(the “Holding Company”), which became the successor issuer. In other words, the Holding Company is now the public entity. The Holding Company Reorganization was effected by a merger conducted pursuant to Section 251(g) of the Delaware General Corporation Law (the “DGCL”), which provides for the formation of a holding company without a vote of the stockholders of the constituent corporations.

Note 1. Organization and Business Description

Enzolytics, Inc. (“Enzolytics” or the “Company”) is a Delaware corporation originally formed in the United Kingdom on July 28, 2004. On November 25, 2004, the Company changed its name to Falcon Media Services, Ltd. On November 12, 2008, the Company changed its name to Extreme Mobile Coatings Corp., Ltd. On March 2, 2009, re-domiciled in Delaware and at the same time the Company changed its name to

Extreme Mobile Coatings Worldwide Corp. On May 19, 2010, the Company changed its name to Structural Enhancement Technologies Corp. (“Structural”). On November 16, 2012, the Company changed its name to Eco-Petroleum Solutions, Inc. (“Eco-Petroleum”). On September 11, 2017, the Company changed its name to Immunotech Laboratories, Inc. On March 22, 2018, the Company changed its name to Enzolytics, Inc. (“Enzolytics”). On May 21, 2020, the Company began the process of re-domiciling in Wyoming but on November 4, 2020, the Company decided to remain a Delaware Corporation and filed all the requisite documents to bring it current.

On September 18, 2023, the Company executed and closed a business combination agreement with Sagaliam Acquisition Corp, selling 100% of the Company’s ownership in the two operating subsidiaries, Virogenetics, Inc. (“VIRO”) and Biogenysis, Inc. (“BGEN”). Prior to September 18, 2023, Enzolytics was a biotechnology company, whose products consisted of multiple distinct drug development proprietary technologies: Immunotherapy, immune modulators, fully human monoclonal antibodies and an artificial intelligence (AI) platform for health care developments. The Company had clinically tested anti-HIV therapeutics. Additionally, the Company had created a proprietary cell line that produces fully human monoclonal antibodies that target and neutralizes the HIV virus. The sales transaction was valued at \$450,000,000 to the shareholders of the operating subsidiaries of the Company with a Make-whole provision.

Since the close of the sale transaction the Company has begun the process of formulating a new business strategy and searching for acquisition targets to expedite the implementation of the new business plan.

Merger Agreement

On November 16, 2020, the Company (having been renamed, immediately prior to this Holding Company Reorganization, from “Enzolytics, Inc.” to “ENZC SUB, Inc.”) completed a corporate reorganization (the “Holding Company Reorganization”) pursuant to which ENZC SUB, Inc., (the “Predecessor”) became a direct, wholly owned subsidiary of a newly formed Delaware corporation, Enzolytics, Inc. (the “Holding Company”), which became the successor issuer. In other words, the Holding Company is now the public entity. The Holding Company Reorganization was affected by a merger conducted pursuant to Section 251(g) of the Delaware General Corporation Law (the “DGCL”), which provides for the formation of a holding company without a vote of the stockholders of the constituent corporations.

In accordance with Section 251(g) of the DGCL, Enzolytics Merger Corp. (“Merger Sub”), another newly formed Delaware corporation and, prior to the Holding Company Reorganization, was an indirect, wholly owned subsidiary of the Predecessor, merged with and into the Predecessor, with the Predecessor surviving the merger as a direct, wholly owned subsidiary of the Holding Company (the “Merger”). The Merger was completed pursuant to the terms of an Agreement and Plan of Merger among the Predecessor, the Holding Company and Merger Sub, dated November 16, 2020 (the “Merger Agreement”).

On November 30, 2020, the Company consummated the Merger Agreement which involved the formation of two wholly owned operating subsidiaries, Biogenysis, Inc., (“Biogenysis) and Virogenetics, Inc.,

("Virogenetics"). Biogenesis was formed to acquire the intellectual property rights of, and license owned by, certain officers of BioClonetics Immunotherapeutics, Inc., ("BioClonetics") and Virogenetics which was formed to acquire the intellectual property rights of and licensed owned by a controlling stockholder of Enzolytics. Both of the newly formed subsidiaries are Texas Corporations.

In connection with the Holding Company Reorganization, all outstanding shares of common stock and preferred stock of the Predecessor were automatically converted into identical shares of common stock or preferred stock, as applicable, of the Holding Company on a one-for-one basis, and the Predecessor's existing stockholders and other holders of equity instruments, became stockholders and holders of equity instruments, as applicable, of the Holding Company in the same amounts and percentages as they were in the Predecessor prior to the Holding Company Reorganization.

The Holding Company adopted a certificate of incorporation (the "Certificate") and bylaws (the "Bylaws") that are, in all material respects, identical to the certificate of incorporation and bylaws of the Predecessor immediately prior to the Holding Company Reorganization, with the possible exception of certain amendments that are permissible under Section 251(g)(4) of the DGCL.

As part of the business combination of BioClonetics, Inc. and Enzolytics, Inc., the controlling shareholder of Enzolytics agreed to transfer 35,100,000 shares of its Series A Preferred Stock and 231,000,000 shares of its common stock, which represented Enzolytics control block, to three individuals of BioClonetics, who became officers of the Company. As a result, the three individuals obtained a majority voting interest in Enzolytics, resulting in a change in the majority ownership control in Enzolytics. The business combination was accounted for as a business combination pursuant to Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Topic 805, Business Combinations. The Company has elected not to apply pushdown accounting for the change in control. As a result, Enzolytics capital structure will continue to be reported as it was prior to November 30, 2020.

Note 2. Basis of Presentation

Principles of Consolidation

The accompanying consolidated financial statements of Enzolytics and its subsidiaries and have been prepared in accordance with accounting principles generally accepted in the U.S. ("U.S. GAAP"). All intercompany transactions and account balances have been eliminated in consolidation.

Liquidity

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. The Company has incurred operating loss since inception and as of December 31, 2023

the Company has incurred accumulated deficit of \$35,320,620. The Company has funded its operations through the sale of license agreements of its ITV-1 product, sales of its nutraceutical product, issuances of notes payable to investors and sales of Series C, Series E and Subscriptions off Series F Convertible Preferred Stock.

Note 3. Summary of Significant Accounting Policies

Use of estimates

The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the reported amounts of revenues and expenses at the date of the consolidated financial statements and during the reporting periods, and to disclose contingent assets and liabilities at the date of the consolidated financial statements. Actual results could differ from those estimates. The most significant estimates relate to the fair value of securities underlying stock-based compensation expense and other equity awards.

Significant risks and uncertainties

The Company's operations are subject to a number of factors that may affect its operating results and financial condition. Such factors include, but are not limited to: the clinical and regulatory development of its products, the Company's ability to preserve its cash resources, the Company's ability to add product candidates to its pipeline, the Company's intellectual property, competition from products manufactured and sold or being developed by other companies, the price of, and demand for, Company products if approved for sale, the Company's ability to negotiate favorable licensing or other manufacturing and marketing agreements for its products, The Company's ability to successfully implement a new business strategy that will rely heavily on acquiring or starting new operations and the Company's ability to raise capital to fund these endeavors.

Cash and Cash Equivalents

The Company considers all highly liquid investments with an original maturity of three months or less at the date of purchase to be cash equivalents. Financial instruments that potentially subject the Company to concentration of credit risk consist principally of cash deposits. Accounts at each institution are insured by the Federal Deposit Insurance Corporation ("FDIC") up to \$250,000. At December 31, 2023 and December 31, 2022, the Company had \$0 and \$304,169 in excess of the FDIC insured limit.

Property and Equipment

Property and equipment are recorded at cost and depreciated using the straight-line method over the estimated useful lives of the assets. Repair and maintenance costs are charged to expense as incurred.

The estimated useful lives for property and equipment are as follows:

Machinery and equipment	5-10 years
-------------------------	------------

For the periods ended December 31, 2023 and December 31, 2022, depreciation expense was \$22,088 and \$22,088, respectively.

Impairment of Long-Lived Assets

The Company regularly reviews the carrying value and estimated lives of its long-lived assets, to determine whether indicators of impairment may exist which warrant adjustments to carrying values or estimated useful lives. Should an impairment exist, the impairment loss would be measured based on the

excess over the carrying amount of the asset's fair value. For the years ended December 31, 2023, and 2022, the Company has not recognized any impairment losses.

Fair Value of Financial Instruments

The Company has no financial assets or liabilities that are measured at fair value on a recurring basis. FASB ASC Topic 820, Fair Value Measurement Disclosure, prioritizes inputs used in measuring fair value into a hierarchy of three levels: Level 1- unadjusted quoted prices for identical assets or liabilities traded in active markets; Level 2- inputs other than quoted prices included within Level 1 that are either directly or indirectly observable; and Level 3- unobservable inputs in which little or no market activity exists, therefore requiring an entity to develop its own assumptions that market participants would use in pricing. The carrying amounts of the Company's financial instruments, including cash, accounts payable, notes payable to investors and the Crowdfunding convertible notes approximate their fair values due to the short-term nature of these items.

Stock-Based Compensation

The Company accounts for its stock-based compensation expense in accordance with ASC Topic 718, Compensation—Stock Compensation ("ASC 718"). ASC 718 requires all stock-based payments to employees, directors and non-employees to be recognized as expense based on their grant date fair values. For equity-based payment awards, the Company recognizes compensation expense over the service period using the straight-line method.

On January 1, 2019, the Company adopted ASU No. 2018-07, Improvements to Non-employee Share-Based Payment Accounting, which expands the scope of ASC 718, Compensation—Stock Compensation to include share-based payments issued to non-employees for goods or services. Consequently, the accounting for share-based payments to non-employees and employees are substantially aligned.

Research and Development Costs

Research and development expenses primarily consist of costs associated with the preclinical and clinical development of the Company's product candidates. Research and development costs are expensed as incurred.

Convertible Instruments

The Company evaluates and accounts for conversion options embedded in its convertible instruments as follows:

Stock-settled debt under ASC Topic 480, Distinguishing Liabilities from Equity ("ASC 480"). The Company has issued certain convertible notes to investors which provide these investors to convert the notes into a variable number of shares with an aggregate fair value equal to the notes outstanding principal balance.

All other convertible instruments, the Company evaluates embedded conversion features within convertible debt under ASC Topic 815, Derivatives and Hedging ("ASC 815") to determine whether the embedded conversion feature(s) should be bifurcated from the host instrument and accounted for as a derivative at fair value with changes in fair value recorded in earnings. If the conversion feature does not require derivative treatment under ASC 815, the instrument is evaluated under ASC 470-20, Debt with Conversion and Other Options ("ASC 47020"). As of December 31, 2023, and 2022, there were no conversion features that met the definition of a derivative.

Under the ASC 470-20, an entity must separately account for the liability and equity components of the convertible debt instruments that may be settled entirely or partially in cash upon conversion in a manner

that reflects the issuer's economic interest cost. The effect of ASC 470-20 on the accounting for convertible debt instruments is that the equity component is required to be included in the additional paid-in capital in the consolidated balance sheets and the value of the equity component is treated as a debt discount which is then amortized over the term of the related debt to its earliest date of redemption.

The Company also records deemed dividends for the intrinsic value of conversion options embedded in its Series C Convertible Preferred Stock issuances based on the fair values of the Series C Convertible Preferred Stock and warrants and the differences between the Company's common stock price at the date of the transaction for the effective conversion price.

Warrants

The Company evaluates and accounts for warrants granted pursuant to ASC 480 and ASC 815 to determine whether the warrants are classified as liability or equity.

Income Taxes

The Company accounts for income taxes pursuant to ASC Topic 740, Income Taxes. Under ASC Topic 740, deferred tax assets and liabilities are determined based on temporary differences between the bases of certain assets and liabilities for income tax and financial reporting purposes. The deferred tax assets and liabilities are classified according to the financial statement classification of the assets and liabilities generating the differences.

Loss per Common Share

Basic and diluted net loss per share is presented in conformity with ASC Topic 260, Earnings per Share, ("ASC 260") for all periods presented. In accordance with this guidance, basic and diluted net loss per common share was determined by dividing net loss applicable to common stockholders by the weighted-average common shares outstanding during the period.

Recent Accounting Pronouncements

In May 2021, the FASB issued ASU No. 2021-04 ("ASU 2021-04), Earnings Per Share (Topic 260), Debt— Modifications and Extinguishments (Subtopic 470-50), Compensation—Stock Compensation (Topic 718), and Derivatives and Hedging—Contracts in Entity's Own Equity (Subtopic 815-40): Issuer's Accounting for Certain Modifications or Exchanges of Freestanding Equity-Classified Written Call Options (a consensus of the FASB Emerging Issues Task Force). The amendments in this update are effective for all entities for fiscal years beginning after December 15, 2021, including interim periods within those fiscal years. The Company is currently evaluating the impact of this new standard.

In August 2020, the FASB issued ASU No. 2020-06, Accounting for Convertible Instruments and Contracts in an Entity's Own Equity ("ASU 2020-06"), which simplifies the accounting for certain financial instruments with characteristics of liabilities and equity, including convertible instruments and contracts in an entity's own equity. The standard eliminates the liability and equity separation model for convertible instruments with a cash conversion feature. As a result, after adoption, entities will no longer separately present in equity an embedded conversion feature for such debt. Additionally, the embedded conversion feature will no longer be amortized into income as interest expense over the instrument's life. Instead, entities will account for a convertible debt instrument wholly as debt unless (1) a convertible instrument contains features that require bifurcation as a derivative under ASC Topic 815, Derivatives and Hedging, or (2) a convertible debt instrument was issued at a substantial premium. Additionally, the standard requires applying the if-converted method to calculate convertible instruments' impact on diluted earnings per share ("EPS"). The standard is effective for fiscal years beginning after December 15, 2021, with early adoption permitted for fiscal years beginning after December 15, 2020.

Note 11. Subsequent Events

After the sale of the operating subsidiaries Virogenetics, Inc. and Biogenysis, Inc. to Sagaliam Acquisition Corp. (SAGA) on September 15, 2023, the Company had no operations and is currently developing a new business strategy for implementation focused on medical devices and testing.

On January 19, 2024, ENZC and Sagaliam Acquisition Corp (SAGA) agreed it would be mutually beneficial to Novate the existing Business Combination Agreement and to negotiate a more acceptable alternative. SAGA believed that there were several unanswered due-diligence questions that arose when trying to obtain funding for BGEN and BGEN felt SAGA was not providing the funding it needed to continue. It was therefore decided it was in the best interest of the shareholders of both entities to negotiate the return of BGEN to ENZC and to renegotiate the purchase price for VIRO to SAGA at a higher valuation.

In February of 2024 the Company negotiated a reduction in the conversion price of the Series F to compensate the subscribers for the delay in issuing the Series F Preferred shares purchased in 2022.

On February 22, 2024, ENZC increased the authorized Preferred shares to accommodate the issuance of the Series F subscribed in November of 2022 and increase the authorized common.

During the negotiations of the concerning the Business Combination Agreement and the reduction in the conversion price of the Series F a deadlock developed between management preventing a resolution to be reached between SAGA and ENZC.

On February 26, 2024, the ENZC issued 5,000,000 million shares each to Charles Cotropis, Joseph Cotorpia and Dr. Gauarv Chandra totaling 15,000,000 common shares. These shares were issued in place of the stock options issued with the employment contracts entered into with the Officers in November of 2020 that expired in November of 2023. Harry Zhabilov options were excluded.

On March 19, 2024, at a special-called meeting of the shareholders of the Company, at which a quorum was present representing excess of 51% of the voting shares of the Company, all Series A shares voted in favor of electing a new board of directors. The existing board, consisting of Charles Cotropia, Chairman, and Harry Zhabilov was replaced with Harry Zhabilov, Chairman of the Board, Dr. Lachezar Ivanov, and Dr. Gaurav Chandra.

At a duly called and noticed Board of Directors meeting held on March 21, 2024, the following new officers were elected to serve until the next annual (or special called) meeting of the shareholders of the Company:

President and CEO: Steven Sharabura

CFO and Secretary: Diana Zhabilov

Chief Science Officer: Harry Zhabilov

Dr. Gaurav Chandra was duly noticed, acknowledged notice, and was nominated as an officer. Dr. Chandra did not attend the meeting and declined the position. As of the date of the meeting, Dr. Chandra remained a director elect of the Company.

On March 26, 2024, the Company entered into a Novation Agreement with Sagaliam Acquisition Corp (SAGA). This agreement allowed BGEN to return back to ENZC, reduced the purchase price of the transaction, to \$290,000,000 from \$450,000,000 in exchange for the operating Subsidiary's return. All IP and patents ownership in BGEN licenses return to ENZC. SAGA and ENZC agree to a mutual agreement allowing ENZC to pursue licensing agreements with potential acquisition targets pursued by SAGA.

On April 10, 2024, Dr. Gaurav Chandra notified the Company that he declined to lead efforts to develop and commercialize BGEN's IP and potential patents by refusing the position of CEO of BGEN. Dr. Chaundra also rejected his appointment to the Board of Directors of ENZC.
