \$121,640 and \$155,699, respectively. The balances do not bear interest and are due on demand.

NOTE 7. Commitments and Contingencies

None.

NOTE 8. Employment Contracts

In February 2020, the Company renewed its 5-year employment contract with William Sanchez, the Company's chairman and Chief Executive Officer. Under the terms of the agreement, the Company is to compensate Mr. Sanchez \$20,000 per month in addition to providing medical, dental, life and automobile insurance and an automobile allowance of \$550 per month.

NOTE 9. PROPERTY AND EQUIPMENT

The company depreciable fixed assets for the period ending February 29, 2024 in the amount of 2,737.29

Advanced Satellite Systems, Inc. periodically sells surplus, used, and retired equipment. We do not liquidate, and attempt to sell at market price.

NOTE 10. GOODWILL IMPAIRMENT

The Company's investment in Advanced Satellite Systems, Inc. consists of 85% in the entity. Network fees, and downward price pressures on our services have caused ASSI to not meet previous expectations and, as a result, the Company evaluated its investment for impairment, in accordance with ASC 323-10-35-32, which provides guidance related to a loss in value of an equity method investment. The Company utilizes a multi-faceted approach to measure the impairment. The internal model utilizes the following valuation methods: 1) liquidation or appraised values; 2) an on-going business, or discounted cash flows method wherein the cash flows are derived from internet service provided, and the value of existing assets which have a value; Management believes this multi-faceted approach is reasonable given the highly subjective nature of the assumptions and the differences in valuation techniques that are utilized within each approach (e.g., order of distribution of assets upon potential liquidation). It is management's opinion that no one valuation method within the model is preferable to the other and that no one method is more likely to occur than the other. Therefore, the final estimate of value is determined by assigning an equal weight to the values derived from each of the first three methods described above.

As a result of this analysis, the Company determined that its investment in Advanced Satellite Systems, Inc. was materially impaired and recorded an impairment charge of 350,000.00 during the period ended February 29, 2024.

NOTE 14. GOING CONCERN

These financial statements have been prepared assuming that the Company will continue as a going concern. The Company has operating and liquidity concerns, current liabilities exceeded current assets. These conditions raise substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments to reflect the possible future effects on the recoverability and classification of assets or the amounts and classification of liabilities that may result from the outcome of these uncertainties.

Management anticipates that the Company will be dependent, for the near future, on additional investment capital to fund operating expenses. The Company intends to position itself so that it may be able to raise additional funds through the capital markets. In light of management's efforts, there are no assurances that the Company will be successful in this or any of its endeavors or become financially viable and continue as a going concern.
