August 2016 Issued 20 million shares to Sree Koneru Employee Services.

5) Financial Statements

Financial Statements are attached

6) Describe the Issuer's Business, Products and Services

BioElectronics Corporation is the leading commercial stage company in the field of non-invasive electroceutical medical devices. The devices are small, lightweight, and wearable and produce a pulsating electromagnetic field that affects cells and nerves to treat acute and chronic pain. The leading product, ActiPatch Therapy, is a drug-free, safe, and effective chronic pain therapy that reduces inflammation and pain by 57% and medication use by 50%. 48% of the UK users take opioids for chronic pain and 76% have experienced a moderate to complete elimination of the opioids.

The Company is aggressively pursuing US FDA over-the-counter market clearance to access the United States market.

The chronic pain market is larger than diabetes, heart disease, and cancer combined, with 20% of adults globally suffering from chronic pain. ActiPatch is an over-the-counter US\$30 medical device, which addresses the unmet need for 1.5 billion worldwide chronic pain sufferers. Chronic pain modifies the way the central nervous system works. The Company's medical devices modulate the body's nerve activity to dampen the pain perception, which reduces drug use.

Ken McLeod, PhD. Director of Clinical Science and Engineering Research, Binghamton University State University of New York short video explains how the technology and ActiPatch work at <http://actipatch.com/why-actipatch/>. The technology has the potential to become the standard of care throughout the healthcare continuum across the OTC and healthcare markets. BioElectronics' technology offers significant opportunities in menstrual pain, heel pain, migraine headaches, diabetic neuropathy, postoperative surgery, chronic wounds, bone growth stimulation, and other applications.

US FDA OTC Market Clearance: The US FDA has reclassified non-thermal pulsed shortwave to a class II device. The Company has filed an application for US market clearance for nonprescription use of the devices for the treatment of musculoskeletal pain. The application is supported by:

- 3 published clinical studies showing statistically significant and clinically meaningful pain reduction, two in chronic and one acute musculoskeletal pain.
- Our Pain Management refereed medical journal published Registry of 5,600+ back pain users. The FDA is now is accepting Real World Evidence in clinical evaluations. Supplemented with our Sleep Study, Medication Use submitted for publication, and 6 Month Observation Study showing pain relief durability.
- Consumer Usability Study showing that consumers can read and understand our Directions for Use.

The Company's devices are approved for home use in the EU, Canada, and Australia and the Company has sold one million devices with exceptional consumer acceptance.

The medical journal Pain Management published our 5,000+ survey results A UK registry study of the effectiveness of a new over-the-counter chronic pain therapy, Pain Manag. 2015 Nov; 5(6): 413-23, <http://www.futuremedicine.com/doi/full/10.2217/PMT.15.35> reported an average baseline Visual Analogue Scale (VAS) scores of 8.02 (scale is 0-10) and 2/3 of participants had more than 57% pain relief and the following long-term results:

- 2/3 (including opioid users) reported moderate to complete elimination of pain medications;
- 2/3 reported improved sleep;
- 3/4 reported increased physical activity; and,
- 4/5 a substantial improvement in overall quality of life

The Company's Try & Tell sales and marketing 7-Day trial device campaign has won the *OTC Bulletin's* 2015 "Best OTC Marketing Campaign on a Small Budget" award. Current chronic pain therapies do not meet the need for chronic pain relief and sufferers are skeptical. To overcome the skepticism and accelerate product acceptance, we promote a discounted 7-Day Trial device without an on/off switch. 65% of testers averaged a 57% reduction in pain and said they "intended" to or would "maybe" purchase and 80% did purchase an average of 1.75 devices within 90-days. After one year, the users purchased an average of 2.7 devices.

The accompanying financial statements are those of a development stage company. The Company is currently engaged in and devotes considerable time to planning, product design changes, recruiting distributors, and establishing a market presence for its product.

The Company has focused attention on international customers to expand its distributions and sales. The Company has established distribution agreements with distributors in the United Kingdom, Sweden, Singapore, Malaysia, Canada, Scandinavia, Australia, and South America. The distribution agreements grant the right to sell BioElectronics' products in certain territories. The distributors are responsible for advertising and promotion in their assigned territories. In addition, the distributors are subject to minimum annual product purchases, minimum initial purchases, and minimum inventory requirements.

A. Date and State (or Jurisdiction) of Incorporation:

April 10, 2000 in the State of Maryland

B. the issuer's primary and secondary SIC Codes;

Primary – 3846 Electromedical Equipment Industry

C. the issuer's fiscal year end date;

12/31

D. principal products or services, and their markets;

Neurological medical devices for the treatment of chronic pain.

7) Describe the Issuer's Facilities

The Company is headquartered, manages and operates its business at 4539 Metropolitan Court, Frederick, MD 21704 USA. The Company presently leases 4,100 sq. ft of space. The lease commenced on November 1, 2008 to October 31, 2011. The Company is currently on a month-to-month lease.
